Lunari Easter Bunny

These Easter bunnies came from a small collaboration between me and my mom - **@mumi3dprint**.

The bunny has an airy ribbed structure that gives it a soft, almost paper-decoration look while still being fully 3D printed. It works nicely as a small standing decoration, but it can also be turned into a hanging ornament.

A small stick is included in the set - it's meant to **push through a ribbon**, so you can easily hang the bunny on branches, gifts, or Easter arrangements.

Filaments in the photos: Panchroma Matte PLA Sakura Pink, Artic Teal, Pastel Banana.

Included Files

- Easter bunny model
- Small ribbon stick

The stick is designed for ribbons with **6–10 mm thickness**.

Size

50 mm × 102 mm

Recommended Print Settings

- Layer height: **0.2 mm**
- Supports: **No supports needed**
- **Slow down the volumetric print speed if you are struggling with quality**

⚠️ **Important:**
Please keep the **original orientation on the print bed**.
The model was oriented this way to ensure proper cooling on the ears.
