

## Bolt set RS 5 EG

Bolts sets RS 5 are used for connecting CT-type cable trays, SC and SCS joints, L-corners, T- and X-pieces. Set includes one bolt and one nut (M6x12 and M6). At the top of bolts is a square collar that holds the bolt in place at the joint when tighten nuts. Correctly installed bolt sets ensure sufficient electrical conductivity which eliminates the need to install a separate grounding wire between connected parts.
