

STEEL TRANSFER TANKS

INDUSTRY-
FIRST DESIGN

SMOOTH
FINISH

PRESSURE
TESTED

New UWS combo steel transfer tanks feature a unique dual construction. Rather than the built-in tool box being made from steel, it is constructed from aluminum, making the entire unit lighter than full-steel models. This helps keep unnecessary weight off the truck.

UWS steel transfer tanks are also available in L-shaped and rectangle styles, in a variety of capacities. Each has a smooth finish in black or white powder coat for a clean look.

Unique Steel-Aluminum Combo Tanks

- Steel tank with aluminum box for less weight than full-steel models
- .080" thick aluminum tool box is lightweight and non-corrosive
- Patented RigidCore™ foam-filled lid to maximize strength

All Tanks

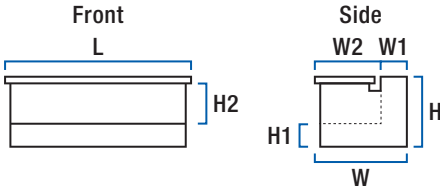

- Transfers diesel or other non-flammable liquids to on-site vehicles or equipment
- Unique, smooth finish offers a sleek look compared to diamond plate
- Heavy-duty 14-gauge steel tank for max strength and durability
- Lockable, commercial-grade vented cap and built-in drain plug
- Two built-in lifting hooks for easier relocation
- 100% pressure-tested for safety
- Available in a black or white powder coat finish
