

Analyzing and Visualizing Data in Looker

In this course, you learn how to do the kind of data exploration and analysis in Looker that would formerly be done primarily by SQL developers or analysts. You learn to leverage Looker's modern analytics platform to find and explore relevant content in your organization's Looker instance. You also discover how to ask questions of your data, create new metrics as needed, and build and share visualizations and dashboards to facilitate data-driven decision-making.

**DURATION**

1 day

**LEVEL**

100 - Introductory

**FORMAT**

Instructor-led, On-demand

What you'll learn

- Define Looker and the capabilities it provides for working with data.
- Use dimensions, measures, and filters to analyze and visualize data.
- Use dashboards for multiple visualizations and boards to curate Looker content.
- Create advanced metrics by pivoting Looker data and writing table and offset calculations.
- Create visualizations using Looks and dashboards, and share Looker content with others.

Overview	6 modules · 31 videos · 2 labs · 8 demos, 6 quizzes
Who this course is for	• Business users who need to draw insights from data. Data analysts who are responsible for data analysis and visualization within their organizations.
Products	• Looker
Not covered	• LookML (Looker Modeling Language) • Looker admin features and functions

Module 01

The Looker Platform

Topics	• What is Looker? • Looker user interface • Organizing content with folders
Objectives	• Define the value proposition of the Looker platform. • Explain Looker's role in the data analysis process. • Describe Looker's main user interface components. • Interpret Looker's hierarchical folder structure for content. • Discuss different content locations within the Looker platform.
Activities	• 1 quiz

Module 02

Data Analysis Building Blocks

Topics	• Dimensions in Looker • Measures in Looker • Using dimensions and measures • Filtering dimensions • Filtering measures
Objectives	• Define the purpose of a dimension and measure in Looker. • Identify where end users work with dimensions, measures, and filters.
Activities	• 3 demos • 1 lab • 1 quiz

Module 03

Working with Looker Content

Topics	• Filtering Looks • Introducing dashboards • Filtering dashboards • Curating Looker content in boards
Objectives	• Explain how to filter within a Look and a dashboard. • Identify where users can work with dashboards and boards, and filter within Looks and dashboards. • Explain how dashboards, boards, and filtering can contribute to the data analysis process. • Define the purpose of a dashboard. • Explain what a board is in Looker. • Detail the process of creating a board. • Detail the process for pinning Looks and dashboards to a board.
Activities	• 1 demo • 1 quiz

Module 04

Customizing Explores

Topics	• Pivoting data in Looker • Introduction to table calculations • Types of table calculations • Writing table calculations • Introducing offset functions • Writing offset calculations
Objectives	• Explain the process of pivoting data. • Identify where users can pivot data, write table calculations, and write offset calculations. • Identify situations to consider pivoting data and writing a new table calculation. • Explain how pivoting data, writing table calculations, and writing offset calculations can contribute to the data analysis process. • Differentiate between a table calculation and an offset calculation. • Discuss the various types of table calculations. • Detail the process to write table calculations and offset calculations.
Activities	• 4 demos • 1 lab • 1 quiz

Module 05

Creating New Looker Content

Topics	• Creating new Looks • Creating new dashboards
Objectives	• Explain how to create a new Look and dashboard in Looker. • Identify where users can create new Looks and dashboards.
Activities	• 1 quiz

Module 06

Sharing Looker Data with Others

Topics

- Sharing and scheduling Looks
- Sharing and scheduling dashboards
- Tile-level dashboard alerts

Objectives

- List the options to share Looks and dashboards once or with a regular schedule.
- Identify where users can send or schedule Looks and dashboards, and configure tile-level dashboard alerts.
- Explain how to configure a shared or scheduled Look or dashboard.
- Discuss how to choose options that are appropriate for a given situation or business case.
- Identify the options to schedule a tile-level dashboard alert.

Activities

- 1 quiz
