ELASTICSEARCH

A search engine? For analytics? Seriously?

KIBANA

Yeah! I know! For logs analysis with logstash!

```
# Launch Elasticsearch
$ bin/elasticsearch -f

# Add Twitter river: https://github.com/elasticsearch/elasticsearch-river-twitter/
$ bin/plugin -install elasticsearch/elasticsearch-river-twitter/1.3.0

# Start river
$ curl -XPUT localhost:9200/_river/twitter/_meta -d '{
  "type" : "twitter",
  "twitter" : {
    "user" : "dadoonet",
    "password" : "seriously?"
  }
}'

# Install Kibana and open it in a browser
$ bin/plugin -install elasticsearch/kibana
$ open http://localhost:9200/_plugin/kibana/
```

DEMO TIME
