BBCPERSIAN

NOVEMBER 2, 2026

THE CONVERGENCE OF THE U.S.-IRAN CONFLICT AND U.S. MIDTERM ELECTIONS CREATES A VOLATILE GEOPOLITICAL INFLECTION POINT CHARACTERIZED BY REGIONAL BRINKMANSHIP AND DOMESTIC MILITARIZATION.

DAY-AT-A-GLANCE

November 2, 2026, marks a critical nexus where the ongoing U.S.-Iran war directly collides with the eve of the U.S. midterm elections. The conflict, which has persisted for approximately nine months, has resulted in a **strategic stalemate** in the Persian Gulf, characterized by U.S. claims of having destroyed the bulk of Iranian conventional naval and air assets, while Iran maintains a **stranglehold on the Strait of Hormuz**. The economic fallout of this maritime blockade, specifically skyrocketing fuel and food prices, has severely eroded President Donald Trump's domestic standing, with his popularity dropping below 35% as he faces a potential "blue wave" that could see Democrats seize control of both houses of Congress. The administration is currently navigating a delicate balance between Israeli pressure for immediate escalatory strikes post-election and a last-ditch diplomatic effort mediated by Qatar.

Diplomatically, the day is defined by a frantic "marathon" of negotiations in Doha. Iranian Foreign Minister Abbas Araghchi has signaled a potential breakthrough, compressing a previously proposed confidence-building timeline from seven days down to two. Under this plan, the Strait of Hormuz could be reopened within 48 hours if the U.S. meets specific Iranian preconditions, including the lifting of the naval blockade and the release of frozen assets. However, U.S. rhetoric remains bifurcated; while Trump describes the talks as "constructive," he simultaneously threatens to obliterate remaining Iranian nuclear sites within "ten minutes." This "maximum pressure" tactic is met with Iranian threats of a "geographically unlimited" response, targeting U.S. and Israeli assets across Europe and the Middle East, a narrative increasingly pushed by **Mojtaba Khamenei**, who appears to be exerting significant military command in the absence of the Supreme Leader.

Internally, Iran is undergoing a radical **militarization of its educational system** to prepare for a protracted conflict. The "No-Meydan" (New Soldiers) initiative, a partnership between the Ministry of Education and the Basij, seeks to integrate weapons training and "martyrdom culture" into schools for children as young as seven. This development, viewed by human rights activists as a systemic violation of child rights, suggests the regime is bracing for internal unrest and external invasion by cultivating a new generation of "child soldiers." Meanwhile, in the U.S., the election cycle is marred by intense polarization and the intervention of high-profile figures like Elon Musk, who has reportedly funneled over $400

million into Republican causes, underscoring the high stakes for the future of U.S. foreign policy and executive authority.

MAJOR DEVELOPMENTS

The "Two-Day" Diplomatic Pivot

- Foreign Minister Abbas Araghchi announced that Iran has compressed its confidence-building proposal to a 48-hour window, offering to reopen the Strait of Hormuz if the U.S. fulfills its conditions on day one.
- The proposal includes the removal of the maritime blockade, sanctions waivers, and the release of frozen assets for humanitarian purchases like food and medicine.
- Diplomatic sources indicate that unlike previous efforts through Pakistan, the Qatari-mediated talks involve documented written exchanges to prevent deniability and misinformation.

U.S. Midterm Election Instability

- Total spending for the 2026 midterm elections has surpassed a record $4 billion, with Republicans holding a significant financial advantage in advertising.
- President Trump’s approval rating has plummeted to under 35%, largely attributed to the economic impact of the war, including the high cost of fuel and steak.
- In a major blow to Democratic unity in Michigan, a Democratic representative has endorsed a Republican candidate over a progressive Arab-Muslim nominee, highlighting deep fissures over Israel-Palestine policy.

Militarization of Iranian Schools

- The "No-Meydan" plan, introduced by the Ministry of Education and the Basij, mandates military training and ideological indoctrination for students across all grades.
- The curriculum includes weapons handling, gathering "popular intelligence" in neighborhoods, and preparing students to identify "infiltrators" within their communities.
- Human rights researchers characterize these programs as a mechanism to produce "child soldiers" and use children as human shields at checkpoints during civil unrest.

