SEMA 2016

JEEP ONE-PIECE BUMPERS

For ultimate functionality on the trail, the one-piece bumper features a winch and shackle rating of 12,500 lbs. and high-strength, all-steel construction. Front and rear bumpers mount with no drilling required for a custom fit on the Jeep Wrangler.

JEEP MODULAR BUMPER UPGRADES

The ARIES Jeep modular bumper has been upgraded with new corner end caps to accept LED lights, a stinger attachment to add protection for the winch and new D-ring shackles for tow straps, adding a customized, trail-ready look.

JEEP ROOF LED MOUNTING BRACKETS

The new ARIES Jeep roof LED mounting brackets allow an LED light bar up to 50" long to be mounted above the windshield. The brackets are constructed from welded, powder-coated stainless steel for maximum rust resistance.

JEEP HOOD LED MOUNTING BRACKETS

The new Jeep hood LED mounting brackets install easily using factory mounting points and accept an LED light bar up to 20" long. The brackets will not interfere with the windshield sprayers, and they are constructed from stainless steel.

JEEP ROOF CARGO BRACKETS

These brackets are the perfect way to add storage space to the Jeep Wrangler. They feature a no-drill, quick release system for easy installation, and they are made from strong, welded steel with a durable carbide powder coat.

JEEP INNER FENDER LINERS

ARIES inner fender liners mount with our Jeep fender flares and provide ultimate protection for the engine compartment against mud, water and debris. They are built from welded aluminum to strong and rust-free.

JEEP HEAVY-DUTY SPARE TIRE CARRIER

The Jeep HD spare tire carrier is built to mount an oversized tire, featuring an adjustable third brake light and strong, welded steel construction. It is designed to replace the factory door hinges with heavy-duty hinges and requires no drilling.

LED LIGHT BARS AND LIGHTS

Light up the trail with new ARIES LED light bars and lights with Cree bulbs. We offer single-row and double-row lights bars, ranging from 4" up to 50" long, and we offer flush-mount LED lights in sets of two. Hardware and wiring included.

ADVANTEDGE™ LED CENTER FLANGE

The AdvantEDGE™ bull bar sets itself apart with a modern, angular design and all-aluminum construction. This year, we are setting it apart even further with an all-new center flange option, featuring integrated LED lights.

HEADACHE RACK FOR COLORADO / CANYON

This headache rack has an all-new design, made specifically for the Chevy Colorado and GMC Canyon. It features a modern, angular frame of extruded aluminum, an octagonal grid center section and a durable powder coat finish.

ROCKER STEP EXPANSION

ARIES 3" rocker steps offer extra rocker panel protection, a convenient step up and plenty of off-road ground clearance. This year, we have expanded our vehicle coverage beyond Jeep, offering applications for several new pickups.

SEAT DEFENDERS™ - XL AND CARGO

Seat Defender™ is a use-as-needed seat protection system that is easy to install, remove, clean and store. This year, we have added two new models, including an XL bench seat for full-size pickups and a versatile cargo area blanket.

ADVANTEDGE™ TIE-DOWN ANCHORS

These new tie-down anchors attach to the top-edge track system of the AdvantEDGE™ headache rack. They provide multiple holes for cargo straps and are highly adjustable with an easy-to-operate threaded knob.
