^a Only included appliances were tested. Run times and power ratings for appliances sold separately come from manufacturer ratings or standard estimates.

d Lighting full battery run time estimates do not account for mobile phone charging or other auxiliary loads; the run time is defined as the time until the output is 70% of the initial, stabilized output.

| LIGHTING DETAILS | | | | | | | | | |
|------------------|-----------------|--------------------|---------|-------------------|--|------------------|------------------|-------------------|--------------------------------|
| Lamp name | Number of lamps | Number of settings | Setting | Light output (Im) | Lumen efficacy ^e (Im/W) | CRI ^f | CCT ^g | Distribution type | Lumen maintenance ^h |
| Main Lamp | 1 | 3 | Super | 320 | 160 | 82 | 5100 | Wide | 99% |
| Secondary Lamp | 3 | 3 | Super | 110 | 160 | 82 | 5100 | Wide | 99% |

^e Lumen efficacy is the power consumption at a light point during the light output test.

^b Without any other loads used during the run time

^c Based on an example use profile with all of the appliances listed in the "Used in combination" column used simultaneously.

^fColor Rendering Index. An index of 100 is equivalent to viewing objects in daylight; above 80 is considered good.

^g Correlated Color Temperature in degrees Kelvin. Describes color appearance as warm (2700-3000 K), cool (3000-5000 K), or daylight (>5000 K)

^h Percent of the original light output that remains after 2,000 hours of run time
