Oaky

Full-Stack dev. - PHP, JS / Laravel & Vue

The exponential growth of Oaky requires the creation of new and innovative tools to ensure fast onboarding times & a smooth user experience for new clients.

I helped expand Oaky's online onboarding environment by building tools such as automatic data importers and improved user interface elements.

ZANG

Lead developer - PHP, JS / Laravel.

My work revolved around building tailored web apps for clients with custom needs.

I developed a content management solution for Luminare Group, an organization started by eBay's founder, Pierre Omidyar, and aimed at helping the fight for a fair and just world.

Shatterproof
/ riefmedia

Senior developer - PHP / WordPress.

I helped a wide range of clients achieve their online goals, building & maintaining complex websites.

Vladimir POWCF, LIEBERT CASSIDY WHITMORE:

Ciprian was instrumental in creating a subscription based e-commerce website for our firm.

As the lead developer, he worked on designing and building the site's framework, back-end and front-end areas, as well as provided all of the necessary training for our team.

We couldn't have completed our project without his expertise and leadership.
