

100% waste

Designed and manufactured with the planet in mind

Made from
waste
product

from factory + **100%**
recycled HIPS
polymer sourced
from the UK.

NO
virgin material
is used

No deforestation
needed
to grow 'eco'
materials.

Biodegradable Polymers
for a new generation

rHIPS.b biodegrades

Marine

Landfill

**NATURALLY
BIODEGRADES**

Home

Unlike other popular bioplastics, like PLA, this polymer

**DOES NOT require
UV or temperatures
of above 50°C**

to create an environment for the polymer to biodegrade.

Biodegradable Polymers
for a new generation

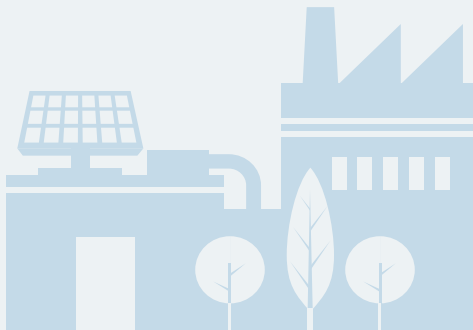

It doesn't leave a trace

**Biodegradation
occurs by friendly
microbes fully
digesting the
polymer**

Biodegradable Polymers
for a new generation

All that is left is rich
biomass + water

It's all home grown

Our rHIPS.b
products are

**made using
recycled
materials**

from the UK...

**...in our UK
based factory**

**And distributed from
the UK to wherever it
needs to go.**

**Meaning less air
miles and
more smiles.**

Biodegradable Polymers
for a new generation
