PART# 51180

Echo[®] is the first Bluetooth-enabled brake controller that wirelessly connects to the driver's smartphone to control and monitor all trailer brake activity. With a custom-designed app, it allows the driver to monitor the trailer brakes, make adjustments and receive status updates right from his or her own device.

- Wireless, portable design allows for easy transfer from one vehicle to another
- Triple-axis, motion-sensing accelerometer for highly responsive, smooth stops
- Stores multiple vehicle-trailer profiles
- Potted circuit board is sealed off from the elements for lasting durability
- Retention strap and locking tab help keep Echo[®] firmly installed into 7-way
- Operates 2-4 trailer brakes at a time (1-2 axles)

Easy plug-and-play installation

Insert Echo[®] between the vehicle-trailer 7-way RV blade connectors

Download the app and configure your vehicle-trailer profile settings to tow
