THE GDELT PROJECT

GLOBAL CRISIS: INFRASTRUCTURE WARFARE & THE HORMUZ BLOCKADE

Escalation follows Collapse of Islamabad MOU, Triggering Strategic Shifts & Economic Shock

THE TRIGGER: DIPLOMATIC COLLAPSE & BLOCKADE

US/WESTERN POSTURE: "TOTAL DESTRUCTION" & DOMESTIC STRAIN

IRAN/RESISTANCE AXIS: ASYMMETRIC RETALIATION & UNITY

GLOBAL FALLOUT & FRACTURING ORDER

FUTURE OUTLOOK: STRATEGIC SHIFTS & RISKS

SHORT-TERM (Weeks)

- ▶ FUEL PRICE SPIKES.
- ▶ ANTI-WAR PROTESTS.
- ▶ "PHASE 11" IRANIAN OPS.

MEDIUM-TERM (Months)

- ▶ US MIDTERMS DOMINATED BY "FAILED POLICY".
- ▶ REGIONAL NEUTRALITY NEGOTIATIONS.
- ▶ SHIFT IN UK STANCE.

LONG-TERM (Years)

- ▶ STRUCTURAL TRADE SHIFT TO LAND ROUTES (SCO).
- ▶ PERMANENT ASYMMETRIC INSURGENCY.
- ▶ "GREATER ISRAEL" PROJECT IMPACT.

KEY RISK: ESCALATION TO NUCLEAR POSTURE (IF EXISTENTIAL THREAT PERCEIVED)

TODAY'S MEDIA TRENDS

PRESSTV

JULY 16, 2026

THE ESCALATION OF REGIONAL
CONFLICT INTO ACTIVE
INFRASTRUCTURE WARFARE
FOLLOWING THE COLLAPSE OF
THE ISLAMABAD MEMORANDUM
HAS TRIGGERED A STRATEGIC
BLOCKADE OF THE STRAIT OF
HORMUZ AND DESTABILIZED
GLOBAL ENERGY MARKETS.

DAY-AT-A-GLANCE

The regional security architecture of West Asia has effectively shifted from a state of fragile diplomacy to active, high-intensity infrastructure warfare. The [Islamabad memorandum of understanding](#), a 14-point plan designed to provide a 60-day grace period for peace negotiations, is reported to be in **shambles** following what Iranian officials characterize as at least [42 violations](#) by the United States. This diplomatic failure has resulted in a total **blockade** of the Strait of Hormuz by Iranian forces, a move that threatens to disrupt up to [25 percent of the world's oil and gas supply](#). The United States administration, under President Donald Trump, is portrayed as having abandoned the agreement to pursue a strategy of "total

destruction" of Iranian civilian infrastructure, including power plants and bridges, while simultaneously facing domestic crises including soaring **inflation** and widespread social unrest.

Iran has moved from symbolic resistance to a policy of **asymmetric, decisive retaliation**. Through "Operation Nasr 2" and "Operation Thunder," the Islamic Revolutionary Guard Corps (IRGC) and the Iranian army have targeted U.S. military infrastructure in [Kuwait, Bahrain, and Jordan](#). This military escalation is coupled with an intensive information warfare campaign following the assassination of Supreme Leader Ali Khamenei earlier in the year. The Iranian state is framing the current conflict not as a series of isolated strikes, but as a **third imposed war** intended to secure "full-spectrum dominance" by the U.S.-Israeli axis. The convergence of these events suggests a transition toward a prolonged **war of attrition** with global economic consequences.

Simultaneously, the "Axis of Resistance" appears to be synchronizing operations. Leadership in Yemen has threatened to close the [Bab-el-Mandeb strait](#) in coordination with the Hormuz blockade, potentially "choking off" the global economy. This external posture is mirrored by internal shifts in other nations; the United Kingdom is undergoing a leadership transition as [Keir Starmer resigns](#), and Bolivia is facing a **general strike** against a pro-Israel right-wing government. The overarching theme of the day's developments is the fracturing of the Western-led "rules-based order" and the emergence of a multipolar arena defined by **infrastructure targeting** and the weaponization of maritime trade routes.

