

RSMJ conf. 2024 Toronto

* Uu Bud Talks from Canadian researchers

↳ harm reduction messaging

Sherry Stewart Dalhousie University
PTSD CUD comorbidity

Concerns →

- self-medicate
- can prolong PTSD symptoms
- stimuli + trauma + substance use
negative reinforcement which
then maintains the fear
+ that can lead to craving of trauma
cues can become addiction stimuli

? Auto cognitive processes

↳ cannabis avoidance task

RSO (Rick Simpson oil) high THC
↳ lots of health claims

talk to Sarah

- * Lemon & peppercorn → anxiety
- * Get pic of fact check from Sarah

④ Mock dispensary
control display, price, deals,
environment, placement, audio/video
recording

can change labels

* could we partner?

Eric. Pedersen@med

① Opioid / cannabis track → tend to trust
more recent data. Thoughts?

No immediate change, but then a dip,
although confidence interval overlaps

Track #2 Day one

Alc + Cannabis

Descriptive Norms

combined use is normative

Planned is typical & when planned,
going harder

Gillian & Julie's Day 2

L/U Gillian's policy + research paper "A research agenda to inform...
& see if this aligns w/
our running list

? Intermural?

#2 Health Canada

* data report available for adverse effects

#3 MN medical pgm

① What is diff bwn intractable pain & chronic? ②

PSE Pt. self evaluation prior to every purchase!

9300 pts. in registry
How compared?

Day 2 cont. MN:

? w/ Migraines, is that actual diagnosis
or is it a self-diagnosed
≠ possibly related to withdrawal?
