

Who we are

CliniShift is an e-resourcing software suite providing an information, communication platform which enables healthcare managers to reach out to their own internal staff to ensure non-scheduled shifts are filled at short notice. It encompasses both the CliniShift App and the CliniShift Manager. Our algorithms produce powerful request queues based on staff members' booking patterns and their engagement with the app.

CliniShift's broadcast functionality enables managers to send out short bulletins of information to groups of staff. CliniShift is a disruptive technology that was designed to challenge the current over reliance on outside agency staff.

CliniShift Manager

The CliniShift Manager web portal is fully integrated with the CliniShift smartphone app. Staff can share their availability to work additional shifts up to 3 months in advance. It allows managers to easily identify when and where to deploy resources, isolating and eliminating pain points within the organization.

What type of organization can avail of the CliniShift Manager?

[Acute Hospitals and Health Systems](#) | [Senior Living](#) | [Skilled Nursing facilities](#) | [Home Care](#) | [Hospice Care](#) | [Ambulatory sites](#) | [Physician practices](#)

CliniShift App

The CliniShift App is free to download on iOS and Android smartphones by all staff in any healthcare organization. Once approved by a manager or staff administrator, candidates may share their availability, accept or reject direct shift requests or apply to work open shifts.

Who can avail of the CliniShift App?

[Nurses](#) | [Doctors](#) | [Admin staff](#) | [Allied Health Professionals](#) | [Non-Clinical Staff](#)

CliniShift[®]

Staff members can effortlessly browse vacancies within their organization.

This enables staff to easily book extra shifts and communicate with their managers on the go, allowing them to focus on what matters most to them, their work.

CliniShift Manager -

Communication

Send out queued requests to targeted groups based on availability. Shift details are easy to extract for weekly and monthly payroll.

Schedule Builder

Edit and share permanent roster hours which can be published to the CliniShift App in staffs smartphone

Broadcast

Send out bulletins of information relating to quick changes in protocols as well as updates to a staff member's department.

Credentialing

Manage staff credentialing & mandatory CPD documents using our integrated credentialing tool.

CliniShift App -

Alert

Receive notifications to your smartphone when a new shift request has been sent.

Messaging

This allows staff to communicate directly with their manager in relation to both upcoming and historical shifts booked on CliniShift.

Sync

Booked shifts will appear in staff members native calendar app notifying them when they are due to be in work 24 hours and 3 hours beforehand.

Timesheets

Staff can sign off on hours worked and query time and attendance through the app.
