TerraMater®

Stylish and cost-effective, the LinWood Oak collection offers excellent savings without compromising on quality or appearance.

Crafted from premium grade European Oak, each top layer (lamella) is bonded with Swedish Dynea glue to a multi-ply core with a tongue and groove joining system, then finished with German Klumpp coating for a superior finish.

A great choice for floating and direct stick installation, the LinWood collection is a durable, versatile option for the floors (or walls!) of your home, retail or office space.

Prestige - The best of the best; only select graded timber from premium grade logs is chosen for Terra Mater.

Natural beauty - The advanced invisible UV lacquers create a natural look that will retain your floors for years to come.

Convenience - With advanced anti-static Klumpp coatings, our floors maintain a superior cleanability that save you time and effort.

Good to the planet - Our select timber is sourced only from managed plantation forests and emits incredibly low VOC emissions.

Size: 1860 x 190 x 12mm (2mm top)
