

Request to Intervene- Docket No. 137-CE-212

We, Jennifer Todd and Paul Todd, request permission to intervene in the project under consideration by PSC, Docket No. 137-CE-212. We currently own a business along the preferred proposed route. ATC's proposal would substantially affect our day-to-day business. The preferred proposed route would add two towers to our property and would reduce our usable space. Also, the preferred route would require an additional easement which would limit our future growth plans.

I believe the fourteen day timeline to respond to the Notice of Proceeding was unreasonable given the date that the notice was given (12/19/24). We are a seasonal business, and our office closes for the two weeks around Christmas and the New Year. Also, to expect property owners, legal representation of property owners, and the public to respond during this Holiday time is unreasonable.

Please consider accepting my petition to intervene,

Paul and Jennifer Todd
