

THE STATE OF THE STATES
Agricultural Land Conversion Highlight Summary

Connecticut

Farms Under Threat: The State of the States mapped agricultural land conversion and evaluated state policy responses. The spatial analysis identified the extent, diversity, and quality of each state's agricultural land—and where this land has been converted to both urban and highly developed (UHD) and low-density residential (LDR) land uses.

AGRICULTURAL LAND CONVERSION 2001-2016

Conversion of non-federal farmland to UHD and LDR land uses from 2001-2016. The threat to working farms and ranches is pervasive, often claiming the most productive, versatile, and resilient lands.

 Conversion of agricultural land to UHD and LDR land uses	<p>Farmland* that is:</p> <div style="display: flex; justify-content: space-between;"> <div style="text-align: center;">  Above state median PVR** </div> <div style="text-align: center;">  Below state median PVR </div> </div>	<div style="display: flex; justify-content: space-between;"> <div style="text-align: center;">  Urban areas </div> <div style="text-align: center;">  Federal, forest, and other lands </div> </div>	<p>*Farmland is composed of cropland, pastureland, and woodland associated with farms.</p> <p>** Our productivity, versatility, and resiliency (PVR) index helps identify high-quality agricultural land (see page 2).</p>

DEVELOPMENT THREATENS CONNECTICUT'S AGRICULTURAL LAND

From 2001-2016, 23,000 acres of agricultural land were developed or compromised.

Connecticut's farmland and ranchland was converted to:

- **Urban and highly developed (UHD)** land use, including commercial, industrial, and moderate-to-high-density residential areas.
- **Low-density residential (LDR)** land use, where scattered large lot development fragments the agricultural land base and limits production, marketing, and management options for the working farms and ranches that remain.

LDR PAVES THE WAY FOR FURTHER DEVELOPMENT

Agricultural land in LDR areas in 2001 was

5 TIMES MORE LIKELY

to be converted to UHD by 2016, compared to other agricultural land.

9,100 acres

40%

of conversion was to UHD

13,900 acres

60%

of conversion was to LDR

CONVERSION AFFECTED ALL TYPES OF AGRICULTURAL LAND

CROPLAND: 5,600 acres
PASTURELAND: 6,900 acres
WOODLAND: 10,500 acres

CONNECTICUT'S BEST AGRICULTURAL LAND IS UNDER THREAT

We used our unique **PVR index**, which quantifies the productivity, versatility, and resiliency of agricultural land, to identify:

1. **Connecticut's best land**, which has PVR values above the state median, and
2. **Nationally Significant land**, which is the country's best land for long-term production of food and other crops. **52%** of Connecticut's agricultural land, or **180,600 acres**, falls in this category.*

Protecting high-PVR land is critical for the long-term sustainability of agriculture, yet from 2001-2016:

- ▶ **11,400 acres** of Connecticut's best land were converted to UHD and LDR uses.
- ▶ **11,500 acres** of Connecticut's Nationally Significant land were converted.

*These two categories overlap and the same land may be included in both.

What's at stake?

- ▶ **347,100 acres of agricultural land remain¹**

CROPLAND: 113,200 acres
PASTURELAND: 63,000 acres
WOODLAND: 171,000 acres

- ▶ **\$580.1 million earned from cash receipts in 2017²**

- \$66.9 million from local food³
- \$248.4 million from agricultural exports⁴

- ▶ **23,000 acres were converted—enough land to generate \$38 million in annual revenue²**

- ▶ **Connecticut's top 3 agricultural products:²**

- Nursery and Greenhouse \$298.4 million
- Milk and Dairy \$81.0 million
- Vegetables \$40.6 million

- ▶ **9,800 producers and 12,600 farm laborers on 5,500 farms²**

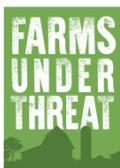

- ▶ **3 times as many producers over 65 as under 35 years old²**

2. National Agricultural Statistics Service 2017

3. Sold directly to consumer and intermediate outlets, NASS 2017

4. Economic Research Service 2017

Farms Under Threat is American Farmland Trust's multi-year initiative to document the status of and threats to U.S. farmland and ranchland and to identify policy solutions to ensure the protection and conservation of America's diverse agricultural landscape. For more information about AFT, visit www.farmland.org. If you have any questions about the analysis methods or would like access to data, please contact AFT's Farmland Information Center: www.farmlandinfo.org or (800) 370-4879.