MAJOR DEVELOPMENTS

Collapse of the US-Iran Ceasefire and Infrastructure Targeting

- The 14-point Islamabad MOU is declared void after the U.S. resumed strikes [on Iranian coastline and southern cities](#).
- U.S. forces have reportedly targeted civilian assets, including [bridges in Carrage](#), water desalination centers in [Qishm Island](#), and the vicinity of a children's cancer hospital in [Ahvaz](#).
- Iran has warned that any future U.S. strikes on its infrastructure will be met with [reciprocal strikes](#) against all regional U.S.-aligned infrastructure.

Iran-led Blockade of the Strait of Hormuz

- Iranian forces have officially [closed the Strait of Hormuz](#) to hostile vessels, asserting total sovereign authority over the waterway.
- Shipping traffic has plummeted, with reports that [21 LNG carriers](#) are currently stranded in the Persian Gulf.
- Iranian officials state that the strait will remain closed until the U.S. complies with the MOU and accepts [Iranian regulations](#) for the waterway.

Operation Nasr 2 and Operation Thunder Retaliations

- The IRGC utilized ballistic missiles and drones to strike the [Ali al-Salem airbase](#) in Kuwait.
- The Iranian army destroyed radar stations and fuel tanks at Jordan's [al-Azrak airbase](#) using attack drones.

- Drone strikes were launched against communication equipment and Patriot batteries at [Sheikh Isa airbase](#) in Bahrain.

Domestic Instability and Civil Unrest in the United States

- Nationwide protests have erupted following [extrajudicial killings](#) of immigrants by ICE agents.
- U.S. inflation has risen [31 percent since 2019](#), with gas prices reaching \$3.90 per gallon, leading to a shrinking personal savings rate of 3%.
- The Trump administration is reportedly facing internal rifts, with Vice President [JD Vance flatly rejecting](#) plans for a ground invasion or regime change in Iran.

Regional Shifts and Leadership Transitions

- UK Prime Minister [Keir Starmer resigned](#) after losing party confidence, with Andy Burnham expected to take leadership.
- Bolivia's COB trade union confederation has declared a [massive general strike](#) against the right-wing Paz administration's austerity measures and pro-Israel stance.
- Memorial ceremonies for late leader Ali Khamenei drew estimated crowds of [12 to 15 million people](#) in Tehran alone.

KEY GOVERNANCE TOPICS

Armed Conflict & Militarization

- Transition from low-intensity "proxy" conflict to **direct state-on-state strikes** involving ballistic missiles and advanced drone swarms [across multiple borders](#).

- Iran has mobilized a "people's army" of reportedly [30 million volunteers](#) to resist potential U.S. ground invasions.
- Israeli forces have unveiled plans for **indefinite occupation** and new military outposts in [Northern Gaza](#).

Critical Infrastructure Security

- Intentional targeting of **dual-use and purely civilian infrastructure** (power plants, bridges, railways) has become the primary theater of operation [for U.S. forces](#).
- Iran's central military command has warned of **reciprocal destruction** of regional infrastructure if their domestic assets are further hit [by U.S. missiles](#).

Diplomacy & Statecraft

- The total collapse of the Islamabad/Paris diplomatic tracks signals a **loss of faith** in U.S. treaty compliance, with Iranian officials calling U.S. word "worth less than the paper it's written on" [in the wake of MOU violations](#).
- Regional states (Kuwait, Bahrain, Jordan) are being warned by Iran that **hosting U.S. bases** makes them legitimate military targets [in a wider conflict](#).

Macroeconomics & Trade

- U.S. economic data reveals a **crisis watch** posture, with the war on Iran estimated to have cost the public [\\$132 billion](#) so far.
- Trump has imposed new **25% tariffs** on imports from Brazil, further complicating international trade relations [and supply chains](#).

Information Warfare & Disinformation

- Press TV highlights a **narrative delta** between Western media (CNN, NYT) framing of the Khamenei funeral as "routine" and local footage showing [unprecedented turnouts](#).
- Allegations of **false flag operations** using drones to target hotels in Qatar and Dubai to frame Iran are being [actively investigated](#) by local authorities.

DEEP DIVE: TRENDS AND THEMES

The Weaponization of Geography

A central strategic theme is the transition from control of territory to the **weaponization of global transit arteries**. Iran is no longer merely defending its borders but is leveraging its control over the Strait of Hormuz to "red card" the [world economy](#). This "asymmetric tactic" forces the U.S. to choose between a disastrous ground invasion and a humiliating retreat. The regional framing suggests that the U.S. and Israel are attempting to "redraw the map" of West Asia, while the "Axis of Resistance" is countering by **shutting down the global energy grid at its primary nodes**.