Escalation Cycles in the Persian Gulf

- The IRGC claims to have targeted 11 vessels in nine days, including a Qatar-flagged gas tanker, leading to widespread international condemnation.
- The U.S. is reportedly moving a Patriot missile battery from Texas to Israel in anticipation of post-election hostilities.
- Strategic oil reserves have been depleted by nearly one billion barrels globally due to the disruption of traffic through the Strait of Hormuz.

KEY GOVERNANCE TOPICS

Armed Conflict & Militarization

- U.S. Defense Department estimates the war effort has cost $47 billion to date, 25% higher than original projections.
- Israel's Prime Minister Netanyahu is reportedly pushing for immediate military strikes against Iranian nuclear infrastructure following the U.S. elections.

- Iran has declared U.S. and UK naval and air forces terrorist entities in a reciprocal move following Western designations of the IRGC.

Cybersecurity & Threat Actors

- Hacking of emergency alert systems in Ukraine and Russia resulted in false chemical and nuclear attack warnings, causing mass panic.
- Supermarket freezer systems across seven European countries and Ireland were disabled by cyberattacks, leading to significant food spoilage and supply chain disruption.
- The Prince Reza Pahlavi office launched a Telegram bot ("Farzan") for direct communication, raising significant cybersecurity and data privacy concerns among users regarding the storage of personal data.

Diplomacy & Statecraft

- China has appointed a special envoy to the Middle East to mediate between Iran, Oman, and Saudi Arabia, emphasizing "de-escalation" and "sovereign defense."
- Russia's Vladimir Putin held a telephonic briefing with Iran's Mohsen Rezaei, focusing on military coordination and the regional "security architecture."
- U.S. Vice President-elect/VP J.D. Vance reportedly sent a letter to Mohsen Rezaei, which Iranian officials claim lacked "new initiatives" beyond standard U.S. demands.

Energy & Food Security

- Maritime logistics costs for oil have surged from 5% to 30% of the barrel price due to increased risk and insurance premiums.
- The UAE warns that global strategic reserves are dangerously low and calls for an immediate increase in storage capacity to prevent total market collapse.
- In the U.S., the price of basic commodities, particularly **steak and fuel**, has become a central political liability for the incumbent administration.

DEEP DIVE: TRENDS AND THEMES

The Industrialization of Indoctrination

The Iranian regime is moving beyond traditional propaganda to the **systemic militarization of the youth**. The "No-Meydan" initiative represents a strategic shift toward a "resistance-based" educational model where the school becomes a forward operating base for the Basij. By integrating carceral and surveillance logic—such as identifying "infiltrators" in neighborhoods—the state is attempting to close the "generation gap" exposed by the "Woman, Life, Freedom" movement. This suggests a long-term regime survival strategy that prioritizes ideological purity and military readiness over technical or scientific education, effectively preparing the nation for a **permanent state of siege**.

War as a Domestic Political Commodity

In both the U.S. and Israel, the Iranian conflict is being utilized as a **strategic distraction and a political wedge**. Netanyahu is leveraging the war to shore up his security credentials ahead of Israeli elections, while Trump faces the paradoxical reality that his "war to end wars" has created an economic crisis that may end his congressional majority. The "shadow" of the U.S. Midterms has created a **diplomatic paralysis**, where Iran

is intentionally stalling negotiations to deny Trump a political victory before the vote, while regional actors like Qatar and Oman are frantically trying to fill the leadership vacuum.

The Fragmentation of U.S. Social Order

The U.S. domestic environment is showing signs of **structural decay** under the weight of the war and immigration policies. The implementation of "mass deportation" operations has led to significant civil-federal tension, particularly in states like Minnesota where federal agents are clashing with local communities. The emergence of a "surveillance culture" where citizens use apps to track ICE agents suggests a widening chasm between the federal government and the populace. Concurrently, the record-breaking influx of private capital from figures like **Elon Musk** into the political process suggests a shift toward a more **oligarchic governance model**.

INTERNAL DYNAMICS & DOMESTIC INSTABILITY

Iran: Regime Paranoia and Generational Conflict

- The government is responding to the "deep gap" between the youth and the state by seizing control of schools and replacing critical thinking with "media literacy" designed to distinguish "truth from falsehood" (pro-government narratives).
- The rise of "home schools" and private education is a direct reaction to state indoctrination, as families attempt to shield children from militarized curricula.
- The public absence of Ali Khamenei for eight months has created a power vacuum increasingly filled by his son Mojtaba and high-ranking military commanders.

