

# Mini series

special fire extinguishers for grease fire

Speziallöscher für Fett- & Ölbrände

## Extinguishing agent ABF

If you ever stood in front of a burning pan or a fryer you know how fast fat can ignite itself. If then the wrong extinguishing agent is used such as water, it will violently vaporize and will spray burning fat everywhere.

For a successful fire fighting of grease fire (fire class F) Jockel provides you with special extinguishers which also can be used in different fields and are suitable for fire classes A, B, and F.

Special conditions require particular solutions. Jockel grease fire extinguishers contain a highly concentrated saline solution which causes saponification when sprayed on burning oil. In this way the fire is smothered.

## Easy handling

Easy to see how it works at first glance with controllable discharge

## Areas of application

- ▶ Cuisine areas
- ▶ Residential areas
- ▶ Restaurants & take-aways
- ▶ Canteen kitchens
- ▶ Bakeries

MADE IN GERMANY

## Technical data

Type (Distribution)	Code	Capacity Agent	Rating	Temperature Range	Propellant	Discharge Time/Range	Height approx.	Width approx.	Weight approx.
F 2 JM 5 stored pressure	with DH 25-301-35 with FH 25-398-35	2 l aqueous solution for grease fires	5 34 40	-30°C to +60°C	Air/N <sub>2</sub>	16 sec. 6 m	370 mm	145 mm	4,1 kg
F 3 LJM 8 stored pressure	with WH 32-301-35	3 l aqueous solution for grease fires	8 55 75	-30°C to +60°C	Air/N <sub>2</sub>	17 sec. 7 m	375 mm	230 mm	6,3 kg
F 3 H System 8* Auflade	with WH 32-378-35	3 l aqueous solution for grease fires	8 55 75	-30°C to +60°C	CO <sub>2</sub>	18 sec. 7 m	375 mm	230 mm	6,7 kg