The Erosion of U.S. Soft Power and Moral Standing

Broadcasts emphasize a massive **credibility gap** in U.S. foreign policy. The failure to uphold the JCPOA followed by the collapse of the Islamabad MOU is presented as proof that the U.S. is a [rogue state](#) operating beyond international law. This is reinforced by reports of U.S. domestic "depravity," including the targeting of children's hospitals in Iran and [extrajudicial killings](#) of its own immigrant

population. The narrative positions Iran as the defender of "international law" and "human rights," while the U.S. is framed as an empire of "psychopaths" and "well-manicured speeches" [devoid of substance](#).

Technological Sovereignty as a Military Asset

[There is a recurring emphasis on self-reliance in high-tech sectors \(nanotech, biotech, missile engineering\) as a primary defense against sanctions. Iran's ability to produce advanced drones and missiles domestically is cited as the reason it has not collapsed like the Soviet Union](#)

[despite decades of pressure](#). This trend suggests that future geopolitical power will be determined not by resource wealth alone, but by a state's ability to maintain an **independent technological ecosystem** [under siege](#).

INTERNAL DYNAMICS & DOMESTIC INSTABILITY

United States: Institutional Decay and Partisan Rifts

The U.S. is portrayed as a nation on the brink of **internal collapse**. High inflation, gas price shocks, and a personal savings crisis are reportedly driving the public into "crisis watch" [mode](#). Internal political cohesion is failing; the broadcast highlights **rifts** between the Trump White House and JD Vance, as well as significant [Republican opposition to the war in Congress. The use of the War Powers Act is discussed as an attempt by a "nervous" Congress to regain control from a president](#)

[who "does not govern through voting" but through presidential decree](#).

Iran: Unified Mourning and Revolutionary Resolve

In contrast to the U.S., Iran is depicted as **extraordinarily unified** following the assassination of Ali Khamenei. The massive turnout for funeral processions is presented as a **referendum** on the Islamic Republic's survival [and popular support](#). While "some people want more reforms," the narrative insists there is no desire for regime change. Instead, the state is leveraging the mourning period to **re-radicalize** the population, with millions reportedly signing up for [combat duty](#).

EXTERNAL DYNAMICS & GLOBAL POSTURE

The Fracturing of the Western Bloc

The international system is framed as a "fracturing multipolar arena." While NATO is described as an "outpost of American dominance," broadcasts suggest **growing dissent** within the bloc, specifically mentioning [reservations from Spain. The U.S. is increasingly isolated as it engages in trade wars with allies like Brazil via 25% tariffs. This isolation is providing space for new blocs like BRICS and the Shanghai Cooperation Organization \(SCO\) to emerge as alternative sources of international stability](#).

Iran's "Extended Neighborhood" Strategy

Iran is actively projecting power by framing its struggle as a regional **defense of sovereignty**. It is urging Arab states to reconsider the "wisdom" of hosting U.S. bases [on their territory. This global posture is defensive-aggressive; Iran uses its](#)

"asymmetric" capabilities to signal that it will not wait for U.S. approval to defend its interests at a regional scale.

THE ECONOMIC ENVIRONMENT

Global and national economic indicators suggest a high-risk environment characterized by volatility and supply chain disruption. The closure of the Strait of Hormuz has created an immediate **oil supply shock**, with prices expected to climb significantly above current levels exceeding \$90 a barrel.

Key Economic Vectors

- **Inflation (US):** Official rate at 3.5%, up 50% from February; cumulative 31% increase since 2019.
- **Energy Prices:** U.S. gas at \$3.90/gallon or over a dollar per liter; oil prices trending toward \$90+.
- **War Costs:** Estimated \$132 billion cost to the American public for the Iranian conflict to date.
- **Trade Disruptions:** 21 LNG carriers stranded; 12% of global trade flow through Hormuz/Bab-el-Mandeb nodes.
- **Tariffs:** 25% U.S. tariff imposed on Brazilian imports starting July 22nd.

LEADERSHIP CHANGES

The day's reports indicate a period of significant turnover and instability in Western

leadership, while Iranian leadership is undergoing a transition through "martyrdom."

