SIMPLE TECH

Our goal is to simplify businesses, whatever their sizes by building or integrating sharp tools, apps, networks and clouds.

OUR IDENTITY

Who we are

To our eyes, digital and technology is a thing of passion. We don't work with employees, we work with experts that share the same passion for simplifying, removing barriers and making people happy using their everyday work technology.

Our vision

We aim to make things simpler, less costly, while delivering the same power, reliability & quality. No one should waste time with complexity when it comes to productivity tools. We focus on things that will simplify your infrastructure, such as cloud and mobile computing.

Our effect on businesses

Cloud partners

4

Tier-4 cloud providers, such as Amazon AWS, Google Cloud Engine, DigitalOcean and Microsoft Azure.

IT savings

37%

Combined average IT savings on a 3 years scale when moving your infrastructure to the cloud.

Capital investment

0\$

The initial capital investment required to deliver a cloud infrastructure in your business for your clients & workforce.

Possibilities

∞

Possibilities are infinite in the cloud since it's adapted & scaled to your way of making things happen.

BEST PROJECTS PARTNERS

CLOUD

TECH

Our goal is to simplify businesses, whatever their sizes by building or integrating sharp tools, apps, networks and clouds.

Cloud Operations

We help organizations deliver fast, reliable cloud services while improving performance, optimizing resources, and reducing costs. All this to simplify your business needs when it comes to winning in a competitive marketplace.

DevOPS: Development Operations

We master the art of engineering by making or integrating the perfect tools, apps and networks that will simplify the technology in your business. Focusing on Cloud and Mobile computing we deliver integrated solutions that include security, scalability and reliability.

Architecture

We help organizations make the most out of the cloud by building and optimizing virtualized networking and computing, making it the perfect tailored solutions for our clients. We help businesses move to the cloud, and others save money on their infrastructure.

End-User

We make sure technology brings an experience to the users of your infrastructures. No one should suffer from complications when it comes to doing their jobs. We're here to help them access and deliver their work with flexibility and security, wherever they are.

WE PUSH OUR EXPERTISE

To the summit

codecie

WE MEET

and establish your goals and challenges so we can find the perfect path to simplicity.

WE LEARN

About better ways to do business by replicating your operations with new tools, apps and networks.

WE BUILD

or integrate the perfect network, app, cloud and tools that will save your business time and money.

WE DEPLOY

monitor, train and support the solution, making the whole process painless, and easy !

Our lab strategy

We think it's important to build things in partnership. Everything we do is designed and tested with your staff and operations.
