

Classtime

Company Fact Sheet

Background

Classtime is a solution for classrooms that complements in-class teaching with immediate feedback on students' level of understanding.

Vision & Mission

Our vision is to shape learners into critical thinkers. This is why we are building the world's most advanced platform for feedback and learning. We give educators the formative and summative assessment tools they need to manage their classes, keep their learners engaged, and provide instant grading and clear feedback to their students. We aim to save teachers valuable time by providing real-time analytics and scoring reports while also building engaging lessons that foster collaboration.

Overview

Today, we help millions of users across more than 60 countries connect and teach each other new skills every day, from school teachers and their students to education publishers and their clients. We give educators the formative and summative assessment tools they need to manage their classes, keep their learners engaged, and provide instant grading and clear feedback to their students.
