SUBJECT: A RESOLUTION OF THE BOARD OF DIRECTORS OF THE SUCCESSOR AGENCY APPROVING THE EXECUTION AND DELIVERY OF A PURCHASE AND SALE AGREEMENT BETWEEN THE SUCCESSOR AGENCY TO THE COMMUNITY REDEVELOPMENT AGENCY OF THE CITY OF COMPTON AND CLIFFORD WILLIAMS AND DELORES L. WILLIAMS IN CONNECTION WITH THE SALE OF PROPERTY LOCATED AT 408 WEST ALONDRA BOULEVARD, FINDING THAT SUCH AUTHORIZATION IS EXEMPT FROM ENVIRONMENTAL REVIEW UNDER THE CALIFORNIA ENVIRONMENTAL QUALITY ACT, FINDING THAT THE SALE OF THE PROPERTY IS NOT SUBJECT TO THE REQUIREMENTS OF THE SURPLUS LAND ACT, AND TAKING RELATED ACTIONS

SUMMARY

Staff respectfully requests the Board to adopt the attached Resolution approving the execution and delivery of a Purchase and Sale Agreement between the Successor Agency and Clifford and Delores L. Williams, the owners of Cliff's Texas Style Burritos, in connection with the sale of certain Successor Agency-owned property located at 408 West Alondra Boulevard and making certain findings.

BACKGROUND

Clifford and Delores L. Williams, the owners of Cliff's Texas Style Burritos (the "Developers"), have been operating the restaurant facility at 408 West Alondra Boulevard in the City of Compton over the past 30 years. The Developers are currently leasing the site from the Agency for the restaurant business, although the lease expired. Two years ago, the Developers submitted a proposal to the Successor Agency with the intent to purchase subject property in order to carry out improvements to meet capacity consumer demand.

Pursuant to Resolution#110, adopted on July 28, 2020, the Board approved an Exclusive Negotiation Agreement between Clifford and Delores L. Williams and the Successor Agency to negotiate the terms of a Purchase and Sale Agreement (PSA) leading to the sale of the Agency-owned property to the Developers. Accordingly, the Successor Agency staff and the Developers have negotiated the terms of a proposed Purchase and Sale Agreement (PSA) for the disposition and development of the subject property. Under the Agreement the Agency parcel will be conveyed to the Developers for the purchase price of two hundred fifty thousand dollars (\$250,000.00), which constitutes the most current fair market value of the subject site determined pursuant to an appraisal conducted on August 11, 2022.

STATEMENT OF THE ISSUE

The Successor Agency and the Developers have jointly decided to formally enter into the Purchase and Sale Agreement. By adopting the attached Resolution, the Board of Directors will approve the execution and delivery by the Successor Agency of the Purchase and Sale Agreement in substantially the form attached to the Resolution and request that the Los Angeles County Second Supervisorial District Consolidated Oversight Board approve the Successor Agency's sale of the land to the Developer as provided in the Purchase and Sale Agreement.

Staff published a notice of public hearing for two successive weeks in a newspaper of general circulation prior to the date of the public hearing. The Purchase and Sale Agreement, with attachments, and other related exhibits, were made available for public inspection in the manner set forth in Health and Safety Code Section 33433. This Resolution also contains a finding that the act of authorizing the Successor Agency to sell the property does not approve any new development or construction of buildings, nor does it authorize any new land uses and that for this reason, it can be seen with certainty that authorizing the Successor Agency to sell the property to the Purchasers pursuant to the Purchase and Sale Agreement substantially in the form presented to the Board of Directors at this meeting will not result in any significant adverse impact on the environment and is exempt from the CEQA environmental review requirements pursuant to Section 15061(b)(3) of Title 14 of the California Code of Regulations. Additionally, this Resolution contains findings that sale of the land to the Developers and the development of the project by the Developers will be conveyed to the Developer for fair market value at a purchase price of \$250,000 as contained in the Purchase and Sale Agreement.

The sale of government property is subject to the Surplus Land Act (SLA) which places certain requirements on the sale of land. However, staff determined the proposed sale of the property is not subject to the requirements of the SLA. The Surplus Land Act (Government Code Sections 54220-54234) ("SLA") provides that with respect to land that has been designated in a Long Range Property Management Plan for sale, the SLA, as it existed on December 31, 2019, without regard to the changes made to the SLA by Assembly Bill 1486, which became effective on January 1, 2020, or subsequent amendments to the SLA, shall apply to the disposition of the land if (i) an exclusive negotiating agreement for disposition is entered into not later than December 31, 2020 and (ii) the disposition is completed not later than December 31, 2022. The SLA, as it existed on December 31, 2019, did not apply to successor agencies. The Successor Agency entered into an exclusive negotiating agreement with respect to the disposition of the Property with Clifford and Delores L. Williams, dated as of August 12, 2020. Consequently, the requirements of SLA do not apply.

FISCAL IMPACT

Pursuant to the Purchase and Sale Agreement, the Agency parcel will be conveyed to the Developers at the purchase price of Two Hundred Fifty Thousand Dollars (\$250,000.00) which constitutes the most current fair market value of the subject site determined pursuant to an appraisal. Net proceeds of the sale (net of reasonable and customary closing costs) will be remitted to the County Auditor-Controller for allocation to the affected taxing entities, including the City.

RECOMMENDATION

That the Board of directors of the Successor Agency adopt the attached resolution approving the execution and delivery of the Purchase and Sale Agreement between the Successor Agency and the Developers.

ATTACHMENT A

AGREEMENT FOR PURCHASE AND SALE AND ESCROW INSTRUCTIONS 408 W. Alondra Blvd., Compton, CA

THIS AGREEMENT FOR PURCHASE AND SALE AND ESCROW INSTRUCTIONS (this "Agreement") is dated as of _____, 2022 ("Effective Date"), and is entered into by and between CLIFFORD WILLIAMS AND DELORES L. WILLIAMS, husband and wife (collectively, the "Buyer"), and the SUCCESSOR AGENCY TO THE COMMUNITY REDEVELOPMENT AGENCY OF THE CITY OF COMPTON, a public body ("Seller").

