## Game Information

- The game object is to **obtain a winning combination of symbols on the reels** through a bet previously chosen by the player
- The reels **will spin with each play**. When they stop, the player will check if a prize has been won or not according to how the symbols have been arranged
- The winning combination **is highlighted on the reels**
- This game has **5 pay lines**

## Paylines

- To obtain a prize, **equal symbols** must coincide on the predetermined lines as indicated in the attached image

- Prizes are for combinations of a kind. Matching symbols should be on the paylines and adjacent reels, starting from the left-most.
- The number of the played paylines is fixed. Only the highest win per line is paid.
- All winnings are added to the total prize when winning multiple lines.

# Paytable

According to the figures that the reels form, the player will obtain different prizes. The amount in the paytable will vary depending on the selected bet. The paytable can be accessed using the attached symbol

| PAYTABLE                                                                             |                                                                                      |                                                                                       |
|--------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|
|   |  |  |
| 3x \$500.00                                                                          | 3x \$250.00                                                                          | 3x \$100.00                                                                           |
|   |  |  |
| 3x \$20.00                                                                           | 3x \$10.00                                                                           | 3x \$5.00                                                                             |
|  |                                                                                      |                                                                                       |
| SCATTER<br>3x \$50.00                                                                |                                                                                      |                                                                                       |

## Extras

3 SCATTER symbols trigger 20 Free Spins.  
SCATTER symbols appear on reel 1,3 & 5 only.  
Free Spins are played with the same bets and lines as the initial game and can be won again during the feature.

During Free Games CLOVER symbol becomes WILD and substitutes for all symbols, except SCATTER.

## Common Features

### Main Game

- In the middle of the screen, the reels can be found. The account balance is available on the lower left side of the screen, and in the right side the bet value

- The bet is variable, and it can be modified
- The denomination is the currency value that is given to the credit unit
- The player can choose how to view the balance, money or credit, and the bet denomination before starting the game or between games

## ~~~~ Main Game

- By clicking on the available balance, the player can switch between the credit or currency view without having to enter in the bet menu

- The current bet can also be increased or decreased without accessing the bet menu changing directly by clicking the denomination button

## Help Menu

- At the left side of the reels, the player finds a button that leads to a help menu in which the prize table can be consulted according to the bet made, the pay lines, the game rules as well as allowing the selection of the wanted language. It can be also checking the game history for the last 10 games

## Set-Up Menu

- At the right side of the reels, the player finds the Set-Up button where the player can see the general information about the game, modify the bet settings, activate or deactivate the sound and modify the reels speed

## How to Play

- The Play button, located to the right side of the reels, allows the game to start if the player has enough balance to cover the desired bet

