TWINIA Planter

The **TWINIA** planter brings together clean lines and soft vertical texture. It's designed for people who love combining plants and propagation in one simple setup.
You can use it as a regular planter, or as a planter-propagator combo with the optional glass tube holder on the side.

There are **two versions** of the model:

- one **with a slot for the propagation holder**
- and one **without it**, if you prefer a clean, simple look.

The holder fits a **20 mm diameter, 150 mm tall glass tube** — you can either use a standard one or print your own from **clear PETG**.

USA link: https://amzn.to/4mPdVaa

EU link: https://amzn.to/4mKyJPJ

The planter itself has a **drainage system** with holes in the bottom and comes with a **matching saucer** to catch extra water.

Dimensions

- Outer diameter: **136 mm**
- Inner diameter: **124 mm**
- Glass tube: **Ø20 × 150 mm**

Planter and tray settings:

- **Layer height:** 0.24 mm
- **Infill:** 8–12% (Gyroid)
- **Supports:** None
- **Wall lines (tray):** 4

Tube settings (clear PETG):

- **Layer height:** 0.2 mm
- **Mode:** Vase mode (smooth vase)
- **Line width (outer wall and top):** 0.6 mm
- **Extrusion multiplier:** 1.04
- **Volumetric speed:** 6–11 mm³/s (slow for clarity and layer adhesion)
