TWINIA V2 – Minimalist Planter with Propagation Tube Holder

TWINIA V2 is a refined evolution of the original TWINIA design, reworked with a softer, more minimal look and a simpler propagation tube holder system.

The gently wavy surface gives the planter a calm, sculptural presence, while the matching tray completes the form with a subtle, cohesive base. The detachable tube holders are reduced to their most essential shape - easy to use, unobtrusive, and fully optional.

Designed for **glass propagation tubes with a 20 mm diameter** (tested with 150 mm tall tubes), the holders allow you to grow cuttings directly alongside your plant while keeping the overall look clean and minimal.

USA link: https://amzn.to/4mPdVaa

EU link: https://amzn.to/4mKyJPJ

Use it as a standalone planter or add the tubes when you want to propagate.

Filaments in the photos: Bambulab Matte PLA Bone White, Latte Brown, Desert Tan + Bambulab PLA Marble

Medium

- Diameter: 127.5 mm
- Height: 128.5 mm

Large

- Diameter: 150 mm
- Height: 148.5 mm

Print Instructions

- **Layer height:** 0.2 – 0.24 mm
- **Infill:** 8–12% (gyroid recommended)
- **Supports:** Not required

Part-specific settings

Tray (for watertight result)

- **Wall lines:** 4–5
- **Top/bottom layers:** minimum 6
- These settings help ensure the tray is **fully watertight**

Propagation Tube Holders

- **Wall lines:** 4
