

PRODUCT DATASHEET

OCEAN SAFETY EMERGENCY LADDER

OCEAN SAFETY®

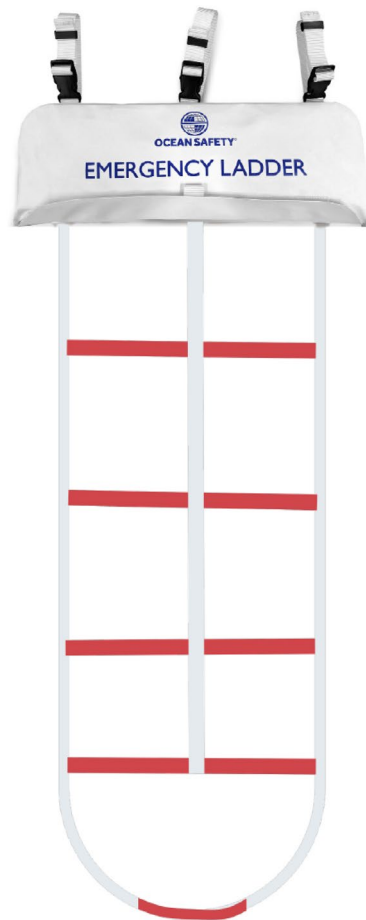

Ocean Safety,
Saxon Wharf,
Lower York Street,
Southampton,
SO14 5QF, UK.

www.oceansafety.com

Designed for recovering a person who has fallen overboard, this simple to install ladder can be retro-fitted to yachts and is especially useful for shorthanded sailing, since it can be released by a person in the water.

The Ocean Safety Emergency Ladder satisfies the exacting ISO 15085 requirement which specifies design, construction and strength requirements of MOB and reboarding products. It also fulfils the MCA Code of Practice requirements for MOB recovery equipment.

The Ocean Safety Emergency Ladder is available in lengths to fit freeboard heights from 2.5m to 4.5m. While not in use it is stored discreetly in a compact white PVC valise and can be fastened to the yacht with adjustable buckles.

KEY FEATURES

- Length 2.5m, 3.5m & 4.5m
- Complies with ISO 15085 Standard
- Maximum load 175kg
- Designed for recovering MOB casualties, especially those with short-handed crews
