MOSS BUDDY - Moss Pole Starter Pack

This starter pack is designed for climbing plants that need gentle structure and consistent moisture.

The modular system lets you start small and grow taller over time. Simply stack additional modules as your plant grows.

The integrated 120 ml dripper slowly distributes water directly into the moss core, helping aerial roots attach and thrive.

Material in the photos: Polyterra Matte PLA Muted Green + Peanut Brown

What's Included

Main Module

- Total height: 244 mm
- Stacking height: 234 mm
- Diameter: 50 mm

Stem Extension

- Working height: 100 mm

Dripper Tank

- Capacity: 120 ml
- With lid
- Designed for slow water release

Clips (4 sizes included)

- For stems up to approx. 14 mm diameter

Moss Requirement

You will need approximately **10–12 g of dry sphagnum moss per module**.
Lightly pre-moisten the moss before filling for best results.

Recommended Use

- Suitable for planters from approx. **11 cm diameter**
- Maximum recommended height: **70 cm (3 stacked modules)**
- Ideal for pothos, philodendron, monstera and other climbing plants
- Fill with sphagnum moss for best root attachment

Print Instructions

General Settings (All Parts)

- Layer height: **0.2 mm**
- Infill: **15% gyroid**
- Supports: **No supports required**

Tank / Dripper Settings (Important for Watertightness)

- Wall lines: **4**
- Seam position: **Rear (back)**

Using 4 wall lines helps prevent water from seeping into the print walls and ensures proper watertight performance.
