THE GDELT PROJECT

RUSSIA FACES DOMESTIC CRISIS & REPRESSION AS UKRAINE SECURES LONG-TERM WESTERN MILITARY COMMITMENTS

DAY-AT-A-GLANCE: Internal Russian stability strains under infrastructure strikes and a widening crackdown, while Ukraine formalizes advanced defensive coalitions and production rights.

RUSSIA'S INTERNAL STRAIN & REPRESSION (CHAOS & CONTROL)

SYSTEMIC FUEL CRISIS & INFRASTRUCTURE FAILURE

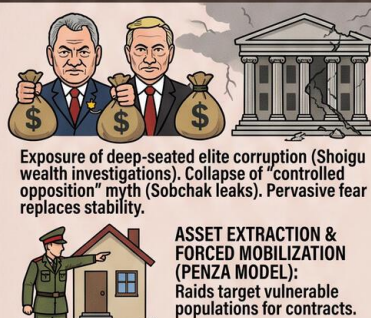

- Ukrainian drone strikes trigger nationwide fuel crisis. Processing hits 20-year lows.
- Kremlin prioritizes military logistics over civilian needs.

STATE REPRESSION & "TOTAL CONTROL"

- Escalating militarization of workforce.
- Arrest of moderates like Boris Nadezhdin ("extremist symbolism").
- Suppression of environmental activism (Kurgan uranium protests).

ELITE CORRUPTION & ERODING SOCIAL CONTRACT

Exposure of deep-seated elite corruption (Shoigu wealth investigations). Collapse of "controlled opposition" myth (Sobchak leaks). Pervasive fear replaces stability.

ASSET EXTRACTION & FORCED MOBILIZATION (PENZA MODEL):
Raids target vulnerable populations for contracts.

UKRAINE'S EXTERNAL STRENGTH & COALITIONS (INTEGRATION & PRODUCTION)

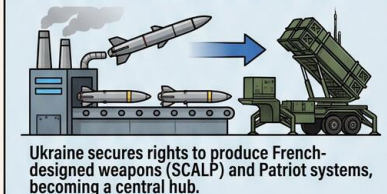

GEOPOLITICAL FORMALIZATION & DEFENSIVE COALITIONS

"FREYA" ANTI-BALLISTIC MISSILE COALITION

- Nine European nations led by Ukraine & France bridge capability gaps.
- Shift toward indigenous production and European-wide defensive integration.

WESTERN MILITARY PRODUCTION & LICENSING

Ukraine secures rights to produce French-designed weapons (SCALP) and Patriot systems, becoming a central hub.

ECONOMIC ISOLATION & SANCTIONS WARFARE

EU finalizes 21st sanctions package. Aims to tighten oil price cap, undermining Kremlin's remaining financial capacity.

UN REPORT **INTERNATIONAL ACCOUNTABILITY:**
Russian military blacklisted for systematic sexual violence and torture.

STRATEGIC FORESIGHT & GLOBAL POSTURE

RUSSIAN TRAJECTORY:
Institutional Decay, Manual Regulation, "Siege Economy"

State rapidly depletes strategic reserves, doubles down on internal coercion.

UKRAINIAN TRAJECTORY:
European Defense Autonomy, Technological Integration

Ukraine positioning as a central manufacturing hub for continent's new security architecture.

THE OUTLOOK: A CLASH OF SYSTEMS.

An isolated, extracting autocracy cannibalizing its future to maintain a "victorious" facade vs. an integrated, technological democracy consolidating long-term Western support.

TODAY'S MEDIA TRENDS

CURRENTTIME

JULY 14, 2026

RUSSIA FACES A DOMESTIC FUEL CRISIS AND ESCALATING STATE REPRESSION AS UKRAINE SECURES LONG-TERM WESTERN MILITARY COMMITMENTS AND ADVANCED DEFENSIVE COALITIONS.

DAY-AT-A-GLANCE

The internal stability of the Russian Federation is showing signs of severe strain as systemic infrastructure vulnerabilities converge with a widening crackdown on dissent. Persistent Ukrainian drone strikes on Russian refineries (NPZs) have successfully triggered a nationwide **fuel crisis**, forcing the Kremlin into a defensive posture where it must prioritize military logistics over civilian needs. Experts now warn of a [long and heavy chain](#) of economic consequences, including surging inflation, industrial contraction, and potential failures in the agricultural harvesting cycle. This economic deterioration is being met not with reform, but with **escalating militarization** of the workforce and aggressive recruitment tactics targeting vulnerable populations and students.

