Course Response

01. UX Consultant Assignment

This assignment was especially helpful in developing a new skill set, aided by the checklist and report, and for us to use on our own websites as we build them!

02. Portfolio Assignment

This assignment was also highly practical in assisting us with marketing and self promotion, while encouraging good web design, accessibility and expert self-review.

03. Literature Review

This assignment was highly practical, guiding us towards the behemoth portion of writing our thesis, understanding APA formatting, synthesis, proper citations for any stated points.

04. Code Academy

I was pleasantly surprised at the usefulness and enjoyable nature of this assignment. I was able to then use what I learned in it to extract a url for an embedded video in a project for 545 the next week.

05. General Thoughts

This course has been extremely practical in terms of preparing the students for the world of ID in our portfolios, coding, thesis writing and expert website review. I'm very grateful for the skills!
