

FRUIT LOOP

An endless loop of fun and fruity winnings.

This 5x4 video slot game is packed with fruity features like Stacked symbols, Wild substitutions and a Cycle-feature, making the winnings extra juicy and sweet.

The Cycle feature makes this medium volatile 40-paylines game worth a spin. If a BELL symbol lands on any reel, a golden frame is held in position. If you land more BELL symbols on the same position the multiplier gets increased by 1 up to a max. of 10 and for line max x50. Each line win is multiplied by the summed multipliers of all symbols on that line!

On the 10th spin all collected golden frames turn into Wild symbols. The fun continues again and again, the cycle "loop" starts new after every 10th spin.

With lots of winning opportunities plus a max exposure of x 25000 this game will continue your cycle of luck.