- **Keir Starmer (UK Prime Minister):** Resigned after losing party confidence; confirmed departure ahead of Andy Burnham taking the leadership.
- **Ali Khamenei (Iranian Supreme Leader):** Deceased (Assassinated Feb 28); memorial services entering final historical phase.
- **Sayid Mustafa Hussein:** Identified as a figure capable of revising religious fatwas regarding nuclear weapons development.
- **Rodrigo Paz (Bolivia President):** Facing a nationwide general strike and calls for his removal due to austerity and pro-Israel policies.
- **JD Vance (US Vice President):** Publicly breaking with administration hawks to reject ground invasion plans.

EDITORIAL POSTURE & STORY HIERARCHY

The network's editorial posture is **highly nationalistic and celebratory** of Iranian military success while being **fear-inducing** regarding U.S. intentions. The lead stories are consistently the "success" of retaliatory operations Nasr 2 and Thunder, followed by the "failure" of U.S. diplomacy. Major emphasis is placed on **civilian victimhood** (hospital strikes) and **unified national grief** (Khamenei's funeral). The tone is one of "patient resolve" turning into "decisive action."

Conspicuous Omissions: [The network provides almost no detail on Iranian military casualties or internal dissent within Iran. There is also a complete absence of reporting on the successor to Khamenei, focusing instead on his legacy and the "spirit" of the people. No reporting is done on the Hamas captives in Gaza, framing the Israeli war entirely as a colonial project.](#)

GEOPOLITICAL FRAMING

The subtext of the reporting frames a global struggle between "civilized" resistance and "psychopathic" imperialism. The "Global South" is framed as the new "subject of history," no longer [willing to be objects](#) of Western destruction.

COUNTRIES

- **Iran:** Portrayed as strong, principled, and technologically superior. "Iran has the winning hand" [in the current conflict](#).
- **United States:** Framed as chaotic, corrupt, and in decline. Described as "worse than the pirates of the Caribbean" [due to its firepower and greed](#).
- **Israel:** Portrayed as a "fake Zionist regime" and a "killing machine" [plundering the region](#).
- **Bolivia:** Framed as a battleground where the population is [rising against Zionist interests](#).

LEADERS

- **Donald Trump:** Characterized as a "liar" and "desperate" leader who is more concerned with [personal wealth than soldiers' lives](#).

- **Ali Khamenei:** Framed as a "larger than life" saintly figure whose death [unified the nation](#).
- **Pete Hegseth:** Described as a "complete moron" and "young boy scout" [unfit for the role of Secretary of War](#).

NON-STATE & CORPORATE ACTORS

- **IRGC:** Portrayed as a highly competent, coordinated military force capable of [striking multiple countries simultaneously](#).
- **Ansarullah (Huthis):** Framed as a key strategic partner capable of [collapsing the global economy](#).
- **APAC (AIPAC):** Framed as a "corrupting" force that has [bought the U.S. government](#).

INFORMATION WARFARE ENVIRONMENT

The network is actively **narrative seeding** the idea that the U.S. is planning a "colonial invasion" of Iranian islands to seize [Karg Island](#). There is significant **psychological operation** effort to convince U.S. allies in the Gulf that their participation in the U.S. defense shield will lead to their "total destruction" [by Iranian missiles](#).

[The delta between media spin and ground truth is widest regarding the Minab massacre. While Iran claims 168 children were murdered by a Tomahawk missile, the broadcast admits the U.S. has](#)

[ordered standard intelligence reviews](#) into the incident, which the network frames as a "cover-up" rather than an investigation.

HYPOTHESES AND FUTURE OUTLOOK

- The conflict will likely evolve into a **total maritime blockade** of West Asian waterways if U.S. strikes on Iranian power plants occur [as threatened](#).
- The "martyrdom fatwa" against nuclear weapons may be rescinded if the state perceives an **existential threat from a U.S. ground invasion**.
- A **government collapse** in Bolivia is possible as the COB general strike paralyzes trade [and transit infrastructure](#).

STRATEGIC FORESIGHT

Short Term (1-4 Weeks): Expect immediate **fuel price spikes** in the U.S. and Europe as the Hormuz closure impacts markets. Reactionary "anti-war" protests in the U.S. will likely intensify as body bags [return from regional bases](#). Iran will likely launch "Phase 11" of its operations if U.S. strikes [on bridges continue](#).

