The Jon Buoy Inflatable Rescue Sling is specifically designed for the quick and easy recovery of a waterborne casualty. Packing neatly into an easily stowable soft or hard case, the versatile fitting allows it to be attached to any suitable boat or land based fixture. The weight of the pouch allows an accurate throw to the casualty of up to 36metres. Upon contact with the water the sling automatically inflates and comes with retro-reflective tape and an automatic light can be fitted as an option. Safe working load of 175kg. Comes with option of hard case or soft case.

The rescue sling hard case, offers a more ergonomic and streamline design for improved deployment and manoeuvrability.

New for 2020, the Jon Buoy range will be further extended to incorporate the inclusion of Glo Lite technology.

Glo Lite uses innovative retro-reflective technology that significantly enhances the visibility of the hi-vis fabric, making it highly reflective and increases perception during dark conditions, thus aiding location, leading to reduced casualty time before recovery for a more positive rescue outcome.

Soft case

Hard case

KEY FEATURES

- Glo Lite fabric technology
- Automatic inflation
- Automatic light optional
- Retro-reflective tape
- Easy to deploy
- SWL 175kg
- 36m of 8mm floating polypropylene line

CASE FEATURES

- Moulded handle
- Universal bracket
- Fits rails up to 30mm in diameter
