

NMB Website Site Plan and Inventory

Last updated: 4-2-2014

President Obama's Open Government Directive of December 8, 2009, requires Federal executive departments and agencies to take specific actions to implement the principles of Transparency, Participation, and Collaboration. Web pages established to implement these principles are given in the first section of the following Inventory table. Section 207(f) of the E-Government Act of 2002 requires each Federal agency to develop an inventory of information already online or to be published on their Web sites, establish a schedule for publishing information, and make schedules available for public comment. The table below identifies existing Website content and other items planned.

If you have suggestions for additional information that should be made available, please send an email to Helpdesk@NMB.gov.
