3 OZ SILVER

# Aztec Empire

Cuauhtémoc, the last ruler of the Aztecs, was a symbol of unwavering resistance when Tenochtitlan fell – and he showed the world what it means to fight to the end. In 1521, he led the city's defense against the Spaniards under Hernán Cortés. The mighty jaguar warriors, clad in magnificent skins, and the imposing eagle warriors who watched over the battlefield fought alongside him. These elite warriors were the strongest in the Aztec army, distinguished by their magnificent armor and impressive helmets.

These brave warriors are depicted on the coin with their characteristic symbols: the jaguar warrior with his magnificent fur and the eagle warrior, surrounded by majestic feathers. The eye-catcher of this proof coin is the partial gilding of the feather jewelry and breastplate on the 3 oz edition.

The reverse of the coin also makes a powerful impression. It reveals the majestic Templo Mayor, a central sanctuary of the Aztecs where rituals were held to preserve cosmic harmony. In artistic high relief and framed by the Aztec solar calendar, the coin tells of a time long past when honor, sacrifice and cosmic balance defined the world.

## STEAMPUNK

# Science Lab Kilo Edition

Following the success of the 3 oz edition, we present a larger version with an impressive weight of 1 kilogram limited to only 88 pieces. The ever popular and highly acclaimed «Steampunk» series continues to fascinate with its 4th edition, which offers a veritable playground for the curious mind. Amid shelves of weathered books and potions, we meet a dashing scientist tinkering with devices and ideas, whose knowledge is only rivaled by his splendid moustache.

Amongst the numerous characters in this scene, we also come across the series' regular – the penny-farthing. This time ridden by a rat with a distinguished fashion taste, navigating past screws, pipes, and tools on the workbench. The «Science Lab» – where Victorian elegance meets scientific marvels.

FABERGÉ EGGS

# Lilies of the Valley Egg

With the «Lilies of the Valley Egg» we are celebrating the 6th edition of this remarkable series. The impressive effect of this proof silver coin is created by a combination of gold plating and detailed coloring. This egg was given by Tsar Nicholas II to his wife, Tsarina Alexandra Fyodorovna, for Easter in 1898. The egg is covered with a pink-colored enamel guilloché and decorated with miniature lily flowers made of diamonds and pearls. The egg epitomizes Fabergé's characteristic combination of luxury and nature themes. The design of the Lilies of the Valley egg is strongly inspired by the Art Nouveau style that was popular in Europe at the time. Today, the egg, which has an estimated value of around 18 million dollars, is owned by Victor Vekselberg and is open to the public in the museum in St. Petersburg.

#30685

# Dice

Part of the popular «Golden Highlights» series, the dice coin represents the exciting game of life. Sometimes you must metaphorically «roll the dice» without knowing what the result will be. It shows that every decision, big or small, is left to chance. But it is also your responsibility to be brave and take that chance. Dice embody the thrilling mix of luck and risk that makes life so exciting and unpredictable. So the question begs to ask...

«Are you feeling lucky?»

#30686

# Elephant

Elephants are impressive animals that inspire us humans in many ways. Their size and grace combined with their strength, their gentle yet strong nature, their remarkable family cohesion and their extraordinary memory are just some of the characteristics that amaze us.

## BRILLIANT LOVE Infinity

The central element of the coin is an eternity symbol that stands for the timeless nature of love. The overall image is framed by delicate, pastel-colored flowers, creating a romantic and playful touch. A special feature of this coin is the integrated crystal, which not only creates a sparkling effect, but also emphasizes the importance of clarity and purity in relationships. The combination of the infinity sign, the floral elements and the crystal makes the Brilliant Love coin a suitable gift for various occasions.

UNDERLOOK

## Under-Dog

Andrius Burba photographs animals from below. It sounds a bit crazy, but it looks fun and is more of a challenge than you might think. It all started with cats and a glass plate. The success of the pictures was not long in coming, because the perspective was new and exciting and so Andrius stuck to the basic concept.

Since the previous release in the series, «Under-Cat», was a great success, this newest issue was once again created in collaboration with Andrius himself. Not only the special view of the dog, but also the detailed minting, combined with realistic coloring is impressive, making an attractive collector's item – not just for dog lovers!

HUNTERS BY NIGHT

# Ocelot Kilo Edition

Building on the success of our 2 oz edition, we're excited to introduce a larger version weighing an impressive 1 kilogram and limited to only 77 pieces. Emerging from the shadows, the ocelot claims the 5th spot in the «Hunters by Night» series. This master of stealth similar in size to bobcats inhabits dense forests and shrublands, stretching from southern Texas to northern Argentina in South America. As a nocturnal hunter, the solitary ocelot depends on its sharp vision and keen hearing to hunt rodents, snakes, fish, frogs, monkeys, and birds. It does not have teeth appropriate for chewing, so it tears the food to pieces and swallows it whole.

The Obsidian Black finish contrasts strikingly with the wild cat's lifelike eyes, creating an intense glowing effect.

## 万里长城

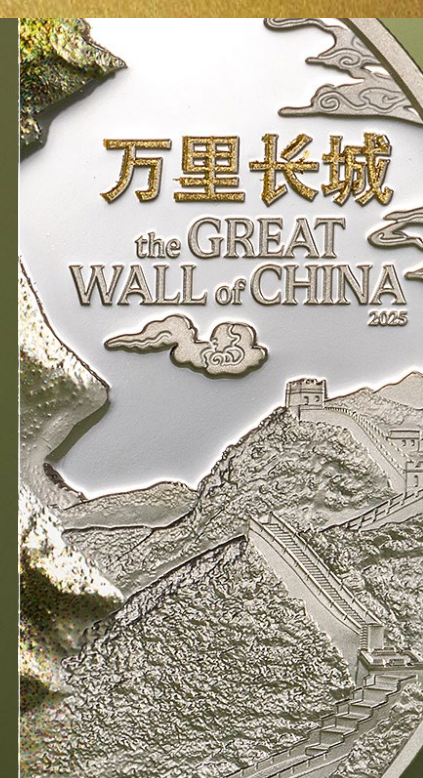

# The Great Wall of China

Long ago, when the Great Wall protected China from the fierce winds and its northern invaders, brave traders walked along these ancient paths in search of new adventures and trading opportunities. This stunning 3 oz silver coin masterfully captures its fabled heritage. On one side, the wall rises in an impressive 8 mm high relief thanks to our smartminting® technology. The engraving 万里长城 (Wànlǐ Chángchéng), which means «ten thousand miles long wall», is a symbol of the boundless strength and durability of this ancient defense system. In addition to the relief, the design itself also impresses with its color applications and the fact that the wall is depicted with partial gilding.

But that's not all! The reverse of this extraordinary coin conceals a real treasure from times gone by: the old Cash coin, once a symbol of prosperity, luck and wisdom. This antique coin representation is carved with the traditional «Lù» symbol, which stands for wealth and good fortune. It is framed by a majestic feng shui dragon, which watches over harmony and wisdom in skillful relief. The filigree Cash coin is gold-plated, which further emphasizes the timeless significance of the symbols depicted.