RECITALS

A. Seller is the owner of certain land located in the City of Compton commonly known as 408 West Alondra Boulevard, Compton, California, and legally described in "Exhibit A" attached hereto (the "Property").

B. Seller desires to sell the Property to Buyer, and Buyer desires to purchase the Property from Seller.

NOW, THEREFORE, in consideration of the mutual terms and covenants herein, and other consideration, the sufficiency of which is hereby acknowledged, Buyer and Seller hereby agree as follows:

1. PURCHASE PRICE; DEPOSIT.

1.1 Sale and Purchase. Seller agrees to sell the Property to Buyer and Buyer agrees to purchase the Property upon the terms and conditions hereafter set forth.

1.2 Purchase Price. The full purchase price to be paid by Buyer to Seller for the Property shall be Two Hundred Fifty Thousand Dollars (\$250,000.00) ("Purchase Price").

1.3 Deposit. Within five (5) business days after the opening of escrow under Section 4.2 below, Buyer shall make a deposit of the sum of Twelve Thousand Five Hundred Dollars (\$12,500.00), into the escrow with Escrow Holder (as hereinafter defined) (the "Deposit"). Escrow Holder shall hold the Deposit in an interest-bearing account. Upon the Close of Escrow (as hereinafter defined), the Deposit shall be credited against the Purchase Price. If the Close of Escrow does not occur as a result of a termination of this Agreement due to the failure of a condition to closing or the default of the Seller, the Deposit shall be returned to Buyer. If the Close of Escrow does not occur due to a default by Buyer, then the Deposit shall be delivered to Seller as liquidated damages under Section 1.4 below.

1.4 If Buyer breaches any obligation hereunder, and fails to cure such breach within ten (10) business days after receipt of written notice from Seller, then Seller may terminate this Agreement and the Escrow by giving notice, in writing, of such termination to Buyer and Escrow Holder, and the Deposit shall be delivered by Escrow Holder to Seller to

retain as liquidated damages for Buyer's failure to purchase the Property, as Seller's sole and exclusive remedy.

IF CLOSING FAILS TO OCCUR SOLELY BECAUSE OF BUYER'S DEFAULT, SELLER WILL BE DAMAGED AND WILL BE ENTITLED TO COMPENSATION FOR THOSE DAMAGES, BUT SUCH DAMAGES WILL BE EXTREMELY DIFFICULT AND IMPRACTICAL TO ASCERTAIN. BUYER DESIRES TO LIMIT THE AMOUNT OF DAMAGES FOR WHICH BUYER MIGHT BE LIABLE SHOULD BUYER BREACH THIS AGREEMENT. BOTH BUYER AND SELLER WISH TO AVOID THE COSTS AND LENGTHY DELAYS THAT WOULD RESULT IF SELLER FILED A LAWSUIT TO COLLECT ITS DAMAGES FOR A BREACH OF THIS AGREEMENT. IF CLOSING FAILS TO OCCUR BECAUSE OF BUYER'S DEFAULT, THEN THE DEPOSIT SHALL BE DEEMED TO CONSTITUTE A REASONABLE AND FINAL ESTIMATE OF SELLER'S DAMAGES AND SHALL BE RETAINED BY SELLER AS LIQUIDATED DAMAGES AS SELLER'S SOLE AND EXCLUSIVE REMEDY. SELLER AND BUYER ACKNOWLEDGE THAT THEY HAVE READ AND UNDERSTAND THE PROVISIONS OF THIS SECTION AND BY THEIR INITIALS IMMEDIATELY BELOW AGREE TO BE BOUND BY ITS TERMS.

THE PARTIES ACKNOWLEDGE THAT THE PAYMENT OF SUCH LIQUIDATED DAMAGES IS NOT INTENDED AS A FORFEITURE OR PENALTY WITHIN THE MEANING OF CALIFORNIA CIVIL CODE SECTIONS 3275 OR 3369, BUT IS INTENDED TO CONSTITUTE LIQUIDATED DAMAGES TO SELLER PURSUANT TO CALIFORNIA CIVIL CODE SECTIONS 1671, 1676 AND 1677. THIS SECTION SHALL SURVIVE THE TERMINATION OF THIS AGREEMENT.

2.1 General. Title to the Property shall be conveyed by a grant deed in the form attached hereto as "Exhibit B" ("Grant Deed") and shall be evidenced by a CLTA Standard Coverage Form of Owner's Policy of Title Insurance, the cost of which will be borne by Seller, or an ALTA Extended Coverage Form Policy if Buyer elects such coverage as provided in Section 2.3 hereof ("Title Policy"), the additional cost of which shall be borne by Buyer, issued by a licensed title insurance company ("Title Company") selected by Buyer, subject to the consent of Seller's City Manager, which consent will not be unreasonably withheld or delayed, with liability in the full amount of the Purchase Price, insuring title to the Property as vested in Buyer, free and clear of all liens and encumbrances and other matters affecting title to the Property, except the following (which shall constitute "Approved Title Exceptions" under Section 2.4 below):

If Buyer does not timely terminate, then the following (in addition to the matters described in Section 2.1) shall be "Approved Title Exceptions": (i) all matters in said title report and the Survey, (ii) if Buyer fails to obtain a title report, then all matters affecting title then of record, and (iii) if Buyer fails to obtain a Survey, all matters that would have been revealed or disclosed by an accurate ALTA Survey.

