Liquitex® Professional Heavy Body Mixing Acrylic

Liquitex is the only acrylic paint brand to offer four uniquely different ranges of professional acrylic color to suit the needs of the artist. The low-odor acrylic resin base represents the latest in acrylic resin technology, offering increased open time and producing colors of great clarity. The paint films are highly flexible, durable, non-yellowing, UV resistant, water-resistant, and pH neutral when dry. Liquitex Heavy Body Artist Acrylic Paint, previously referred to as High Viscosity, has a thick consistency for traditional art techniques using brushes or knives as well as for experimental mixed media collage and printmaking applications. Impasto (thick) applications retain crisp brush.

Liquitex® Professional Soft Body Acrylic Bottle

Soft Body suits a wide range of techniques and applications. It works well with almost any surface, and dries flexibly and quickly for easy layering and masking. As pigmented per volume as Heavy Body Acrylic, Soft Body uses the latest resin technology to give you maximum clarity and vibrancy, with minimal wet-to-dry shift. With a low viscosity and just the right amount of body, Soft Body is never too sticky or slippery. Each pigment is rated according to the American Society for Testing & Materials (ASTM). This means your work will have the greatest archival permanence possible – at least more than 50 years in gallery conditions – with no color shifting or fading, to stay vibrant and true. Tested by the Art and Creative Materials Institute at Duke University, these colors hold the Approved Product (AP) seal, proving they are safe for studio and educational use.

Liquitex® Satin Medium

Liquitex Satin Medium gives acrylic paint a satin sheen finish, while increasing color saturation and brightness. Use it to lower the viscosity of heavier body paint and increase its flow, or to extend the volume of more fluid paint without affecting acrylic stability. The more you add, the thinner and more transparent color will be, so mix in until you achieve the viscosity and translucency you want. Collaging? Use it direct from the bottle as a lightweight glue. Or try it diluted in an atomizer to fix pastels, chalks or pastels.

Liquitex® Satin Gel Medium

Liquitex Satin Gel gives your acrylic paint a satin sheen finish, while increasing open time and color brightness. Use it to thicken soft body paint, or to extend the volume of heavy body paint without affecting acrylic stability. The more you add, the more transparent your color will be. If you're blending or softening edges, the slower dryer time will be useful. Collaging, decoupage or fixing mixed media? Use it direct from the pot as a strong transparent glue.

Liquitex® Silkscreen Medium

Liquitex Silkscreen Medium transforms water-based acrylic color into printing ink with the ideal consistency for screen and monoprinting. Mix into your paint to extend its drying time - giving you longer for print application and positioning - and give greater flow and fluidity - allowing for finer print detail. Liquitex Silkscreen Medium will keep the opacity of your color the same and extend its volume further. The result? Color-rich even prints with archival permanence.

Liquitex® Super Heavy Gel

When mixed with quality acrylics, this extremely thick, extra heavy body medium creates a very dense paint that has high surface drag for a stiff, oil-like feel, and it keeps your paint workable longer than other gel mediums on the market. In addition, it extends paint volume while increasing brilliance, transparency and gloss, so you can get creative and experiment with it as an extender, ground, or collage and mixed media adhesive.

Daler-Rowney® Georgian Oil Colour Introduction Set

Georgian Oil Colours have been traditionally crafted and triple-milled for more than 200 years, providing artists with high quality paints in a wide range of colors. These oil paints are carefully formulated and require very limited quantities of medium, so they can be used freely straight from the tube, allowing the artist to concentrate on creativity and performance. With high pigment loads and permanent, brilliant colors, the intermixable, smooth consistency is ideal for experimenting with brush and knife techniques.

Beadalon® Collapsible Eye Needles

A collapsible eye needle saves you time and effort when you are stringing beads onto wire or thread. Because the eye is flexible, it's perfect for stringing beads with very small holes. Extra-spring wire is kink-resistant and has a specially designed eye that automatically collapses and instantly reshapes when it is pulled through the bead. The large eye is easy to thread and accommodates many sizes of cord.
