

I am...

A vertical garden with built-in irrigation and lots of special features :)

Your plants need water—not too much and not too little. That's where I come in. I provide the plants in the pots with exactly the right amount of water, evenly and consistently, over a long period of time. I take care of them for a whole week; only then do you need to refill my water reservoirs :) Arrange me however you like! 2, 3, or 5 plants, big or small—it doesn't matter. Be creative! Because I can handle anything, and every plant gets the same attention. Thanks to my modular design, my water reservoirs are incredibly versatile—you'll be surprised!

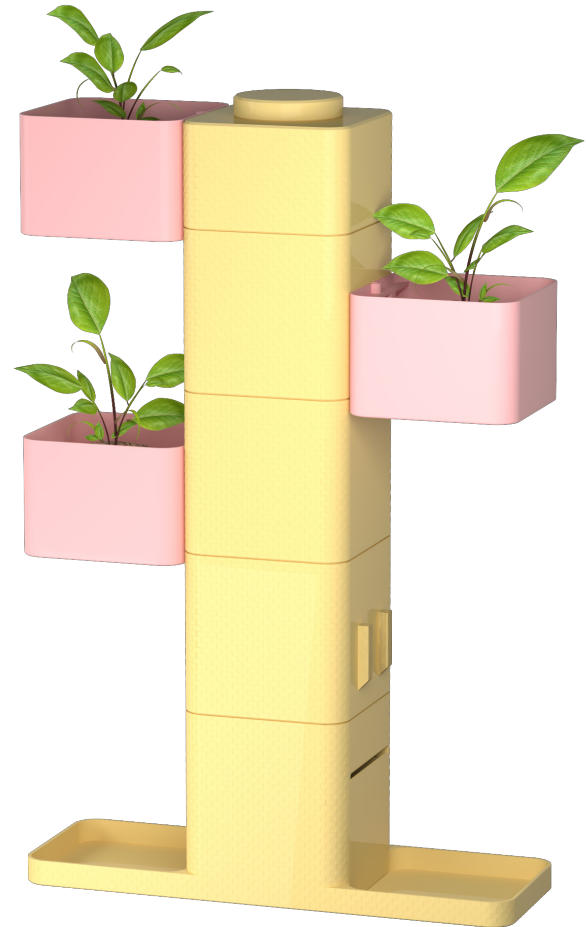

My Key-Facts

- 🚰 Consistent and regulated water supply for the plant
- 🚰 Continuous watering for 7 days or more
- 🚰 Modular and customizable
- 🚰 Super easy to set up and ready to use right away
- 🚰 No electricity or other accessories required
- 🚰 Even water distribution across all levels of the tower
- 🚰 Weatherproof
- 🚰 I'm stylish :) Place me on the balcony, in the living room, or in the office

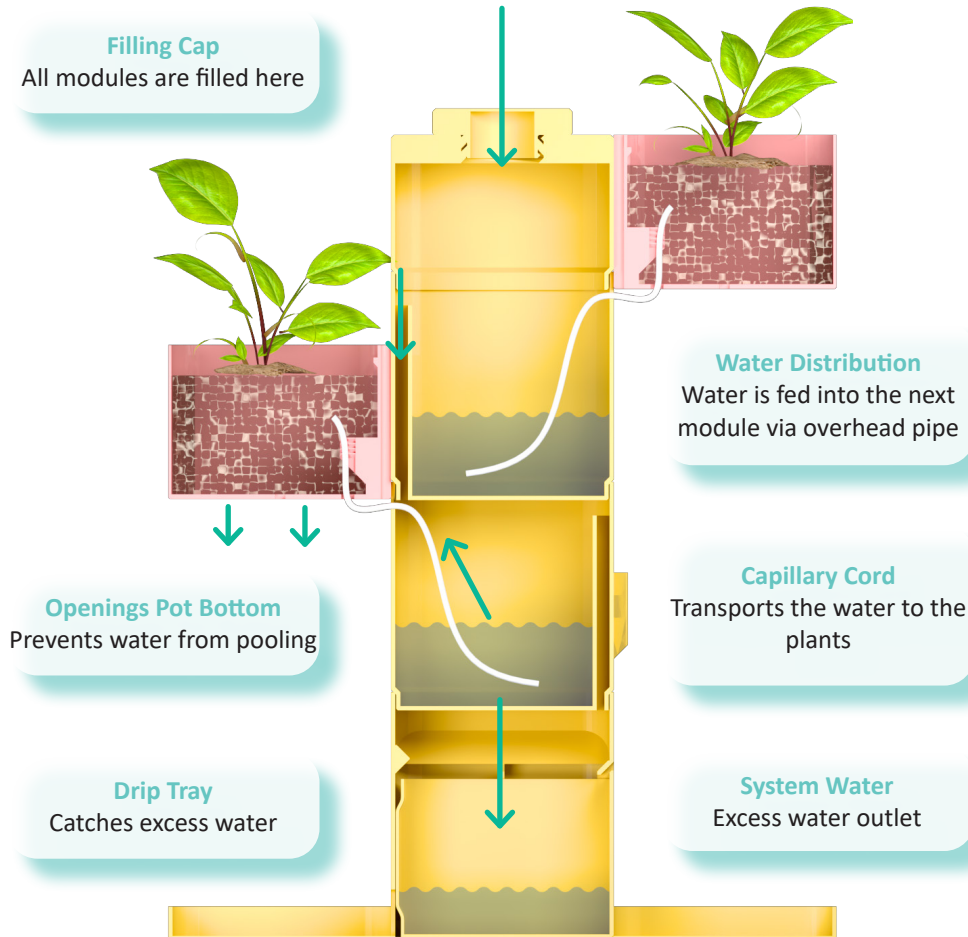

Features

- 🌱 No electricity
- 🧩 Modular
- ♻️ Sustainably produced
- 💧 Automatic watering
- 🎨 Stylish

Works thanks to a sophisticated irrigation system
Customize your system to suit your needs
Only one material. Everything is 3D-printed
Plants with continuous water supply
A refreshing design for your favorite spot

Filling Cap
All modules are filled here

Water Distribution
Water is fed into the next module via overhead pipe

Capillary Cord
Transports the water to the plants

Openings Pot Bottom
Prevents water from pooling

Drip Tray
Catches excess water

System Water
Excess water outlet

Stack it your way :)