In the geopolitical arena, the conflict has entered a phase of long-term formalization.

Ukraine has achieved significant diplomatic milestones, securing licenses to produce **French-designed weapons** and spearheading the "Freya" anti-ballistic missile coalition, signaling a shift toward indigenous production and European-wide defensive integration. Simultaneously, the European Union is moving to finalize its **21st sanctions package**, which aims to tighten the oil price cap to as low as \$44 per barrel, a move that would fundamentally undermine the Kremlin's remaining sovereign financial capacity.

Internally, the Russian state has moved into a "total control" phase, characterized by the arrest of moderate political figures like **Boris Nadezhdin** and the systematic suppression of local environmental activism in regions like Kurgan. The exposure of deep-seated **elite corruption** (symbolized by the Shoigu wealth investigations) and the alleged compromise of "independent" media figures like Ksenia Sobchak highlight a collapsing "social contract" where the state's "Potemkin village" of stability is being replaced by a climate of pervasive fear and manual administrative control. The convergence of these factors suggests a state that is rapidly depleting its strategic reserves while doubling down on internal coercion to survive.

MAJOR DEVELOPMENTS

- **Systemic Degradation of Russian Oil Infrastructure:** Successful Ukrainian strikes on the Salavat and Afipsky refineries have exacerbated a fuel crisis that is no longer localized but national in scope. Official [refinery statistics](#) are being classified as "state secrets" as processing volumes hit 20-year lows.

- **Emergence of the "Freya" Defensive Coalition:** Nine European nations, led by Ukraine and France, have launched a new [anti-ballistic missile program](#) to bridge existing capability gaps, while Ukraine has secured production rights for Patriot systems and SCALP missiles.
- **State-Sanctioned Human Rights Atrocities:** A new UN report has officially placed the Russian military on a [blacklist](#) for systematic sexual violence and torture, with documenting evidence of over 310 verified cases used for interrogation and punishment.
- **Elimination of Potential Political Competition:** The arrest of Boris Nadezhdin on charges related to "extremist symbolism" effectively removes the last visible moderate voice from the upcoming [parliamentary election](#) cycle.
- **Uranium Mining Conflict in Kurgan:** Local resistance to the "Dobrovolnoye" uranium deposit has been met with **anti-terrorism** charges against activists, highlighting the state's prioritization of strategic resources over regional environmental safety.

KEY GOVERNANCE TOPICS

Armed Conflict & Militarization: The Russian Ministry of Defense is moving toward a **permanent mobilization** model, using raids in Penza to forcibly sign contracts with migrants, debtors, and individuals with minor criminal records. Recruitment has extended to [student drone pilots](#), with reports of coercion through threats of academic expulsion.

Energy & Critical Infrastructure Security: The [fuel shortage](#) in the occupied Crimea region has reached a critical flashpoint, with gasoline prices exceeding 450 rubles per liter.

Putin's public acknowledgement of the crisis, combined with promises of "miraculous" new supply routes, signals a breakdown in the state's ability to protect its primary economic engine.

Legal Warfare & Regulatory Risk: The European Union's proposed [21st sanctions package](#) represents a significant escalation in legal warfare, specifically targeting the "Messenger Max" application for its alleged role in FSB-coordinated digital surveillance and its utility in circumventing VPN protections.

Civil Unrest & Social Order: Domestic instability is increasingly visible in regional environmental disputes. In Kurgan, residents fear a ["underground Chernobyl"](#) due to uranium leaching, while in Usolye-Sibirskoye, legacy mercury contamination has rendered the region a [toxic time bomb](#), with local authorities unable or unwilling to fund decontamination.

DEEP DIVE: TRENDS AND THEMES

- **The Collapse of the "Controlled Opposition" Myth:** The alleged leak of [Ksenia Sobchak's correspondence](#) suggests that "independent" media figures in Russia may be operating under direct administrative guidance from the Presidential Administration (AP). The subtext reveals a media market where figures formerly perceived as "untouchable" elites are now being openly hectorated and insulted by mid-level bureaucrats, indicating a significant loss of status for the creative intelligentsia.