United States: Economic Frustration and Institutional Clashes

- Polarization has reached a point where local police and federal agents are in direct conflict over immigration enforcement and civil rights.
- The "war fatigue" among traditional Republicans (MAGA base) is growing, as they view foreign intervention as detrimental to "America First" economic goals.
- Institutional trust is being further eroded by the **hacking of domestic infrastructure** and the perceived inability of the state to protect supply chains from cyber threats.

EXTERNAL DYNAMICS & GLOBAL POSTURE

The Multi-Polar Mediation Arena

The U.S. is no longer the sole arbiter of Middle Eastern security. The active involvement of **China and Russia** in mediating the Iran crisis indicates a shift toward a multipolar diplomatic framework. China’s appointment of a special envoy and its stated support for Iran’s "right to defense" serves as a counterweight to U.S.-Israeli military pressure. Meanwhile, the UAE and Oman are increasingly acting as **independent diplomatic brokers**, seeking to preserve their economic stability regardless of the U.S. election outcome.

The European Front and Asymmetric Threats

The conflict is rapidly spilling out of the Middle East. The security incident at RAF Fairford in the UK, involving individuals with alleged ties to Iranian intelligence, suggests

the war has entered a **clandestine phase in Europe**. Iran's explicit threat that "geography will not limit" its response places European infrastructure at risk, particularly those nations hosting U.S. military bases used for operations against Iran. This has forced European leaders like Emmanuel Macron to distinguish their policies from Washington's to avoid retaliatory strikes.

THE ECONOMIC ENVIRONMENT

The global economic environment is characterized by extreme **commodity volatility and supply chain fragility**. The blockade of the Strait of Hormuz has created an energy bottleneck that has forced the U.S. to seek diesel imports from Russia, a major irony given existing geopolitical tensions. While oil prices saw a 6% temporary drop on news of Qatar's mediation, the baseline remains unstable, with maritime insurance and logistics costs tripling in some sectors. U.S. domestic markets are pricing in a high probability of a divided government, which may lead to **legislative gridlock** on spending and tariffs.

- **Oil & Gas:** Brent crude trading around $116 per barrel (after a $16 drop); global strategic reserves depleted by **1 billion barrels**.
- **Inflation:** U.S. grocery prices, specifically **meat and fuel**, are cited as the primary drivers of voter dissatisfaction.
- **War Costs:** U.S. military operations in Iran reached $47 billion; Iran's economic loss due to maritime blockade is catastrophic but unquantified.
- **Supply Chain:** European food distribution systems compromised by targeted cyberattacks on cold storage units.

LEADERSHIP CHANGES

The leadership landscape is defined by the **consolidation of military hardliners** in Iran and the **electoral vulnerability** of established leaders in the U.S. and Israel. The transition of power in Iran appears to be accelerating toward a **security-state model** under Mojtaba Khamenei, while Trump's populist mandate is being tested by the very economic forces his policies unleashed.

- **Mojtaba Khamenei:** Portrayed as the primary voice of authority for the Iranian military in the Supreme Leader's long absence; issuing "no limit" orders to commanders.
- **Donald Trump:** Facing record-low popularity; his political future depends on the outcome of the Midterms and the success of eleventh-hour diplomacy.
- **Benjamin Netanyahu:** Positioning the Iran war as his crowning achievement to secure a new mandate, despite domestic protests over judicial reform.
- **Jared Kushner / J.D. Vance:** Functioning as the primary U.S. back-channels for regional diplomacy, emphasizing the "Abraham Accords" framework for peace.

EDITORIAL POSTURE & STORY HIERARCHY

The BBC Persian broadcast maintains a **highly skeptical and analytical tone**, focusing heavily on the humanitarian and strategic costs of the U.S.-Iran conflict. The **lead stories** are consistently the U.S. Midterm elections and the Qatari-mediated talks, framed as a race against time to prevent further escalation. The network gives significant weight to the **militarization of Iranian schools**, treating it as a critical

indicator of long-term domestic instability. **Buried stories** include the ongoing internal Russian nationalist movement and the Ukrainian surrogacy industry, which are presented as human-interest pieces but lack the urgency of the Gulf conflict. **Conspicuous omissions** include any detailed reporting on the current health of Ali Khamenei, despite his eight-month absence, and a lack of data on the effectiveness of Iranian domestic opposition beyond the educational sphere.

