Eclectic Nature

Fighting Fish

Eclecticism is about combining or mixing different styles, theories or ideas to gain complementary insights into a subject or topic. We transferred this approach onto a coin which depicts a vibrant Fighting Fish.

This species is known for its bright, beautiful coloration and elaborate fin displays. What makes this piece eclectic? Well, on the other hand we have split it into two halves with a mirrored proof finish on one side and silk black finish on the other, giving this coin a stark contrast. The fighting fish itself is set on top of this in ultra-high relief and colorized with an incredibly high level of sophistication which perfectly matches the different backgrounds.

Seven Summits

Elbrus

With a height of 5642 m (18510 ft.) Mount Elbrus is the most elevated summit in the Caucasus mountain range and the highest mountain in Russia.

This 6th edition of the **Seven Summit series** impresses with our enhanced smartminting® technology and a refined coloring that shows the heavily glaciated, dormant volcano in all its beauty. The detailed topographical relief, in 5 oz silver, is a reminder of how ambitious the first ascent must have been in 1874. The ultra-high relief extends well above the surface of the coin.

Evolution of Life

Hominidae

In this edition of the Evolution of Life series, we meet one of our oldest ancestors – Paranthropus. This “Grand Dad” of mankind is now featured on an impressively detailed smartminting® high relief coin. It is supplemented by an Oldowan stone which is a prehistoric tool that dates back to the early stone age. The shimmering rose-gold-plated bones on an antique finish rock background make this coin a perfect addition to your collection. All previous releases of this series are sold out and we expect this one to go extinct as well!

Evolution of Life

Paranthropus

In this edition of the Evolution of Life series, we meet one of our oldest ancestors – Paranthropus. During the Quaternary period, an era dating back roughly two and a half million years and continuing to this day, several phases of glaciation (commonly known as ice ages) changed the climate and sea level to such an extent that they had a lasting impact on the global environment. These variations led to a rapid evolution in life. An example of this was the evolution of Hominidae or Hominins, the family of ancient apes which we evolved from. Paranthropus is one of our earliest ancestors to use tools and fire and became extinct around 600,000 years ago as other species of Hominins gradually took over.

Meteorite Impacts

La Ciénega

It was a sunny day when the geologist Hugo Lino was prospecting for gold near the abandoned mining community of La Ciénega in Sonora, Mexico on January 30th, 2014. He could not believe when he found a 6.1 kg fusion crusted meteorite.

This coin is the 17th edition of this award-winning series. As always and as a signature feature, a real piece of this meteorite is embedded in the coin but for time in a different and extraordinary way. In a series first, the meteorite is shown going into the edge of the coin as if the coin was liquid silver when the meteorite hit it! The meteorite is now an integral part of the coin!

Into the Wild

Bear

It's time to enter the wilderness and pristine nature. This 2 oz silver proof coin captures a wild bear in his natural environment with Mountains, Lake, Birds and Trees. But the clue is that the bear's "neighborhood" is not displayed in the background as often seen, but on its body. This is done by using the possibilities of the enhanced smartminting® technology and creating an impressive combination of **layered minting and sophisticated printing**. With its large 50 mm diameter, you are able to see every detail in remarkable clarity. Enjoy this extraordinary way to build a peaceful and natural picture.

American Alligator

What happened here? Where is the person fishing in the Everglades? Maybe we are too late and the satisfied alligator already had its lunch and left the fisherman's hat as a proof of his meal. Possibly, we are not a witness of a terrible accident, but maybe just a symbolic way to show that peaceful and respectful coexistence of man and wild animals is possible. You get to decide the story!

The situation is captured on this impressive coin in a special way as you have two perspectives above and below the water surface. Ultra-high relief on both sides and a sophisticated coloring bring this scenario to life in two different perspectives.

Four-leaf Clovers

Ounce of Luck 2022

That's what we call a CIT Evergreen as the first Ounce of Luck has been issued more than 10 years ago. It is released on a yearly basis so it is noteworthy that the 2022 rose gilded edition features a slightly reworked design that stays true to the series' history while offering a delicate and modern new look.

As a collector coin, an investment, a lucky charm or a gift – the clover leaf coin is always a particularly charming eye-catcher! Since its start every single coin in this series has been fitted with a real four-leaf clover.

Four-leaf Clovers

Clover Gold Shape

The first mention of the four-leaf clovers bringing good luck was back in 1620 by Sir John Melton. They are quite rare to find with only 1 in 5000 being the lucky four-leaf variety. This coin is sure to not only bring luck but good fortune. A golden lucky charm in four-leaf clover shape with a silk finish. Although just 0.5 g smartminting® enables a large diameter of 13.92 mm which makes it a perfect gift.

Silver Charms

Rosy Horseshoe

Earlier this year we released the Antique finish shaped version of a horseshoe. This numismatic lucky charm was an instant success. The use of a horseshoe as a symbol of good luck dates back to early times when horses played an integral part in the life of many people. They were originally made of iron, a material that was believed to ward off evil spirits. But there is no doubt that this shaped 1 oz rose gilded silver lucky charm with country style ornaments and Silk finish is the perfect gift. Only 999 will be struck. Yippie-Ya-Yeah!