3. RIGHT OF ENTRY.

3.1 Seller hereby grants Buyer and its agents, employees, contractors and subcontractors (collectively "Representatives") the right of entry to the Property at reasonable times after the Effective Date and prior to the expiration of the Investigation Period, as defined in Section 3.8, for the purpose of conducting soils and geological investigation and testing for toxic or hazardous substances and other contamination. Such investigation shall be at Buyer's expense. If Buyer desires to terminate this Agreement as a result of its inspection, Buyer may do so by written notice to Seller given on or before the expiration of the Investigation Period.

3.2 Buyer shall deliver advance written notice to the Seller of its intention to enter the Property to conduct activities pursuant to this Section 3 at least one (1) business day prior to any entry onto the Property. Such notice of entry shall include the proposed dates and

times of such entry, and the nature, specific location and scope of any test, investigation, or other activity upon the Property, and shall be subject to the prior approval of the Seller which should not be unreasonably delayed or withheld. Seller and its representatives shall have the right to accompany and observe all of Buyer's and its Representatives' activities on the Property.

3.3 All work performed by Buyer and its Representatives will be performed diligently and in a manner consistent with the standards of care, diligence and skill exercised by recognized consulting firms for similar services, and in accordance with all regulatory and good management standards and the requirements of any governmental agency or entity and all applicable laws.

3.4 Buyer and its Representatives shall promptly notify the Seller of any discovery, spill, release, or discharge of any "Hazardous Materials", as defined in Section 6.4, on, under or about the Property which is discovered, encountered, or results from or is related to the Buyer's or its Representatives' access to and/or use of the Property under this Agreement.

3.5 Buyer and its Representatives shall remove from the Property any wastes and Hazardous Materials used in or generated by the activities of Buyer or its Representatives on the Property no later than the date of completion of their environmental investigation activities and operations on the Property.

3.6 In connection with the use of the Property by Buyer and its Representatives, Buyer shall, at its own cost and expense, take any necessary action to keep the Property, and any improvements and personalty thereon, in good order and repair and safe condition to the extent that such Property, improvements or personalty were in such condition prior to its entry, and the whole of the Property, in a clean, sanitary and orderly condition, including, without limitation, ensuring that any holes, ditches or other indentations, as well as any mounds or other inclines created by any excavation by Buyer or its Representatives are regraded, resurfaced and compacted. If any portion of the Property or an adjacent property, including improvements and fixtures, suffers damage or alteration by reason of the access and activities of Buyer or its Representatives on the Property, Buyer shall, at its own cost and expense, promptly repair all such damage and restore the Property or adjacent property to as good a condition as before such damage or alteration occurred, or if it cannot be repaired, Buyer shall replace such damaged or altered property to the extent possible.

3.7 Buyer agrees, at its sole cost and expense, to defend, protect, indemnify, and hold free and harmless Seller and its employees, agents, and representatives, and their successors, and assigns (individually as "Indemnitee" and collectively, "Indemnities"), free and harmless from and against any and all damages, costs, expenses, liabilities, claims, demands, causes of action, proceedings, expenses, judgments, penalties, liens, and losses of any nature whatsoever ("Claims"), including fees of accountants, attorneys, expert witnesses, or other professionals, and all costs associated therewith, arising or claimed to arise, directly or indirectly, out of, in connection with, resulting from, or related to any act, failure to act, error, or omission of Buyer or any of its Representatives arising or claimed to arise, directly or indirectly, out of, in connection with, resulting from, or related to entry upon the Property pursuant to this Section 3, except for that portion or percentage of a Claim against an Indemnitee based on the comparative negligence, gross negligence or willful misconduct of such Indemnitee.

3.8 The period from the Effective Date until and including the sixtieth (60th) day after the Effective Date shall be referred to herein as the "Investigation Period." If for any reason Buyer is not satisfied with the physical condition or legal status of the Property (including but not limited to applicable zoning and other regulatory matters and restrictions or conditions on the ability of the owner of the Property to develop the Property), Buyer shall have the right to terminate this Agreement by written notice to Seller on or before the end of the Investigation Period. Upon such termination the Deposit shall be returned to Buyer and Buyer and Seller shall be deemed to have released each other from any and all liability and obligations relating to the Property and this Agreement, except Buyer's indemnity and other obligations under Section 3.7 of this Agreement.

3.9 Notwithstanding anything to the contrary contained herein, the provisions of this Section 3 shall survive the termination of this Agreement.

4. ESCROW.

4.1 Agreement to Constitute Escrow Instructions. This Agreement shall constitute escrow instructions and a copy hereof shall be deposited with the Escrow Holder for this purpose.

4.2 Escrow Holder. The escrow shall be opened with Orange Coast Title Company ("Escrow Holder"), within five (5) business days following the Effective Date by Buyer and Seller depositing a copy of this Agreement (or copies of executed counterparts of this Agreement) with Escrow Holder. This document shall be considered as the escrow instructions between the parties, with such further instructions as Escrow Holder may reasonably require in order to clarify the duties and responsibilities of Escrow Holder. If Escrow Holder shall require further escrow instructions, Escrow Holder shall promptly prepare such escrow instructions on its usual form for the purchase and sale of the Property upon the terms and provisions hereof. Provided such further escrow instructions are consistent with this Agreement and satisfactory in form and substance to Buyer and Seller, they shall be promptly signed by Buyer and Seller within five (5) business days after delivery thereof to each party. Each of the Buyer and Seller may also provide further escrow instructions which are consistent with this Agreement to Escrow Holder. The further escrow instructions shall incorporate each and every term of this Agreement and shall provide that in the event of any conflict between the terms and conditions of this Agreement and such further escrow instructions, the terms and conditions of this Agreement shall control.