- **Green Social Democracy vs. Extraction Authoritarianism:** A striking thematic contrast appears between Norway's ["Generations Fund"](#) model—focused on long-term sustainability, green infrastructure, and social welfare—and the Russian model of **resource predation**. While Norway invests in the recycling of solar panels and hydrogen-powered ships, Russia is depicted as strip-mining its borderlands and neglecting legacy industrial toxicities in Siberia.
- **The Normalization of Asymmetric Mobilization:** The "Penza model" of [targeting the socially unprotected](#) (men over 40 with debts or family issues) suggests the Kremlin has moved away from a broad-based draft toward a highly targeted, manual extraction of labor from the fringes of society to avoid mass urban unrest.

INTERNAL DYNAMICS & DOMESTIC INSTABILITY

Russia's internal dynamics are increasingly defined by **institutional decay** and the erosion of local governance. Investigative reports into **Sergey Shoigu** portray a Ministry of Defense that has prioritized "Potemkin village" projects like ["tank biathlons"](#) and massive religious monuments over actual military readiness. This decay extends to civilian life, where village activists in Tayozhino are forced to organize their own [waste management](#) because the state apparatus has effectively abandoned basic municipal services. Public sentiment is shifting toward deep skepticism; local forums show a [preponderance of negative reactions](#) to Putin's claims of military and economic victory, with citizens using "clown" emojis to

mock official proclamations of success in the SVO.

EXTERNAL DYNAMICS & GLOBAL POSTURE

The international system is framing Russia as a **systemic threat actor** to be contained through total economic isolation. The EU is no longer debating if sanctions should be tightened, but rather how to implement a [total ban on Russian LNG](#) by early 2027. Meanwhile, the United States, under a potential shift in posture, is signaling a **resumption of military actions** in the Persian Gulf against Iranian proxies, which could further disrupt global oil markets and exacerbate Russia's domestic energy crisis. The emergence of the ["Freya" project](#) represents a defensive "closing of the ranks" in Europe, positioning Ukraine not just as a recipient of aid, but as a central manufacturing and testing hub for the continent's new security architecture.

THE ECONOMIC ENVIRONMENT

The Russian economy is entering a period of forced **manual regulation** as market mechanisms fail under the weight of sanctions and infrastructure strikes. Inflation is being "felt" by citizens at a rate of [15%](#), nearly triple the official Rosstat figures. The state is weaponizing its remaining resources to maintain the appearance of normalcy in Moscow, while the regions bear the brunt of the "empty tank" reality.

Key Economic Vectors:

- **Commodities:** Brent crude trading above [\\$87 per barrel](#) following US threats of an Iran blockade; Russian oil price cap potentially dropping to \$44.

- **Infrastructure Impact:** Estimates suggest 10% to 20% of the [current year's harvest](#) may remain in the fields due to fuel shortages and lack of functional agricultural machinery parts.
- **Financial Flows:** EU purchase of nearly 10 million tons of Russian LNG in the first half of 2026 generated [6 billion euros](#) for the Kremlin, highlighting a critical remaining gap in the sanctions regime.
- **Corporate/Legal:** Sanctions against [VK](#) and its surveillance-linked "Messenger Max" platform signal the start of a broader campaign against the Russian domestic tech sovereignty ecosystem.

LEADERSHIP CHANGES

A significant reshuffling of the Ukrainian cabinet is underway, aimed at professionalizing the government for the next phase of the war, while the Russian leadership remains stagnant but under intense scrutiny for systemic failures.

- **Yulia Svyrydenko:** The Ukrainian Deputy PM is reportedly resigning to take a post as [Ambassador to the US](#), a move designed to leverage her relationships with US financial leaders in anticipation of a potential Trump administration.
- **Denys Shmyhal:** Potential [return to the Premiership](#) to focus on economic stabilization and winter readiness.
- **Boris Nadezhdin:** Effectively removed from the political chessboard by [arrest](#), signaling the end of "managed" moderate dissent.

- **Sergey Shoigu:** Portrayed as a "loser" in the current environment, with exposes detailing his [multi-billion ruble personal properties](#) and his daughters' lucrative businesses with MoD contractors.

EDITORIAL POSTURE & STORY HIERARCHY

The network's lead stories prioritize the **immediate domestic impact** of the war on Russian citizens (fuel crisis and mobilization raids) and **international accountability** for war crimes. There is a clear emotional arc: from the "fear-inducing" reports of police brutality in Vladimir and forced draftees in Penza to the "hopeful/aspirational" segments on Norway's stable prosperity. Buried stories include the specifics of the US military notify-and-strike posture regarding Iran, which is treated as a secondary economic factor rather than a major geopolitical shift. Conspicuous omissions include any detailed reporting on the internal military situation within Ukraine itself (e.g., front-line casualty rates), focusing instead on the **transgressive behavior** of the Russian occupation forces and the technological advances of Western aid.