GEOPOLITICAL FRAMING

The broadcast portrays a world in **chaotic transition**, where traditional alliances are fraying under economic pressure and the threat of total war. The U.S. is framed as a **powerful but internally fractured** actor, while Iran is seen as a **defiant and increasingly radicalized** security state. Middle Eastern mediators are portrayed as competent but desperate for a U.S. return to predictable diplomacy.

COUNTRIES

- **United States:** Framed as **inept at managing the economic fallout** of its own military strength. Quotes highlight a "cow in a china shop" approach to diplomacy, breaking systems then attempting to repair them.
- **Iran:** Portrayed as a **brutal but resilient** regime that is willing to sacrifice its youth to maintain ideological control. The state is described as a "factory for producing Hossein Fahmidehs" (child martyrs).
- **Israel:** Framed as **opportunistic and hawkish**, with Netanyahu using the war as a "winning card" in domestic elections, even as it harms U.S. economic interests.
- **China:** Portrayed as a **cautious and calculating** superpower, positioning itself as the voice of "reason" while maintaining covert support for Iran.

LEADERS

- **Donald Trump:** Characterized as **mercurial and transactional**, described by critics as a "deal junkie" who ignores institutional warnings.
- **Mojtaba Khamenei:** Framed as **aggressive and rising**, increasingly taking on the persona of a military leader.
- **Victor Orban:** Portrayed as a **fallen populist** whose defeat in Hungary serves as a "warning bell" for similar leaders worldwide.

NON-STATE & CORPORATE ACTORS

- **Basij:** Framed as a **sinister presence** in the educational system, turning schools into sites of military organizing and espionage.
- **Russkaya Obshchina:** Portrayed as a **dangerous, vigilante nationalist group** operating with potential Kremlin approval to intimidate dissenters.

INFORMATION WARFARE ENVIRONMENT

The day's reporting highlights a sophisticated **nexus of cyber-sabotage and narrative manipulation**. State actors are increasingly using **asymmetric cyber warfare** to target the psychology of civilian populations, as seen in the hacking of emergency alert apps. In Iran, the state is attempting to redefine "critical thinking" as the ability to identify "fake news" (anti-regime reporting), a clear

attempt at psychological immunization of the youth against external information. Meanwhile, the U.S. election narrative is being shaped by **massive private capital**, where billionaires like Musk are able to amplify specific partisan realities on a global scale.

HYPOTHESES AND FUTURE OUTLOOK

- **Post-Election Escalation:** If Republicans lose the House or Senate, Trump may initiate a **major military strike** on Iran before the new Congress is seated to consolidate his foreign policy "legacy" and force a rally-around-the-flag effect.
- **Strait of Hormuz Reopening:** The "Two-Day Plan" suggests Iran is reaching a breaking point economically; a **partial reopening** is likely if the U.S. allows a limited humanitarian "off-ramp" for frozen funds.
- **Domestic Unrest in Iran:** The militarization of schools indicates the regime expects a **long-term insurgency**. The "No-Meydan" program will likely trigger a massive **brain drain and domestic resistance** among parents, potentially fueling the next wave of civil disobedience.

STRATEGIC FORESIGHT

Short Term (1-4 Weeks): The immediate fallout of the U.S. Midterms will dictate the pace of the war. An Israeli-U.S. strike on Kuh-e Kolang or other nuclear sites is highly probable if election results are contested or unfavorable to the administration. Iran will likely respond with **targeted asymmetric strikes** in the Gulf or Europe to maintain deterrence.

Medium Term (1-6 Months): A new U.S. Congress will likely launch **extensive investigations** into the war's conduct and the administration's financial ties, potentially triggering a constitutional crisis. Global energy markets will remain at a premium as countries scramble to rebuild strategic reserves.

Long Term (1-5 Years): The structural shift toward **AI-driven warfare and robotic logistics** (as seen in the Waymo and robotic delivery trials) will accelerate as a means to bypass human labor shortages caused by war and aging populations. The Iranian "child soldier" generation will create a **profound societal trauma** that will define Persian politics for decades.

