

Californian Proposition 65

Proposition 65 (formally titled The Safe Drinking Water and Toxic Enforcement Act of 1986) requires businesses to provide warnings to Californians about significant exposures to chemicals that cause cancer, birth defects or other reproductive harm.

California published on December 29, 2017 a list of such known harmful chemicals.
The last update we were informed about was at January 3, 2025.

The normal use of Sensirion digital micro sensors and –systems does not cause any dangerous levels of these listed substances. Thus, no warning label is required.

Please note that traces of such substances are ubiquitous, and traces cannot be avoided.

Signed for and on behalf of Sensirion AG

Staefa, 14 March 2025
