## Peaks

## K2

K2, the monumental 3rd mountain of the «Peaks» series, proudly stands within the Karakoram range as Earth's 2nd highest peak, yielding only to the mighty Mt. Everest. The mountain's formidable presence was first unveiled to the world in 1856 by Colonel T.G. Montgomerie of the Survey of India. It owes its numerical name K2 to Montgomerie's erroneous assumption that the peak was «only» the second highest within the Karakoram range. In the annals of mountaineering history, the first bold attempt to climb K2 took place in 1902. To their misfortune, without success. However, in 1954, an Italian expedition, defying ferocious weather, saw the triumph of Achille Compagnoni and Lino Lacedelli, as they reached the summit via the Abruzzi Ridge on July 31st. Yet, K2 remains an enigma, shrouded in perilous storms that thwart many from reaching the top. Only the toughest alpinists dare to climb one of the world's most challenging mountains.

It soars with impressive grandeur and an iron spire, reaching a staggering height of 330 meters above the rooftops of Paris. The creative genius behind this monumental work was the esteemed bridge builder,

Gustave Eiffel, whose extensive knowledge of the behavior of metal supports and arches culminated in this impressive marvel. Surrounded by sparkling lights at night and majestic splendour by day, the Eiffel Tower offers a breathtaking panoramic view of the enchanting, renowned city of Paris. This free-standing coin captivates with the discreet city map of Paris in the background, an exceptionally high relief on both sides and the superbly detailed steel framework of the tower.

## Legends

# Wild West

In the 4th edition of the «Legends» series, we venture into the untamed Wild West. Amidst this captivating chapter in history, three individuals stand out.

Wild Bill Hickok, the legendary gunslinger and gambler, was hailed as one of the early heroes of the West. Also renowned for his charm, persistent rumours suggest an intimate connection with the notorious yet enigmatic frontierswoman, Calamity Jane. According to legend, Wild Bill met his end at a poker table in Saloon 10 in Deadwood. The hand he held at the time of his murder forever etched in history as the «Dead Man's Hand». Billy the Kid, depicted in the center, became infamous as both a gunslinger and cattle rustler. His brief yet eventful life included at least nine murders and a daring prison escape.

Furthermore, the coin is endowed with a variety of special features. On the reverse, the «Dead Man's Hand», the saloon's name and the bullet of the gun that sent Wild Bill to the afterlife are depicted next to the three heroes. Depending on the specification, the number of dots on the dice varies, while on the obverse the coat of arms is tilted and curved to the outside, integrated in the sheriff's star.

## Historic Instruments

# Armillary Sphere

The armillary sphere, the 2nd issue of the «Historic Instruments» series, is an early marvel of astronomical ingenuity. In its complex form, this remarkable device elegantly captures celestial and terrestrial circles. With the Earth at its center, this celestial globe is equipped with degrees for angular measurements. During the 17th and 18th centuries, such splendid contraptions graced the parlours of academics, suspended in the air, perched upon ornate stands, or clutched by an elegant handle. The armillary sphere was allegedly invented separately in ancient China during the 4th century BC and ancient Greece during the 3rd century BC.

Peter Carl Fabergé

# Imperial Coronation Egg

Allow us to delight with the tale of the «Imperial Coronation Egg», a remarkable masterpiece crafted by the gifted Peter Carl Fabergé. This splendid creation marks the 5th edition of this extraordinary series and exudes the opulence of a bygone era. In 1897, this Fabergé marvel was presented as a gift to the last Russian Tsarina of the Romanov dynasty in homage to the resplendent golden robe she wore during her coronation. Crafted from a medley of multicoloured gold, adorned with dazzling diamonds, and graced with delicate Guilloché ornaments, this egg embodies the elegance of its time. Today, this treasure, with a worth of approximately 18 million dollars, is in possession of Victor Vekselberg and is residing in the Museum of St. Petersburg, where the «Imperial Coronation Egg» captivates the hearts of all who visit. But there is yet another exquisite secret concealed within the original – a detailed miniature replica of the coronation carriage.
