Ucho Planter

The *Ucho Planter* is a minimalist plant pot with sculptural loop-style handles, designed to bring a handmade ceramic look to your 3D prints.

- **Inner diameter (100% scale):** 98 mm
- **Design features:**
  - Built-in drainage holes for healthy roots
  - Matching tray to catch excess water
  - Double side handles (“ucho” = “ear” in Czech) for a playful, modern look
  - Textured surface finish when printed with fuzzy skin
- **Best for:** indoor plants like Monstera, Philodendron, Pothos, and other foliage favorites.

The design pairs beautifully with matte or textured filament in earthy tones, giving the feel of stoneware or clay while remaining lightweight and durable.

Print Instructions (for makers)

- **Scale (100%):** inner diameter = **98 mm**
- **Layer height:** 0.24 mm
- **Infill:** 8–12% gyroid
- **Fuzzy skin:** enabled
  - Mode: contour
  - Point distance: 0.4
  - Thickness: 0.4
- **Seam alignment:** “scarf” seam → contour + hole
- **Supports:** none required
- **Tray only:** wall lines = 4

💡 The fuzzy skin gives the planter its organic, ceramic-like texture.

Materials I used:

Bambulab Matte PLA - Latte Brown + Dark Brown
