

# Classtime

## Company Fact Sheet

---

### **Background:**

Classtime is a solution for classrooms that complements in-class teaching with immediate feedback on students' level of understanding.

### **Mission:**

Classtime was made with a mission in mind: to show a clear path to student success. We seek a future where every student is more engaged, collaborates, and makes visible progress, enabled through internet technologies. Furthermore, we aim to empower a global network of teachers by allowing for the sharing of question sets through our public library and supporting them through our Classtime Certified Educator program and services.

### **Overview:**

Today, we help millions of users across more than 60 countries connect and teach each other new skills every day, from school teachers and their students to education publishers and their clients. We give educators the formative and summative assessment tools they need to manage their classes, keep their learners engaged with fun features like gamification, and provide instant grading and clear feedback to their students.