4.3 Close of Escrow. For the purposes of this Agreement, "Close of Escrow" shall be the date on which a grant deed for the Property in favor of Buyer is recorded in the Official Records of the Los Angeles County Recorder's Office. Provided all of Seller's and Buyer's obligations to be performed on or before Close of Escrow have been performed and all the conditions to the Close of Escrow set forth in this Agreement have been satisfied, escrow shall close on or before the One Hundred Twentieth (120th) day following the Effective Date (the "Closing Date"). All risk of loss or damage with respect to the Property shall pass from Seller to Buyer at the Close of Escrow. Possession of the Property shall be delivered to Buyer upon the Close of Escrow.

4.4 Buyer Required to Deliver. Not less than two (2) business days prior to the Close of Escrow, Buyer shall deposit into escrow the following (properly executed, notarized and acknowledged, if applicable):

4.4.1 The Purchase Price;

4.4.2 Costs to be paid by Buyer under Section 4.9 below; and

4.4.3 All other documents contemplated by this Agreement and required by Escrow Holder to be deposited by Buyer to carry out this escrow.

4.5 Seller Required to Deliver. Not less than two (2) business days prior to the Close of Escrow, Seller shall deposit into escrow the following (property executed, notarized and acknowledged, if applicable):

4.5.1 A grant deed conveying the Property to Buyer, in the form attached hereto as "Exhibit B" and duly executed by Seller and acknowledged (the "Grant Deed");

4.5.2 A California 593 certificate and a federal non-foreign affidavit with respect to Seller, if required by Escrow Holder; and

4.5.3 Any other documents contemplated by this Agreement or required by Escrow Holder or the Title Company to be deposited by Seller to carry out this escrow.

4.6 Conditions to the Close of Escrow. Escrow shall not close unless and until both parties have timely deposited with Escrow Holder all sums and documents required to be deposited as provided in this Agreement. The failure of a party to timely deposit any such sums and/or documents shall constitute a default by such party, subject to reasonable cure as provided in this Agreement. Buyer's obligation to proceed with the transaction contemplated by this Agreement is subject to the satisfaction of all of the following conditions precedent, which are for Buyer's benefit and may be waived only by Buyer:

4.6.1 Seller shall have performed all agreements to be performed by Seller hereunder;

4.6.2 As of the Close of Escrow, there shall have been no material adverse changes in the physical condition of the Property caused by Seller after Buyer's approval of the condition of the Property;

4.6.3 Title Company shall have issued or shall have committed to issue the Title Policy to Buyer, for the amount of the Purchase Price showing fee title to the Property to be vested in Buyer, subject only to the Approved Title Exceptions; and

4.6.4 All legal prerequisites to the sale of the Property by the Seller shall have been satisfied.

In the event that the conditions to Close of Escrow are not timely satisfied for a reason other than a default of Buyer or Seller under this Agreement, then upon termination of

this Agreement, Escrow Holder shall promptly return to Buyer all funds (and all interest accrued thereon) and documents deposited by Buyer in escrow and to return to Seller all funds and documents deposited by Seller in escrow and which are held by Escrow Holder on the date of the termination (less, in the case of the party otherwise entitled to such funds, however, the amount of any cancellation charges required to be paid by such party under Section 4.11 below).

4.7 Recordation of Grant Deed; Delivery of Funds; Delivery of Possession.

Upon receipt of the funds and instruments described in this Section 4, Escrow Holder shall cause the Grant Deed to be recorded in the office of the County Recorder of Los Angeles County, California. Thereafter, Escrow Holder shall deliver the proceeds of this escrow (less appropriate charges) to Seller. Upon Close of Escrow, Seller shall deliver possession and legal title of the Property to Buyer, free and clear of any leases or occupancies.

4.8 Prorations. All real and personal property taxes shall be prorated between Buyer and Seller as of the Close of Escrow, which in the case of taxes and assessments shall be based on the latest available tax information. Any supplemental or escape real estate taxes and assessments on the Property attributable to the period prior to the Close of Escrow shall be paid by Seller outside of the escrow. All prorations shall be determined on the basis of a 360-day year. All taxes and assessments applicable to the Property from the date of Close of Escrow and thereafter shall be the Buyer's sole responsibility.

4.9 Costs of Escrow.

4.9.1 Seller shall pay:

- (a) The premium for the CLTA Standard Title Policy;
- (b) One-half (½) of the escrow fees and reasonable and customary escrow costs; and
- (c) Any other closing costs or charges not expressly provided for herein and customarily paid by a Seller of real property in Los Angeles County, California.

4.9.2 Buyer shall pay:

- (b) The cost of recording the Grant Deed, if any;
- (c) The cost of documentary transfer taxes in connection with the recordation of the Grant Deed, if any;
- (d) The excess cost of an ALTA extended title policy, if Buyer has so elected; and

- (e) Any other closing costs or charges not expressly provided for herein and customarily paid by a Buyer of real property in Los Angeles County, California.

4.10 Broker's Commission. Buyer and Seller represent to one another that no broker or finder has been engaged in connection with the transaction contemplated by this Agreement, or to its knowledge is in any way connected with such transaction. Each party covenants and agrees that any other broker fee or commission, which may be due or payable in connection with the closing of the transaction contemplated by this Agreement through its dealings with that party, shall be borne solely by that party. Buyer hereby agrees to indemnify, defend, protect and hold harmless Seller and its employees, agents, representatives, council members, attorneys, successors and assigns, from and against all claims of any agent, broker, finder or other similar party arising from or in connection with its activities relating to the sale of the Property to Buyer by Seller.

4.11 Escrow Cancellation Charges. In the event that this escrow shall fail to close by reason of the default of either party hereunder, the defaulting party shall be liable for all escrow and title cancellation charges. INTRODUCTION

Intended User and Use of Report

This report was prepared for the user and client, Successor Agency to the Community Redevelopment Agency of the City of Compton, and other authorized parties, for internal municipality planning purposes only. This report is not intended for mortgage finance or any other users or uses.