GEOPOLITICAL FRAMING

The day's reporting frames the global landscape as a clash between **integrated, technological democracies** and an **isolated, extracting autocracy** that is cannibalizing its own future to maintain a "victorious" facade.

COUNTRIES

- **Russia:** Portrayed as a decaying "Potemkin" state that is **chaotic and corrupt**. Examples include the failure to provide basic garbage services in Tayozhino and the classification of fuel data to hide ["economic сумятицу" \(turmoil\)](#).
- **Norway:** Framed as the **competent and stable** ideal. Described as a nation that has "conquered nature" through green energy and ["generous social protection"](#).
- **Ukraine:** Portrayed as **strong and principled**, increasingly becoming a peer-level military producer for Europe through the ["Freya" project](#).

LEADERS

- **Vladimir Putin:** Portrayed as **isolated and inept**, "closing his eyes to the day after tomorrow" in favor of ["standing for today"](#).
- **Donald Trump:** Framed as an **aggressive and transactional** actor, using "hellish sanctions" as a bargaining chip and ["resuming military operations"](#) to control global corridors.
- **Sergey Shoigu:** Characterized as a **corrupt "nomenklaturshchik"** who built a ["Potemkin army"](#) while enriching himself through shady dacha deals in Zhukovka.

NON-STATE & CORPORATE ACTORS

- **VK / Messenger Max:** Framed as a **corrupt tool of the FSB**, directly aiding in the suppression of [civil society](#).

- **International Olympic Committee (IOC):** Portrayed as **weak and compromised** for considering Russia's return, a move described by critics as ["Judas money"](#).

INFORMATION WARFARE ENVIRONMENT

- **Meta-Narrative Seed:** The Kremlin is attempting to seed a narrative of **"Ajiotazh" (Artificial Hype)** to explain fuel shortages, claiming that there is no actual deficit, only a ["deficit of calmness"](#).
- **Controlled Leaks:** The Sobchak leaks are analyzed as a possible **psy-op** by rival security clans to "dethrone" her and signal to other elites that the era of "soft" compromise is over.
- **Censorship of the Penza Raids:** Military commissars in Penza are attempting to frame [videos of forced recruitment](#) as "staged" and "funded by the AFU," a clear attempt at domestic counter-propaganda.

HYPOTHESES AND FUTURE OUTLOOK

- **Post-Election Mobilization:** Analysts hypothesize that once the "parliamentary elections" are secured (via the removal of candidates like Nadezhdin), a [full mobilization](#) will likely be declared, potentially under the guise of "rotation."
- **Russian De-Industrialization:** The sustained inability to repair high-tech refinery equipment due to sanctions and strikes will likely lead to a **structural decline** in Russia's industrial output, moving it toward a North Korean-style "siege economy."

- **European Defense Autonomy:** The "Freya" project suggests Europe is successfully decoupling its security from the US "umbrella," preparing for a world where **Trump-led transactionalism** makes NATO less predictable.

STRATEGIC FORESIGHT

Short Term (1-4 Weeks): Expect a sharp increase in arrests of regional activists and journalists as the state moves to "cleanse" the information field before the election. Fuel rationing will likely become formalized in at least [seven key regions](#) through license plate-based limits.

Medium Term (1-6 Months): The implementation of the \$44 oil price cap will trigger a sovereign debt crisis in Russia. Ukraine will likely begin its first domestic assembly of [anti-ballistic systems](#), shifting the battlefield dynamic.

Long Term (1-5 Years): The "Usolye-Sibirskoye" and "Kurgan" environmental crises will become the primary drivers of **non-political civil unrest**, as the state's failure to provide environmental security overrides its ability to coerce through propaganda.

RISK ASSESSMENT

The current trajectory suggests five primary flashpoints where stability could rapidly degrade.