RISK ASSESSMENT

- **Regional War Expansion:** The risk of conflict spreading to Europe or the broader Mediterranean is high. **Triggers:** U.S. use of European bases for strikes; Iranian "no-limit" retaliation against UK/European infrastructure. **Likelihood:** Moderate. **Impact:** Severe (Global recession, NATO involvement). **Mitigations:** Direct U.S.-Iran hotline; European neutrality declarations.
- **Global Energy Collapse:** Total depletion of strategic oil reserves. **Triggers:** Sinking of a major tanker in the Strait of Hormuz; sabotage of UAE/Saudi refineries. **Likelihood:** High. **Impact:** Catastrophic. **Mitigations:** Immediate OPEC+ production increase; U.S.-Russia energy détente.

- **Iranian Domestic Implosion:** A generation of youth turned against their families by state indoctrination. **Triggers:** Full implementation of the No-Meydan program; death of the Supreme Leader. **Likelihood:** High (long-term). **Impact:** Severe (Civil war, refugee crisis). **Mitigations:** Support for secular civil society; international condemnation of child militarization.
- **U.S. Institutional Breakdown:** Conflict between federal enforcement and state-level protections. **Triggers:** Escalation of ICE operations in "sanctuary" zones; contested election results. **Likelihood:** Moderate. **Impact:** High (Civil unrest, paralysis of governance). **Mitigations:** Judicial mediation; bipartisan election integrity commissions.
- **Cyber-Physical Cascading Failure:** Targeted attacks on life-critical infrastructure. **Triggers:** Hacking of European food cold-chains or U.S. power grids. **Likelihood:** High. **Impact:** Severe (Famine, societal collapse). **Mitigations:** Hardening of IoT security; decentralized food supply models.

GAPS & BLIND SPOTS

- The broadcast fails to provide verified details on **Ali Khamenei's current physical or mental state**, leaving the true source of Iranian decision-making opaque.
- There is a lack of information regarding **internal dissent within the IRGC** or regular military, despite the aggressive threats issued by leadership.
- The impact of **Chinese economic pressure** on Iran's willingness to compress its negotiation timeline is hinted at but not detailed.
- The actual effectiveness of the **U.S. maritime blockade** in stopping covert Iranian oil exports remains unverified by third-party data.

CONTRARIAN NARRATIVE SCENARIOS

The "Managed Escalation" Hypotheses: It is possible that the U.S. and Iran are engaged in a **mutually agreed-upon theatrical conflict**. The U.S. strikes on "empty" airfields and Iran's "restricted" hits on tankers could be designed to maintain domestic power for both Trump and the Hardliners, while avoiding total war. The Qatari mediation might be the intended "exit" for both sides to declare victory after the Midterms. A **"Black Swan"** here would be an accidental mass-casualty event (e.g., a cruise ship hit) that forces a real escalation neither side wants.

The "Hollow State" Scenario: The aggressive militarization of Iranian schools and the U.S. focus on mass deportations might be masks for **imminent institutional collapse**. The states may be projecting strength abroad precisely because they have lost control of their internal bureaucracies and economies. The "Black Swan" event would be a **simultaneous collapse** of the U.S. dollar and the Iranian Rial, leading to a global barter economy and the rise of localized warlordism.

RECOMMENDATIONS & IMPLICATIONS

For Statecraft/Public Sector:

- **Security:** Prioritize the **hardening of civilian infrastructure** against asymmetric cyberattacks, particularly those targeting cold storage and emergency alert systems.
- **Diplomatic:** Utilize the **Qatari-mediated "Two-Day Plan"** as a template for a regional maritime de-escalation treaty that bypasses broader nuclear disputes.
- **Policy:** Formulate a **coordinated international response** to the militarization of education in Iran, categorizing state-mandated child military training as a human rights violation.

For Private Sector/Investors:

- **Supply Chain:** Diversify energy and logistics routes away from the Persian Gulf and toward **land-based or alternative maritime corridors** (e.g., Arctic routes, Central Asian pipelines).
- **Regulatory Compliance:** Prepare for **aggressive new sanctions** and "terrorist" designations that could impact any firm with even tangential ties to Iranian or U.S./UK military entities.
- **Capital Allocation:** Hedge against **prolonged energy inflation** and invest in "autonomous resilience" technologies, such as AI-driven supply chain management and local energy production.

