Excellent performance in a weak year

The Chairman's address followed by the MD's presentation is available <u>HERE</u>. Overall the Chairman was upbeat about the performance of the company over the year with 277,450 ozs of gold production and further prospects for growth. The company's acquisition of Penny west from Spectrum resources had proved successful and they also look well set (with 73%) to take over Lake Rebecca from Apollo consolidated. The company was now becoming much more aware of ESG issues and furthermore strengthening its board with 2 female directors and a female general manager at its Mount Magnet operations.

The ASA raised commented that the company's remuneration report lacked transparency in that KMP scores against hurdles were unquantified. The Chairman accepted his criticism and said they would attempt to be more transparent in future reports.

Further ASA questions concerned ESG scores and comment concerning their peer group where the ASA promoted the use of an independent index (e,g. GDX) rather than a company chosen peer group. The Chairman said they would look into these matters for future reports.