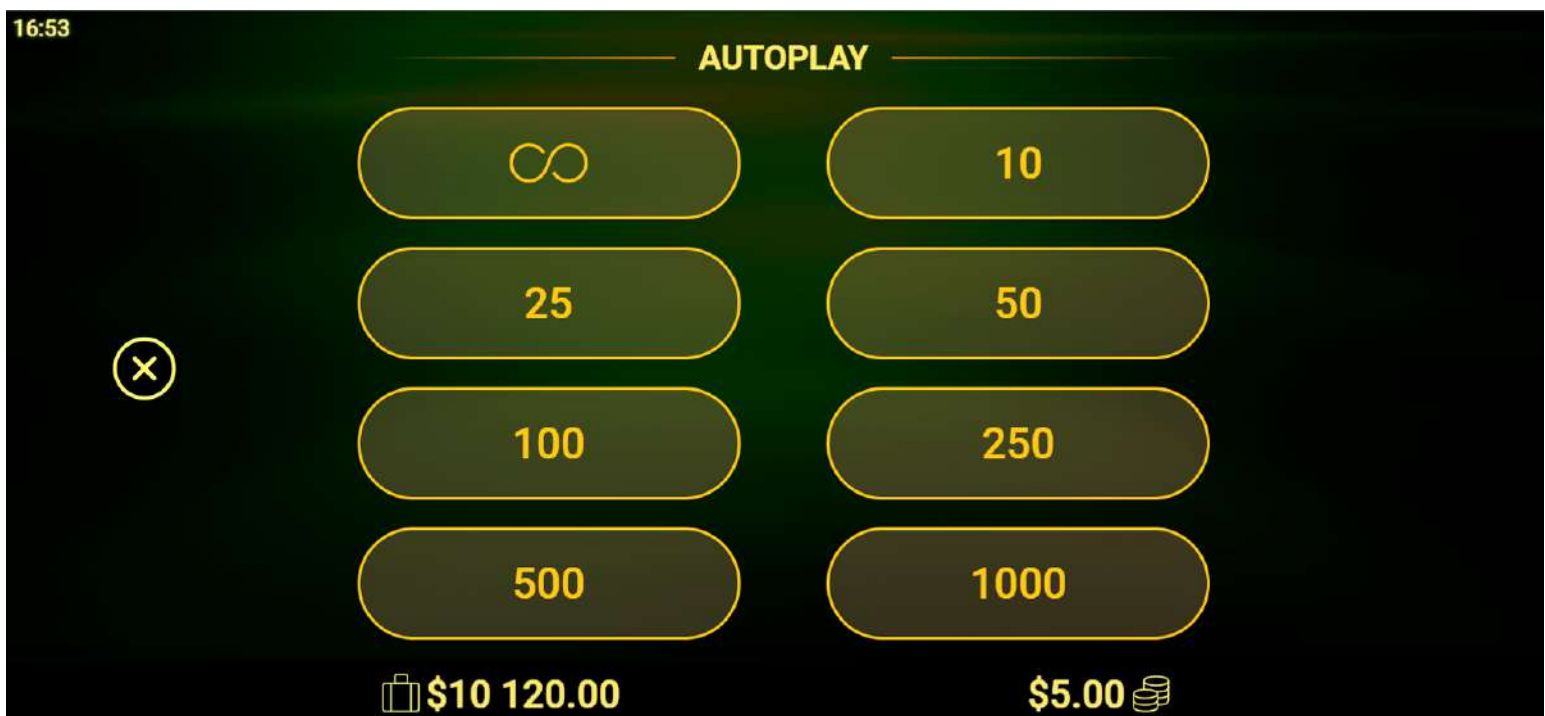

- The bet value can be changed by clicking on it, being able to see the value in currency or credit. Also, the player can enter in the bet menu to change it (symbol attached)
- The total bet is based on the bet initially placed multiplied by the cost of the paid lines played
- The prizes obtained are automatically credited into the player's account
- Malfunction voids all pays and plays

## Autoplay

- Player will be able to choose the number of automatic games that wants to play
- Autoplay can be activated if the player has enough balance for the selected spin games
- The player can stop the Autoplay at any time by clicking the same button again
- Autoplay does not differ from the manual one. It also does not affect the game's RTP

~~~~~ **Other Game Buttons**

Other game buttons functionality:

| | |
|---|---|
| Access to bet settings |  |
| Activate and deactivate the sound of the game |  |
| Allows reels to spin faster |  |
| Increase or decrease the bet |  |
| Close the set-up menu |  |
| Change the language |  |
| Gives access to the session statistics |  |

Jackpot

Jackpot is a large prize pool that the players have the chance to win during their play

All selected Amigo gaming online slots within one operator are **connected to one prize pool**

Jackpots have following characteristics:

- Progressive: Jackpot **prize rises** with every bet
- Contribution: Percentage of every bet made by player contribute to **the Jackpot prize pool**
- Configurability: 1 to 3 levels
- Initial amount: **Initial jackpot** prize pool can be configured
- Winning: Each player has the same conditions **of hitting Jackpot**
- Random: Jackpot hits are **random** and not dependent on winning combination

Jackpot feature is optional for operators