Gilded Charming Tiger

Earlier this year we released the latest editions of the Lunar Year Collection. 2022 will be the year of the Tiger. Especially the shaped charming Tiger was very well received from the markets so we decided to add a gilded version. It is struck in one ounce of fine silver with a Silk finish and shows the charming tiger as a **three-dimensional numismatic sculpture**.

Its design reflects the grace of a wild animal but also the charm of a soothing cat. The tiger is minted in a way that allows it to stand freely on its own which makes it an ideal display and conversation piece. This makes the tiger a perfect desk ornament or gift for anyone born in 1950, 1962, 1974, 1986, 1998 or 2010.

Scarab King Tut

With this stunning shaped coin, CIT combines the symbol of a scarab beetle with one of the most famous Pharaohs to ever live, Tutankhamun. **His tomb opening celebrates its 100th anniversary in 2022.** In ancient Egyptian religion, the god Ra whose eye is also depicted on the obverse together with the Ankh or Key of Life, is seen to roll the sun across the sky each day, transforming bodies and souls.

Thanks to the enhanced smartminting® technology this is a numismatic piece of art in a 1 oz silver ultra-high relief with an integrated crystal from Swarovski. It is decorated with two names of Tutankhamun in hieroglyphene style. His own individual name and his title as a Pharaoh which was also found on his throne when it was discovered 100 years ago.

Iron Maiden

The Number of the Beast

Let's talk about metal. Heavy metal.

This coin is dedicated to Iron Maiden who are considered one of the most influential and successful heavy metal bands in history with over 100 million sold albums.

"The Number of the Beast" **released in 1982** became the band's first album to top the UK Albums Chart and reach the top 40 of the US Billboard 200. It was also controversial, particularly in the United States, due to the religious references in its artwork and the title track's lyrics. This 1 oz silver piece features the original album cover. The Obsidian Black finish matches perfectly with the strong impressive artwork from its colored illustrations. Fans will love it.

Steampunk

Jet Pack

Following the wave of enthusiasm unleashed by the first issue of our Steampunk coin, we are thrilled to announce the next masterpiece of the series. This one, like its predecessor, astounds with lots of details, surreal elements and hidden allusions to the famous author Jules Verne. Good luck in finding them! The scenario on this piece of art could be a busy train station in a mountain village with different means of transportation including a jet pack which might be part of our mobility system in future.

The unique look derives from our refined smartminting® ultra high relief technology and its selective gilding contrasting elegantly with an antique finish background. **The coin is limited to only 888 pieces worldwide.**

Real Heroes

Firefighter Kilo Edition

The 2021 “Real Heroes” Firefighters are tributes to not only those who gave the ultimate sacrifice during 9/11, but to all Firefighters that we count on to keep us safe. There is no better way to conclude this range than with a crowning finale – a Kilo Edition.

This Black Proof issue features a stunning, realistic image of a Firefighter from the New York City Fire Department. The number 343 on the helmet honors the Firefighters that were lost that day in the Twin Towers. The visor that protects his eyes from the dangerous smoke and gases is a unique overlay that makes a coin in this dimension an impressive emotional eye-catcher.

Tiffany Art Metropolis – Paris

Notre-Dame Gold

What comes into your mind when you hear Notre-Dame? The architectural building which partly burnt down two years ago? The Story of the famous hunchback? Or nice memories of your last trip to the city of love? In the last Winter Launch CIT has released its new Tiffany Art Metropolis series focusing on cities and their famous buildings. Now we continue with two extraordinary editions which highlight the legendary cathedral of Notre-Dame.

The artful purple Tiffany style glass is beautifully integrated in the design and the ultra-high relief showcases every detail of the cathedral in an impressive way.

Hunters by Night

Eagle Owl

The second edition of the Hunters by Night series is a tribute to one of nature's finest predators – the Eagle Owl. Alongside the ultra-high relief in enhanced smartminting® technology, the intense, glistening eyes of the feathered beast pierce the deep black night, which is achieved in a very realistic way by our **exclusive Obsidian Black finish**. So little light is reflected off of this ultra-black finish that it requires you to view the piece at just the right angle to fully see all the incredible detail the coin possesses.

The first edition of this series, the Black Panther, was released last year and was an instant worldwide success. So watch out, before another hunter snatches this lifelike collectible right from under your nose, as there are only 888 pieces available.

Silver Burst

The human body is an amazing work of art. This incredible proof not only showcases that, but it also reminds all of us how fragile we can be. With all of the Information, facts, opinions, images, and news that we are bombarded with on a daily basis, this coin begs the question ... how much can the human vessel hold before it breaks? The coin interprets this dilemma of limited human capacity in a modern and abstract way. The effect of a bursting body is depicted in an artistic way with a stunning combination of proof areas and ultra-high relief elements.
