---

### Nature Of Opinion

**Docket Number:** E-00000A-25-0069

**Docket Position:** Against

I oppose data center load growth and water use until such time as the ACC and/or AZ Legislature has policies in place that require all new generating capacity must be clean renewables. Arizona is one of the states most strongly affected by the global climate change disaster and we are also the state with the greatest solar energy resource. Arizona has a strong absolute advantage for developing and exporting clean solar power that everyone wants. Arizona should be building a strong economy by capitalizing its advantage for inexpensive solar and wind power.