- **Total Fuel Supply Chain Failure:** A breakthrough strike on the remaining major refineries would render [harvesting impossible](#). Triggers: Coordinated mass drone attack on Central Russia hubs. Likelihood: High. Impact: Catastrophic (famine risk). Mitigations: Importation of fuel from India/China (currently blocked by China).
- **Escalation of Persian Gulf Military Actions:** Trump's blockade of Iran could trigger a direct [US-Iran conflict](#). Triggers: Iranian retaliation against UAE tankers. Likelihood: Moderate. Impact: Global oil shock (\$150+ Brent). Mitigations: Diplomatic back-channels currently on "pause."
- **Mass Prison/Soviets-style Labor Riots:** The use of [dungeon interrogation camps](#) like "Skladskaya 19" in Penza could trigger localized uprisings. Triggers: Death of a high-profile "forced" draftee. Likelihood: Moderate. Impact: Regional civil unrest. Mitigations: Increasing police presence in urban centers.
- **Russian Sovereignty Default:** The \$44 price cap would force a [sovereign default](#) by early 2027. Triggers: Formalization of the EU 21st package. Likelihood: High. Impact: Hyperinflation and currency collapse. Mitigations: Parallel shadow fleet expansion.

- **Anti-Ballistic Escalation:** The deployment of the "Freya" system could provoke Russia into **tactical testing** of strategic limits. Triggers: First successful SCALP-based strike on a major hub. Likelihood: Low. Impact: Nuclear threshold tension. Mitigations: Joint US-Russia de-confliction lines.

GAPS & BLIND SPOTS

- **China's Strategic Shift:** The broadcasts mention China [blocking gasoline exports](#) to Russia but fail to analyze whether this is a temporary logistical move or a fundamental pivot in the "limitless partnership."
- **Ukrainian Casualty Rates:** While detailing Russian war crimes and technological wins, the reports are silent on **Ukrainian attrition**, which is critical for assessing the actual longevity of the conflict.
- **The "Freya" Funding Source:** The report details the coalition but fails to explain the **fiscal commitment** of the nine nations involved, casting doubt on the project's near-term viability.
- **Nadezhdin's Health:** The politician claims he will ["just die"](#) in prison; a lack of independent medical verification makes his arrest a potential "black swan" trigger for mass protests if he dies in custody.

CONTRARIAN NARRATIVE SCENARIOS

- **The AP "Sobchak Leak" as a Loyalty Test:** Far from a compromise, the Sobchak chats may be a **controlled disclosure** by the Kremlin to prove that even the "liberal elite" are firmly under the thumb of the AP, demoralizing the Russian opposition abroad.
- **Norwegian Greenwashing:** The focus on Norway's green energy could be viewed as a distraction from their [ongoing reliance on oil profits](#) to fund their social model, suggesting that "green social democracy" is only possible through fossil fuel extraction elsewhere.
- **The "Freya" Project as a Stalling Tactic:** The coalition might be a public relations move to mask the **depletion of current Patriot reserves**, creating a "future promise" to avoid admitting current defensive bankruptcy.
- **Black Swan:** A successful "prison-to-front" mutiny in a forced draftee battalion (like those recruited in Penza) that reverses direction and moves on a regional administrative center.

RECOMMENDATIONS & IMPLICATIONS

For Statecraft/Public Sector:

- **Security:** Accelerate the formalization of the "Freya" coalition to provide a credible **post-NATO** defensive framework for Europe.
- **Economic:** Prepare for a volatile oil market (\$87-\$150 range) by increasing strategic reserves ahead of a potential US-Iran confrontation.

- **Diplomatic:** Use the UN report on sexual violence to increase **global south isolation** of Russia on humanitarian grounds.

For Private Sector/Investors:

- **Supply Chains:** Investors in agricultural commodities should price in a **20% reduction** in Russian grain output due to fuel and machinery failures.
- **Compliance:** Tech companies should immediately audit all use of VK-related APIs or platforms to avoid secondary sanctions under the [EU 21st package](#).
- **Safety:** Humanitarian aid organizations in occupied territories must implement **gender-segregated security** protocols in response to documented systematic violence by occupying forces.

LEGISLATIVE ROUNDUP

Legislative activity on July 14, 2026, focused heavily on codifying the long-term economic isolation of Russia and formalizing new European military production agreements. The central debates revolved around balancing the "pain" of energy sanctions on EU member states with the necessity of cutting Russian war revenue.

BILLS DISCUSSED/DEBATED:

- **The Lindsey Graham Sanctions Act (US):** A posthumously pursued [bipartisan bill](#) that would allow the US President to impose high tariffs on any nation purchasing Russian oil or LNG, effectively removing the "mirage of peace talks" as a reason to delay sanctions.

