🧼 SINUSIA – Wave Soap Dish

A modern, wavy soap dish with a soft, fluid shape inspired by gentle ripples. Designed for both function and aesthetics — keeping your soap elevated while adding a subtle touch of color to your bathroom or kitchen.

🧩 Options

- **Version 1: With *pre-printed legs***
- **Version 2: With *grooves for silicone feet (8 mm)***
- **Version 3: With *grooves for silicone feet (10 mm)***

Choose the version that best fits your setup — silicone legs add grip and lift, while printed legs make it a fully 3D-printed piece.

📐 Dimensions

130 × 87 × 23 mm

🖨️ Print Recommendations

- **Material: PETG recommended (for better washability and resistance to moisture) – PLA is also an option**
- **Layer height: 0.2 – 0.24 mm**
- **Walls: 4**
- **Wall generator: Arachne**

- **Seam position: Back**
- **Top/Bottom surface pattern: Concentric**
- **Brim type: Outer and inner brim**

💡 **Note:**
When printing with PETG, make sure the bed is well-cleaned (3DLac or glue stick helps). Adding a brim prevents edges from lifting or deforming during printing.