LEGISLATIVE ROUNDUP

The policy environment is dominated by the **militarization of Iranian education** and U.S. **executive actions on immigration**. Significant debate exists over the U.S. President's authority to bypass Congress for war funding and the Iranian regime's disregard for international child welfare conventions.

- **BILLS DISCUSSED/DEBATED:**
  - **No-Meydan (Iran):** A joint policy between the Ministry of Education and Basij mandating military and ideological training for all students to counter "global arrogance."
  - **Mass Deportation Directive (U.S.):** An executive policy to mobilize $75 billion for the removal of 14 million undocumented individuals, including the proposed revocation of birthright citizenship.
  - **UK National Security Act:** Used to charge individuals in the RAF Fairford incident with aiding foreign intelligence services.
- **HEARINGS & PRESS EVENTS:**
  - **Araghchi Press Briefing:** Outlining the compressed 48-hour timeline for opening the Strait of Hormuz.
  - **Trump Campaign Rally (Florida):** Stating that U.S. operations against Iranian nuclear sites could be completed in 10 minutes.
  - **UN Vaccine Policy Forum:** A policy review by the UN University and Oxford researchers on achieving vaccine equity in future pandemics based on COVID-19 failures.

KEY STORIES

- **U.S. Midterm Election Eve:** Record $4 billion spent as Democrats attempt to seize the House and Senate amid Trump's 35% approval rating. High stakes for war policy and domestic stability.
- **Strait of Hormuz Deadlock:** Iran IRGC claims hitting 11 ships in 9 days; Araghchi offers a 2-day reopening plan conditional on U.S. sanctions relief.
- **Militarization of Iranian Schools:** The "No-Meydan" plan integrates weapons training for children starting at age seven, raising global human rights alarms.
- **Cyberattacks on Cold Storage:** Hacking of supermarket refrigeration units across Europe and Ireland, leading to food waste and supply chain fears.
- **RAF Fairford Security Incident:** Two men charged under the UK National Security Act for alleged Iranian-backed plots against a U.S. bomber base.
- **Emergency App Hacking:** Fake chemical and nuclear attack warnings sent to Russian and Ukrainian citizens via compromised government alert systems.
- **Mojtaba Khamenei's Rising Command:** After 8 months of the Supreme Leader's absence, Mojtaba issues orders for unlimited geographic retaliation against U.S. assets.
- **U.S. Immigration Conflict:** Clash between ICE and local communities in Minnesota; federal agents are using aggressive tactics including breaking car windows to make arrests.
- **Robotic Workforce Evolution:** Documentary analysis of AI-driven robots and driverless taxis as a response to labor shortages and economic optimization.
- **Prince Reza Pahlavi's "Farzan" Bot:** Launch of a Telegram-based campaign to organize opposition, facing criticism over data privacy and security.
- **Global Vaccine Equity Report:** UN University study suggests 100-day genetic sequencing targets could prevent millions of deaths in future pandemics.
- **Hungary's Political Shift:** Analysis of Victor Orban's downfall and the rise of Peter Magyar as a potential turning point for European populism.
- **Russkaya Obshchina Vigilantism:** Report on masked nationalist groups in Russia conducting raids on migrants and "cultural enemies" with state complicity.
- **Ukrainian Surrogacy Crisis:** Discussion on banning foreign surrogacy payments as the industry adapts to war conditions.

ABOUT THIS REPORT

Today's Media Trends is a public interest experiment in applying deep thematic trend analysis to television news coverage from around the world to explore how responsibly applied advanced AI can help journalists and scholars better understand the overarching trends, themes and patterns of our global world.

No data is used to train or tune any AI model.

Each morning, in collaboration with the Internet Archive's TV News Archive, we apply Google's Gemini 3 to deeply examine yesterday's coverage from each television news channel to tease out the overarching themes and trends of its news coverage into a richly annotated thematic analysis. Each high-level insight is connected back to the original broadcast, allowing journalists and scholars to

understand the dominate themes and trends and instantly click out to the underlying sources for details.

By helping journalists and scholars see the broader trends and patterns of global news coverage, this analysis helps them identify relevant stories and coverage they might not otherwise have encountered and uncover connections, emphases and narrative shifts that enable more comprehensive reporting and deeper, evidence-based research.

This report is entirely machine generated using Gemini 3 and may include errors and omissions. Please verify all findings. No data is used to train or tune any AI model.