Scope of Work

The Uniform Standards of Professional Appraisal Practice (USPAP) defines scope of work as “the amount and type of information researched and the analysis applied in an assignment.” USPAP clearly states the “burden of proof” for the scope of work decision rests solely with the appraiser(s), not the client. The scope of work includes, but is not limited to, the following:

- the degree to which the property is inspected or identified;
- the extent of research into physical or economic factors that could affect the property;
- the extent of the data research; and the type and extent of analysis applied to arrive at opinions or conclusions.

Before accepting the assignment, the appraiser(s) conversed with the client’s agent. During the conversation(s), the client’s agent implied or made the following statements, which have bearing on the scope of work decision.

Client’s Prior Engagement of (Yes - 2) Report dates 3/9/2020 &
Appraisal Services: 9/24/2021

Intended Users: The client and their agent and authorized parties

Supplemental Standard(s) Apply: None Used

Jurisdictional Exception(s) Apply: None Used

Evaluation of assignment complexity by the appraiser(s), in concert with client statements, agreements, and our inferences constitute the primary basis for establishing the appraisers’ scope of work. Elements of the scope of work are below.

Standard of Value: Fair Market Value

Complies With Reporting Requirements 2-2(a)
Set Forth in USPAP Standard Rule:

Subject Observation: Exterior Only

Highest and Best Use: Inferred Analysis

Data Verification: A combination of verification methods was used to confirm market data cited in this report. Some data was confirmed “indirectly” because we relied upon the

efforts of data reporting companies such as CoStar Group or LoopNet, multiple listing services, or other appraisers. Some data was confirmed “directly” via one or more parties with in-depth knowledge about the sale property, and/or related financial details.

Data verification affects reliability. Most of our market information is obtained from secondary sources like data reporting and title companies, multiple listing services, or other appraisers. We employ only secondary sources that we believe to be reliable. We often utilize the data as published/verified by these sources, which constitutes “indirect” verification. Whenever we suspect that more verification is needed, we will contact people who were involved, or who have knowledge of the transaction. This constitutes “direct” verification, which is more thorough. Additional data sources included, yet were not limited to, the internet, governmental agencies, demographic service companies, persons involved with the subject, appraiser files and other real estate professionals. No guaranties or warranties of the market data or information are expressed or implied. No liability or responsibility is assumed by the appraiser(s) for any inaccuracy from any seemingly credible information source.

Highest and best use analyses can be categorized into two groups - inferred and fundamental. A fundamental analysis is quantified from broad demographic and economic data such as population and income. Supply is inventoried and subject-specific characteristics are considered. Then, the relationship between supply and demand is weighed to determine a specific highest and best use for the subject. An inferred analysis uses trends and patterns to infer a general highest and best use for the subject. Market dynamics that might be considered are prices, marketing times, rents, vacancies, and listings of similar real estate. Subject-specific studies were not made during the appraisal development process.

The Scope of Work, negotiated with the client at the outset of the engagement, is the key: defining the problem to be solved by this appraisal, the intended use, the intended user(s), what value definition to use, and which appraisal approaches, techniques and methods will give us the best answer to the question. Development of the appraisal included, yet was not limited to, observation of the subject and data verification as stated above, and other steps listed below.

- consideration of influential market area, physical, economic, and governmental factors
- determination of the subject’s highest and best use(s), if appropriate
- development of three approaches to value
- reconciliation of value indications, if appropriate and,
- preparation of this report

For our purposes, all USPAP requirements are fulfilled, the depth and breadth of research and analysis, as well as the appraisal report, is a product of the Scope of Work. Appraisal development signifies the extent of the reasoning and analyses that culminates in an estimate of value. Our degree of appraisal development and reporting for the subject industrial land use

property is presumed sufficient for the levels of knowledge and experience possessed by our client (the intended user), their agents, and other authorized users. It is also assumed this report will be used only for the intended use stated herein. According to USPAP, all valuation approaches that are applicable to the interest being appraised and, that are necessary to produce credible results, must be developed. The relevance and development of each major approach is listed below.

	Applicable & Necessary (Developed)	Applicable yet Unnecessary (Omitted)	Not Applicable	Not Applicable But Included At Client's Request
<i>Cost Approach</i>			X	
<i>Sales Comparison</i>	X			
<i>Income Approach</i>	X			

The Sales Comparison and Income Approaches to value were selected for the appraisal after consideration of the type of property appraised, available market data, and the client's intended use.

Ownership/Sales and Listing History

According to public records, title to the subject property is vested in the Community Redevelopment Agency of the City of Compton, which acquired the property on 08/29/2008 under unknown circumstances. Anticipated Exposure Period

The marketability of the subject property is good at this time. Exposure time refers to the estimated length of time the property interest being appraised would have been offered on the market prior to the hypothetical consummation of a sale at a market value on the effective date of the appraisal; a retrospective estimate based on the analysis of past events assuming a competitive market. In the subject's case, the *exposure time* was estimated to be approximately three to six months.

We have also analyzed potential *marketing time* for the subject project. Our marketing time considers the current environment of demand for retail properties in the greater Southern California region and the state as a whole. We have discussed the current market with investment brokers and reviewed information published by Price-Waterhouse-Coopers, LLP, and estimate that the marketing time would fall in a range from three to six months, assuming sufficient exposure to the market.

The county is home to over a quarter of all California residents. One of the most diverse counties in the country, it is home to the nation's largest urban Native American population. Within its boundaries are most of the principal cities composing the Los Angeles metropolitan area, and is the core of the five counties that make up the Greater Los Angeles Area.

