TRIANDIS Ribbed 3D Printed Table Lamp with Four Legs – Mid Century Modern LED Lamp for Bambu Lab LED Lamp Kit 001

Bring a warm, sculptural glow into your space with **TRIANDIS**, a **3D printable ribbed table lamp** designed for the **Bambu Lab LED Lamp Kit 001**. This modern tabletop lamp features a softly pleated cylindrical lampshade, clean vertical ribbing, and a raised four-legged base for a minimal, decorative look.

The ribbed lampshade diffuses the LED light beautifully, creating a cozy ambient glow while keeping the design clean and modern. The contrast between the soft bone white shade and warm dark brown legs gives the lamp a calm **mid century modern** style that fits perfectly on a bedside table, shelf, desk, sideboard, nightstand, or reading corner.

This model is a great choice for anyone looking for a **3D printed lamp**, **Bambu Lab LED lamp kit project**, **ribbed lampshade**, **modern table lamp**, **vase mode lampshade**, or **decorative LED table lamp**.

USA Link: https://amzn.to/4nMBFNH

Dimensions

Lampshade: 174.5 × 174.5 × 180 mm
Legs: 109.3 × 109.3 × 123 mm

Materials Used in Photos

Lampshade: Bambu Lab Matte PLA – Bone White
Legs / base parts: Bambu Lab Matte PLA – Dark Brown

Print Instructions

Lampshade — Vase Mode Only

The lampshade **must be printed in vase mode / spiral mode**. This is required for the model to print correctly as a thin translucent shell.

Without the correct vase mode settings, the shade may print like one solid block instead of a thin lampshade.

Required Lampshade Settings

Spiral vase: Enabled
Smooth vase: Enabled
Bottom shell layers: 5–6
Outer wall line width: 0.5–0.65 mm

This setting may also be called **Spiralize Outer Contour** in some slicers.

A wider outer wall line width helps make the lampshade stronger, even when printing with a standard 0.4 mm nozzle.

Important Lampshade Note

Do not print the lampshade with regular solid or infill settings. If vase mode is not enabled, the model may print like one solid block instead of a thin translucent shell.

Legs and Remaining Parts

These parts are printed normally.

Layer height: 0.2 mm
Infill: 8–15%
Infill pattern: Gyroid
Supports: No supports needed
