The new Uno mattress collection, combining comfort with our advanced technology for better quality sleep.

Adaptive® technology works to keep you comfortably cool and dry to improve the quality of your sleep. It wicks away moisture and increases evaporation helping to regulate your body temperature.

Hycare® is an anti microbial treatment that offers protection against house dust mites helping to prevent the development of a concentration of allergens, which can cause allergic reactions.

Fresche® Bioscience fights bacteria, fungi and odour and also inhibits house dust mites. The anti microbial treatment prevents long lasting protection for a clean and safe sleep environment.