According to the 2010 census, the county has a total area of 4,752.32 square miles (12,308.5 km²), of which 4,060.87 square miles (10,517.6 km²) (or 85.45%) is land and 691.45 square miles (1,790.8 km²) (or 14.55%) is water. Los Angeles County borders 70 miles (110 km) of coast on the Pacific Ocean and encompasses towering mountain ranges, deep valleys, forests, islands, lakes, rivers, and desert. The Los Angeles River, Rio Hondo, the San Gabriel River and the Santa Clara River flow in Los Angeles County, while the primary mountain ranges are the Santa Monica Mountains and the San Gabriel Mountains. The western extent of the Mojave Desert begins in the Antelope Valley, in the northeastern part of the county. Most of the population of Los Angeles County is located in the south and southwest, with major population centers in the Los Angeles Basin, San Fernando Valley and San Gabriel Valley. Other population centers are found in the Santa Clarita Valley, Crescenta Valley and Antelope Valley.

The county is divided west-to-east by the rugged San Gabriel Mountains, filled with coniferous forests and subject to plentiful snowfall in the winter. The San Gabriel Mountains are part of the Transverse Ranges of southern California, and are contained mostly within the Angeles National Forest. Most of the highest peaks in the county are located in the San Gabriel Mountains, including Mount San Antonio (10,068ft) at the Los Angeles-San Bernardino county lines, Mount Baden-Powell (9,399ft), Mount Burnham (8,997ft), and the well-known Mount Wilson (5,710ft) where the Mount Wilson Observatory is located. Several smaller, lower mountains are located in the northern, western, and southwestern parts of the county, including the San Emigdio Mountains, the southernmost part of Tehachapi Mountains, and the Sierra Pelona Mountains.

Los Angeles County is commonly associated with the entertainment industry; all six major film studios—Paramount Pictures, 20th Century Fox, Sony, Warner Bros., Universal Pictures, and Walt Disney Studios—are located within the county. Beyond motion picture and television program production, other major industries of Los Angeles County are international trade supported by the Port of Los Angeles and the Port of Long Beach, music recording and production, aerospace, and professional services such as law and medicine.

Surroundings

The subject property is along a major thoroughfare in the City of Compton. The subject's neighborhood is bound to the east by Long Beach Boulevard, to the west by Wilmington Avenue, to the north by Rosecrans Avenue, and to the south by The Gardena (91) Freeway. The subject's neighborhood is comprised predominately of older generation single and multi-family use properties with commercial uses along major thoroughfares to provide support services to the surrounding residences. The subject's location accented by close proximity to

the Harbor (110), Gardena (91), Long Beach (710) and Glenn Anderson (105) Freeways. The subject property is located within a mile from K through 12 grade schools. Retail shops, medical and professional office buildings, and other commercial properties are located along the major thoroughfares of Central Avenue, Long Beach Boulevard, Alameda Street, Willowbrook Avenue, Compton Boulevard, and Rosecrans Avenue.

Compton remains a market largely underserved by brand name retailers. The subject's immediate surrounding neighborhood can be characterized as deficient in retail and service commercial support services. Major thoroughfares feature smaller older generation commercial uses, many beyond their useful economic lifespans, and vacant commercial land sites. An in-fill of newer retail development, especial at major intersections as with the subject, would have a positive effect, creating momentum for future growth. However, most brand name retailers look to expand into neighborhoods in which their new development would benefit from synergy with the existing successful retail product.

We have assumed, in the absence of a soils report that the land consists of reasonably solid, unfilled ground and that by following the recommendations and guidelines set forth by engineers, existing and future structures and grading will be safe from settlements under design loadings and conditions. We have not been provided with a Site Assessment report; thus, the assumption has been made that there are no current violations of environmental regulations and there is no contaminant environmental impact or impairments. We reserve the right to alter the opinions expressed within this appraisal if evidence of hazardous or toxic wastes is found upon formal inspection by qualified professionals.

A soils report of the property was not made available to us for the preparation of this report. Given the apparent physical integrity of the existing structure, this appraisal assumes that there are no unusual soil conditions that adversely impact the property. All normally required public utilities are available to the subject site. Assessed Valuation

Based upon Proposition 13, passed by the voters in June 1978, the Assessor is required to appraise real property as of the date of the change-in-ownership or as of the date of completion of any new construction. The property will be assessed on the basis of the new valuation. The assessed value then may only be increased each year by an inflationary rate not to exceed two percent (2%) per year, unless there has been new construction or a change in ownership. The maximum amount of property tax cannot exceed one percent (1%) of the property's appraised value, plus any bonded indebtedness or fees as approved by the voters. Therefore, in estimating the market value of the subject property, we have, by definition, assumed the sale of the property. Hence, existing tax information of the subject property has little impact on a potential buyer or to its appraisal. According to the Auditor-Controller the subject is in the tax rate area of #11252 with a base property tax rate of 1.6152%.

Area Calculations Summary

HIGHEST AND BEST USE

Highest and Best Use: The Appraisal Institute defines Highest and Best Use as follows: The reasonably probable and legal use of vacant land or an improved property, which is physically possible, appropriately supported, financially feasible, and that results in the highest value. The four criteria the highest and best use must meet are legal permissibility, physical possibility, financial feasibility, and maximum profitability.

Highest and Best Use of land or a site as though vacant: Among all reasonable, alternative uses the use that yields the highest present land value, after payments are made for labor, capital, and coordination. The use of a property based on the assumption that the parcel of land is vacant or can be made vacant by demolishing any improvements.

Highest and Best Use of property as improved: The use that should be made of a property, as it exists. An existing property should be renovated or retained as is so long as it continues to contribute to the total market value of the property, or until the return from a new improvement would more than offset the cost of demolishing the existing building and constructing a new one.

Highest And Best Use Analysis

In estimating highest and best use, there are essentially four stages of analysis

- (1) Possible Use (Physical). What uses are physically possible on the subject site or in the subject improvements, given the physical characteristics revealed by property analysis.
- (2) Permissible Use (Legal). What uses are permitted under existing zoning and other land use regulations and controls, and under existing deed restrictions for the subject property.
- (3) Feasible Use (Appropriate). Among legally permitted and physical possible uses for the subject property, which are appropriate given the characteristics revealed by market, and property analysis uses, which produce any net return to the owner, or positive net present value.
- (4) Highest and Best Use. Among appropriate or feasible uses for the subject property, which use will produce the highest present value.