Medium Term (1-6 Months): U.S. midterm elections will be dominated by the "failed" Iran policy. Regional states like Kuwait and Bahrain may attempt to **negotiate independent neutrality** with Tehran to avoid [infrastructure destruction](#). The UK leadership transition to Andy Burnham will likely result in a [shift in pro-Israel funding](#).

Long Term (1-5 Years): [A structural change in global trade routes is underway, with a permanent shift toward land-based transit via SCO-aligned countries. The "greater Israel" project will likely result in a permanent state of asymmetric insurgency](#)

[across West Asia.](#)

RISK ASSESSMENT

The primary flashpoint is the **escalation to nuclear posture** as conventional deterrents fail to prevent strikes on Iranian civilian centers.

- **Risk: Global Energy Grid Collapse.** Triggers: Closure of both Hormuz and Bab-el-Mandeb straits by Iran/Yemen. Likelihood: High. Impact: Catastrophic; total economic cessation in Europe/Asia. Mitigations: Unilateral U.S. withdrawal or fulfillment of [MOU requirements](#).
- **Risk: U.S. Domestic Social Chaos.** Triggers: Combined inflation, gas shocks, and ICE shootings. Likelihood: Moderate. Impact: High; loss of government mandate. Mitigations: Suspension of anti-immigrant crackdown [and federal price controls](#).
- **Risk: Formal Outbreak of War with NATO.** Triggers: U.S. invocation of Article 5 following Iranian strikes on regional bases. Likelihood: Low. Impact: High; generalized global war. Mitigations: Dissent from European [allies like Spain](#).
- **Risk: Total Healthcare System Failure in Gaza.** Triggers: Continued detention and torture of medical personnel. Likelihood: Certain. Impact: High; mass mortality from preventable illness. Mitigations: Immediate [release of Dr. Abu Safia](#).
- **Risk: Loss of Regional Air Superiority for U.S.** Triggers: Successful Iranian drone swarm targeting of Patriot batteries. Likelihood: Moderate. Impact: Moderate; forced abandonment of [regional airbases](#). Mitigations: Withdrawal of forces to [out-of-range positions](#).

GAPS & BLIND SPOTS

- **Iranian Succession:** The broadcasts ignore the question of who is actually governing Iran during this transition period.
- **Military Losses:** While detailing U.S. infrastructure damage, the reports fail to mention any Iranian [military casualties](#) or equipment losses.
- **Hormuz Legal Status:** The broadcast claims Iran is "not party to any international agreement" regarding the strait, which ignores the UN Convention on the Law of the Sea ([UNCLOS](#)).
- **U.S. Prisoner Release:** There is a total contradiction between Trump's claim of a prisoner release and [Iranian denials](#), with no third-party verification provided.
- **Hamas/Gaza Ground Truth:** The reporting frames the conflict solely as "racist genocide" and omits any tactical updates regarding [Hamas operations](#).

CONTRARIAN NARRATIVE SCENARIOS

- **The "Stalling Strike":** The Iranian show of unity and massive funerals may be a cover for an **internal power struggle** that the military is attempting to distract from via regional escalation.
- **The "Bait-and-Switch" MOU:** The U.S. may have never intended for the MOU to succeed, instead using the 60-day period to [replenish its arsenal for a final "regime change" offensive](#).

- **Black Swan Event: Nuclear Fatwa Reversal.** The sudden announcement of a successful nuclear test by Iran would immediately render the U.S. "gun to a knife fight" strategy [obsolete](#) and trigger a global panic.
- **Black Swan Event: U.S. Military Coup.** Continued rifts between Hegseth, Vance, and the Trump White House could lead to a refusal of orders by [regional commanders](#).

RECOMMENDATIONS & IMPLICATIONS

For Statecraft/Public Sector:

- **Security:** Immediately harden regional infrastructure against drone swarms; current Patriot batteries are [insufficient deterrents](#).
- **Economic:** Accelerate diversification of energy imports away from the Persian Gulf transit nodes [to avoid paralysis](#).
- **Diplomatic:** Establish a "back-channel" via neutral parties like Oman or Qatar to salvage the [Islamabad track](#).

