About us:

Curious Thing is a Sydney-based conversational AI company building Digital Interviewer solutions. Powered by state-of-the-art Machine Learning and NLP technologies, our vision is to deliver next-generation hiring solutions with true intelligence and scalability.

As a very experienced and highly effective founding team, we're building a great company with three simple philosophies:
- A simple business model with truly scalable product offerings
- A strong, unified business and technology vision with disciplined execution
- A small and highly aligned team to conquer the unknowns together

About this role:

We are looking for a highly skilled Site Reliability Engineer to join our team. As an SRE, you will play a critical role in building and maintaining a rock-solid backbone for our platform; ensuring the availability, stability and scalability of our technology. You will collaborate closely with other tech team members to manage code releases and deployments. You will be responsible for CI/CD pipeline automation, infrastructure, platform monitoring and support.

As an early employee you may be entitled to company ESOP.

We are located in North Sydney with easy access to public transportation and we have a flexible working arrangement.

About you:

- You are a sharp problem solver. You are resourceful and ingenious in finding elegant solutions to challenging problems;
- You have demonstrated working experience in SRE roles supporting distributed SaaS platforms;
- You are familiar with microservices, serverless software architecture and containerisation technologies;
- You have good working experience with Docker and Kubernetes;
- You have good working experience with building and automating CI/CD pipelines;
- You have good working experience with cloud computing platforms which may include Google Cloud, AWS or Azure;
- You are very comfortable working with shell commands and scripting;
- You have experience with infrastructure as code;
- You have working experience in building monitoring and alerting measures for a platform to ensure production availability and reliability;

- You enjoy working in a high-performance culture with a small team of high-achieving peers;
- You take immense ownership of your work;
- You are highly autonomous and highly functional under minimal supervision;

talent@curiousthing.io if you believe that you are a right fit. We would love to meet you.