The subject is a typical site, which is reasonably level with no known unusual soil conditions. The subject and nearby properties have been successfully developed with commercial and residential properties. Development of the subject site is therefore possible from a physical standpoint.

The legally permissible uses are determined by zoning regulations. A commercial or residential development, to the highest allowable density would conform well to the surrounding neighborhood.

There are a number of new commercial and residential projects in the area, which have been developed and marketed over the last few years. Additionally, demand for vacant land properties is well supported. This indicates that the subject is an appropriate use for the site.

Highest and Best Use of the land as though vacant: Based on an analysis of the subject site's location, zoning and land use patterns, it is concluded that the highest and best use of the subject site, if vacant, would be to hold as vacant for future development.

Highest and Best Use as improved: Based on the age and condition of the subject's existing improvements, the Highest and Best Use as improved is concluded as is for continued retail use and the existing improvements contribute substantially to the value of the underlying land.

VALUATION PROCESS

Introduction

Appraisers typically use three approaches in valuing real property: The Cost Approach, the Sales Comparison Approach and the Income Capitalization Approach. The type and age of the property and the quantity and quality of data affect the applicability of each approach in a specific appraisal situation.

Cost Approach

The Cost Approach is based on the principle of substitution under the assumption that an informed buyer would pay no more than the cost of reproducing a substitute property with the same utility as the subject property. This process involves estimating the reproduction or replacement cost new for the improvements, deducting an estimated dollar amount for accrued depreciation and adding the estimated Market Value of the land. This method is particularly applicable when the property being appraised involves relatively new improvements, which represent the highest and best use of the land or when unique or specialized improvements are located on the site and for which there exists a limited amount of comparable properties in the market.

Sales Comparison Approach

The Sales Comparison Approach is also based on the principle of substitution under the assumption of reasonable market behavior. This approach involves direct comparison of similar properties that have sold to the subject property. The data from these comparables is analyzed and adjusted for differences that are considered significant, leading to a value indication for the subject property. The Sales Comparison Approach is used to arrive at an indicated sales price per unit of comparison. In the case of the subject, the applicable unit of comparison is the price per square foot of site area.

Income Capitalization Approach

The Income Capitalization Approach is based on the principle of anticipation of future benefits and reflects the present worth of these rights accruing to ownership. These future benefits consist of annual net income that the property can generate during a period of ownership and the reversion of a capital sum at the time the property is sold. Using a market-derived capitalization rate, the stabilized net income is converted to the present value of anticipated cash flows. Provision for the investor's recapture of invested capital, as well as return on capital, is built into this capitalization procedure.

The steps necessary in this process entail estimating gross income and deducting an estimated vacancy and collection loss, thus deriving an effective gross income. Estimated expenses are then deducted to provide a projected net operating income (NOI). This NOI is then capitalized at an appropriate rate to yield an indication of value.

Reconciliation

After considering the approaches to value, we will consider the quantity and quality of the data available for examination under each of the approaches utilized, inherent dangers and advantages in each approach, and the relevancy of each to the subject property and the appraisal problem. Under the Reconciliation subheading of this report, we present an evaluation of each approach and a discussion regarding our final estimate of value.

Approaches Utilized

We have utilized the Sales Approach only in this report. Sales of existing properties similar to the subject are available for our analysis and differences are adjusted for using pair sales analysis. The Income has been omitted at the request of the client. The Cost Approach has been omitted due to a lack of relevance for smaller older commercial uses. The Sales approach via price per square foot is considered the most relevant value indication for smaller older retail use properties which are bought and sold predominately as owner/user products.

SALES COMPARISON APPROACH

Methodology

In the Sales Comparison Approach, we estimated the value of the subject by comparing it with similar, recently sold properties in the surrounding or competing area. Inherent in this approach is the principle of substitution, which holds that when a property is replaceable in the market, its value tends to be set at the cost of acquiring an equally desirable substitute property, assuming that no costly delay is encountered in making the substitution.

By analyzing sales that qualify as arms-length transactions between willing and knowledgeable buyers and sellers, we can identify value and price trends. The sold properties must be comparable to the subject in physical, location, and economic characteristics.

Valuation Analysis

The subject is included into a limited property segment of smaller, older generation commercial use properties. All sales provided reflect general similarities to the subject in location and market appeal. The financing for the sales is typical with no adjustments needed. The market analysis is predicated on sales price per square foot on building area. There is a distinct economy-of-scale influence associated with this indicator concluding an inverse relationship on value and size.

The building size adjustments are based on an economy-of-scale which has an inverse relationship between size and value with an applied adjustment of \$1sf per 100sf building size differences. Condition adjustments are based on \$15sf for slightly superior/slightly inferior to \$30sf for superior/inferior differences. Site position adjustments are based on \$5sf for corner sites compared to interior sites. Time adjustments were not necessary.

The closed comparables exhibit an adjusted sales price per square foot range from \$215 to \$248. Comparable #8, at \$248sf is considered an outlier with the remainder of the sales between \$215sf and \$237sf. The dominant influences on value are recognized in location, site size, condition, and building size. Comparable #3 and #4 were given most weight in final value determination due to recent sales dates. The subject exhibits characteristics at the mid-range of the data set with a concluded price per square foot indication of \$225/sf. After consideration of all factors, the as-is "Fee Simple" fair market value of the subject based on an August 11th, 2022 date is concluded at 1,100sf x \$225/sf = \$250,000 rounded:

**TWO HUNDRED FIFTY THOUSAND DOLLARS

INCOME APPROACH

Methodology

The Income Approach to Value consists of the methods, techniques and procedures that an appraiser uses to analyze the property's capacity to generate benefits and convert those benefits into an indication of present value. The *principle of anticipation* is fundamental to the Income Approach. In other words, value is created by the expectation of future benefits and may be defined as the present worth of these future benefits.