For Private Sector/Investors:

- **Supply Chain:** Move logistics to land-based routes; the maritime "insurance and shipping" risk in Hormuz is [now unmanageable](#).
- **Regulatory:** Prepare for 25% tariff [impacts on Latin American imports](#) and secondary sanctions on Iran-aligned trade.
- **Safety:** Evacuate personnel from regional hubs in Kuwait and Bahrain; these are now [active military targets](#).

LEGISLATIVE ROUNDUP

Current legislative focus is split between war funding and attempts to restrain presidential authority. The U.S. House of Representatives recently voted **314 to 104** against an amendment that would have [cut aid to Israel](#), signaling continued bipartisan support for military operations despite public opposition.

BILLS DISCUSSED/DEBATED:

- **National Defense Authorization Act for 2027:** Currently being debated with a focus on "extra money for Israel" [amid democratic opposition](#).
- **War Powers Act (Resolution):** Invoked by House members to challenge presidential authority to make war [without congressional approval](#).
- **Islamabad MOU (Treaty Compliance):** Discussed as a legal framework where **Article 5** and **Article 9** violations by the U.S. provide [legal grounds for Iranian retaliation](#).

HEARINGS & PRESS EVENTS:

- **Keir Starmer's Final PMQs:** Defended his record before stepping down [as Prime Minister](#).
- **JD Vance on Joe Rogan Podcast:** Publicly stated that the U.S. will **not send ground troops to Iran**.
- **Yemen Ansarullah Televised Address:** Leader Abdul Malik al-Huthi warned of targeting [Saudi oil facilities](#) if they join U.S. aggression.

KEY STORIES

- **Operations Nasr 2 and Thunder Launch:** Comprehensive missile and drone strikes against U.S. bases in Kuwait, Bahrain, and Jordan in retaliation for [infrastructure strikes](#).
- **Closing of the Strait of Hormuz:** Iran has formally asserted control and closed the waterway to hostile shipping [due to U.S. violations](#).
- **Ahvaz Hospital Evacuation:** A children's cancer hospital was evacuated after being targeted [by U.S. missiles](#).
- **Death of Ali Khamenei:** Funeral processions reaching record numbers; narrative focuses on his legacy of [resistance and scientific self-reliance](#).
- **Bolivian General Strike:** COB trade union shuts down national transit to protest "pro-Zionist" administration and [austerity measures](#).
- **U.S. Economic Crisis:** Gas prices hit \$3.90/gal; inflation at 3.5%; war costs [exceeding \\$132 billion](#).
- **ICE Extrajudicial Killings:** 52 deaths in custody since 2025; 10 recent shooting deaths trigger [nationwide U.S. protests](#).
- **UK Political Transition:** Keir Starmer resigns; Andy Burnham poised for [Labour leadership](#).
- **Brazil Tariff Conflict:** Trump imposes 25% tariffs [on Brazilian imports](#) starting July 22nd.
- **Indian Medical Exam Scandal:** Massive student protests in Delhi over [65 documented paper leak cases](#).
- **Gaza Medical Personnel Crisis:** Palestinian Medical Association protests the torture and detention of [66 healthcare workers](#).

- **Mahan Air Flight to Yemen:** Iranian crew defies 11-year blockade to [land at al-Hudaida](#).

ABOUT THIS REPORT

Today's Media Trends is a public interest experiment in applying deep thematic trend analysis to television news coverage from around the world to explore how responsibly applied advanced AI can help journalists and scholars better understand the overarching trends, themes and patterns of our global world.

No data is used to train or tune any AI model.

Each morning, in collaboration with the Internet Archive's TV News Archive, we apply Google's Gemini 3 to deeply examine yesterday's coverage from each television news channel to tease out the overarching themes and trends of its news coverage into a richly annotated thematic analysis. Each high-level insight is connected back to the original broadcast, allowing journalists and scholars to

understand the dominate themes and trends and instantly click out to the underlying sources for details.

By helping journalists and scholars see the broader trends and patterns of global news coverage, this analysis helps them identify relevant stories and coverage they might not otherwise have encountered and uncover connections, emphases and narrative shifts that enable more comprehensive reporting and deeper, evidence-based research.

This report is entirely machine generated using Gemini 3 and may include errors and omissions. Please verify all findings. No data is used to train or tune any AI model.
