

Cable tray

KRA-60-400 L=3000 XPG

Cable trays, non-perforated, are used in places where cables have to be totally invisible and protected underneath. KRA-type trays are typically used in office- and commercial buildings, schools, hospitals and shopping centres, but also in warehouses, parking halls and industrial buildings. To extend KRA cable trays joints RSS can be used. Joints RSS-40-100...500 have a special forming that allow to fasten these directly to wall or ceiling supports.