- **EU 21st Sanctions Package:** Legislation targeting Russian **surveillance tech**, LNG imports, and the introduction of the \$44 per barrel oil price cap.
- **The Freya Defense Charter:** A multilateral treaty for the [joint production](#) of anti-ballistic missiles across nine European states.

HEARINGS & PRESS EVENTS:

- **UN Special Representative on Sexual Violence Report:** A formal hearing documenting the systematic use of violence by Russian forces as a tool of [interrogation and social control](#).
- **Russian "Everything for Victory" Forum:** A state-led exhibition intended to project **industrial strength** despite refinery strikes.
- **Penza Military Commissariat Press Conference:** An attempt by local authorities to [deny mass raids](#) and frame dissent as foreign-funded operations.

KEY STORIES

- **Refinery Attacks and Russian Fuel Crisis:** Ukrainian drones hit the Salavat and Afipsky refineries; Putin admits to supply problems while promises a [new system for Crimea](#); fuel prices in Crimea hit 450 rubles per liter.
- **Penza "Interrogation Camps":** Local raids target migrants and debtors for **forced mobilization**; "Skladskaya 19" identified as a site of physical abuse; military commissars call videos "staged."
- **Arrest of Boris Nadezhdin:** Moderately critical politician arrested on [extremist symbolism charges](#) (linked to Alexey Navalny's photo); faces 15 years in prison.

- **UN Sexual Violence Blacklist:** Russia added to official UN blacklist for [systematic sexual atrocities](#); report details 310 cases including 280 men and 4 girls.
- **Freya Defensive Coalition:** Nine nations launch joint production of [anti-missile systems](#); Ukraine to produce Patriot and SCALP components.
- **Sobchak Chat Leaks:** Telegram correspondence of [Ksenia Sobchak](#) allegedly reveals direct AP control and censorship of "independent" news; AP officials like Vladimir Tabak reportedly gave direct orders.
- **Shoigu Corruption Investigation:** Expose on **multi-billion ruble properties** in Zhukovka and Shoigu's "Potemkin village" military management style.
- **Lindsey Graham Bill Support:** Trump signals support for [Grahams' final bill](#) for "hellish sanctions" against Russian oil buyers.
- **Usolye-Sibirskoye Environmental Emergency:** Abandoned chemical plant leaking [hundreds of tons of mercury](#) into the Angara River basin; 75,000 residents at risk.
- **Kurgan Uranium Protests:** Locals fear poisoning from the **"Dobrovolnoye"** mining site; activists face [terrorist charges](#) for their opposition.
- **Norway's Green Energy and Wealth Fund:** In-depth report on Norway's [sovereign wealth fund](#) (\$1.4 trillion+) and transition to 100% renewable electricity.
- **US Blockade of Iran:** Trump notifies Congress of [resuming military operations](#) in response to UAE tanker attacks.
- **Georgiy Pirogov Disappearance:** Russian citizen [kidnapped in Uzbekistan](#) and transferred to a Moscow SIZO on treason charges.
- **Savintsi Occupation Survivor:** 71-year-old Ukrainian man details [100 days of captivity](#) and torture by Russian forces in occupied Savintsi.
- **Science: AI in Mammography:** Report on how [AI startups in Argentina](#) are reducing breast cancer diagnosis times from months to days.
- **Science: Norovirus Prevention:** Health segment on the [extreme resilience](#) of the norovirus shell and the necessity of 60°C washing for decontamination.

ABOUT THIS REPORT

Today's Media Trends is a public interest experiment in applying deep thematic trend analysis to television news coverage from around the world to explore how responsibly applied advanced AI can help journalists and scholars better understand the overarching trends, themes and patterns of our global world.

No data is used to train or tune any AI model.

Each morning, in collaboration with the Internet Archive's TV News Archive, we apply Google's Gemini 3 to deeply examine yesterday's coverage from each television news channel to tease out the overarching themes and trends of its news coverage into a richly annotated thematic analysis. Each high-level insight is connected back to the original broadcast, allowing journalists and scholars to understand the dominate themes and trends and instantly click out to the underlying sources for details.

By helping journalists and scholars see the broader trends and patterns of global news coverage, this analysis helps them identify relevant stories and coverage they might not otherwise have encountered and uncover connections, emphases and narrative shifts that enable more comprehensive reporting and deeper, evidence-based research.

This report is entirely machine generated using Gemini 3 and may include errors and omissions. Please verify all findings. No data is used to train or tune any AI model.

For questions or suggestions, please contact kalev.leetaru5@gmail.com.