In the Income Approach, the subject property's potential gross income is first estimated. From this figure a vacancy loss and collection reserve are deducted to arrive at the effective gross income. All expenses accruing to ownership are then deducted from the effective gross income to reach the net operating income. The net-operating-income figure is then capitalized into a present value estimate.

Subject Leasing Status

The subject property is a single-tenant configured retail property currently occupied by a single tenant. The subject is leased on a month-to-month basis on modified gross terms. The subject's rental rate and terms were provided verbally by the client in lieu of tenant signed lease or estoppel. This report is completed under the extraordinary assumption that the tenant provided subject rental information is valid. The use of this extraordinary assumption may have an effect on value.

Modified gross basis includes owner responsibility for property taxes, property insurance, exterior maintenance, water/sewer utilities, management, repairs, and reserves; the tenant is responsible for interior maintenance and all utilities.

#408	1,100sf	Retail	Month-to-Month	\$1.50/sf	\$1,650/Modified Gross

Rental Revenue Projection

Based on our comparison study, the subject's units are common for the market. The subject's layout, construction appeal, features, and general amenity package are standard for the market.

As reflected in the performance of the subject's project and in the performance of the confirmed comparable rentals, the demand of this local market appears very strong. Market participants including agents and property managers indicated that rental rates in the subject's market have increased over the past two years.

The subject's forecast rental income of be \$1,650 per month or \$19,800 annually includes a market rental rate for the retail space for all spaces. In considering the performance of the local rental market, the subject's current/past performance, and the avoidance of in advantageous vacancy and associated expenses, an adopted forecasted rent level of \$1,650 per month or \$19,800 annual gross rent collection is adopted based on full occupancy.

Vacancy and Collection Loss

Investors and appraisers are primarily interested in the annual revenue and net income the property is likely to produce over a specified period, rather than the income it could produce if it were always 100% occupied and all tenants were paying their rent in full and on time. It is normally a prudent practice to expect some income loss as tenants vacate, fail to pay rent, or pay rent late.

The subject is currently 100% occupied and the properties featured in our rent survey provide support for this level of market demand. Compton is popular for renters, especially in buildings of this segment, located within the general vicinity. In our view, a stabilized market vacancy and collection loss factor of 5.0% is appropriate for the subject property.

Stabilized Expense Estimate

No acknowledged historical performance documents were submitted for this analysis. For the purpose of this analysis, expenses will be forecast based on market. The estimated expenses are based on market data and review of competing buildings in the general marketplace.

Real Estate Taxes:

Please note that real estate taxes have been based on our estimated value times the local tax rate, which is 1.6152% as an effective tax rate not including direct or special assessments. Based on a projected value of \$235,000 a corresponding annual base tax rate of \$3,796 is adopted.

Property Insurance:

Fire, earthquake, and extended coverage as well as liability, and rent loss coverage are included. The subject insurance costs have been forecasted at about \$0.65 per square foot or \$715 annually based primarily on several expense comparable and other published information.

Utilities:

Utility expenses are projected to be paid by occupying tenants. During periods of vacancy estimated at 5%, ownership incurs all utility expenses, which are considerably smaller than a tenant operating a business. During these vacant periods, utility costs are covered through reserves.

Management:

Typically, management fees are based on a percentage of rent collected. Based on our investigation, we have applied a management fee equivalent to 3.5 percent. The result of this calculation is \$658 based on projected effective gross revenue, or \$0.60 per square foot annually. This expense category includes not only off-site management, but also accounting fees, legal, professional, and other administrative tasks not reimbursed by the tenant.

Maintenance/Repairs:

Maintenance for the subject property based on current configuration is estimated at \$60 per month, or \$720 annually. This includes landscaping and general janitorial. Repairs are estimated at \$500 annually. Total concluding \$1,220 annually.

Supplies/Reserves/Replacement Items:

Supplies are estimated at \$300 annually. Reserves are based on \$0.26/sf (gross building area) annually, or \$286. Replacement items are estimated at \$200 annually. Total concluding \$786 annually.

Miscellaneous (Advertisement/Legal):

Typically, these fees are associated with the long-term leasing of the subject and legal services associated. This cost figure is based on a typical prorated share concluded at \$1,000.00.

It was necessary to expand the search perimeters to include sales, which vary moderately in building size, and competing trade areas. In our selection of an overall capitalization rate for the subject project, we have considered the age of the structure, location, the quality of construction, and condition of the improvements. Also considered in overall capitalization rate selection is the subject's rental income forecast at market rates, influencing selection of a rate toward the upper end of the range. Considering foregoing factors, we have estimated an overall capitalization rate of 4.50 percent for use in our capital value analysis of the subject property. This analysis is presented on the following page.

Value Estimates

Presented below is a summary of the value indications derived from the various approaches to value.

Cost Approach	N/A
Sales Comparison Approach	\$250,000
Income Capitalization Approach	\$235,000

The subject is a retail use property. Based on the type of property being valued, the Cost Approach was considered irrelevant and omitted from the analysis. Please refer to the Valuation Process section for a detailed explanation of the exclusion.

The subject is included into a limited property class of smaller, older generation retail use properties. These properties are purchased overwhelmingly as owner/user interests with The Sales Approach via price per square foot the most relevant indication of value. The Income Approach provides a secondary and supportive value indication but has been given no weight as the subject is on month-to-month tenancy and would be suitable for an owner occupancy. Weighing all factors, the final estimate of “As-Is” Fee Simple Fair Market value as of August 11th, 2022 for the subject property is concluded at:

TWO HUNDRED FIFTY THOUSAND DOLLARS
