Louisiana Public Service Commission
Attn: Kris Abel
PO Box 91154
Baton Rouge, LA 70821-9154

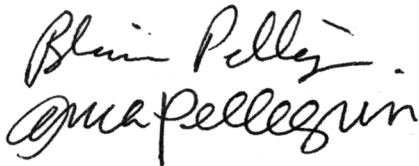

I am writing to request to be a late intervenor on Docket U-37394 and to be added to the service list. I am directly affected by SLECA's request to abandon electrification, as I am a camp owner at 326 Lake Mechant in Terrebonne Parish, Dularge, LA. We lost electricity at our camp following Hurricane Ida.

We purchased our camp in 2020, fulfilling a lifelong dream of having a fishing retreat where we could bring family and friends. We made significant investments in the camp, including lifting the structure. The loss of power has profoundly impacted our family's experience. We now incur increased costs as we rely on alternative sources for lighting, cooking, and heating, which were previously provided by the camp's electricity. This includes considerable expenses for gas, generators, ice, ice chests, and the physical help needed to bring these necessities.

We bought this camp with the intention of enjoying God's beauty and incredible nature of Dularge. It's still so beautiful, but the constant and loud hums of camp generators were never a part of that dream.

Thank you for your time.

Sincerely,

Handwritten signatures of Blaise and Erica Pellegrin in cursive script.
