**RE: 2023 Sewer Performance Annual
Report for the Town of Jamestown
WQCS 00314**

Gentlemen:

Enclosed please find the 2023 Sewer Performance Annual Report for the Town of Jamestown. We had one reportable sanitary sewer overflow on August 16, 2023 (NCDEQ Incident Number 202301184). It took staff 1 hour and 9 minutes from notification to stop this overflow as we had to bring in earth moving equipment to build a berm while we acquired materials and suitable pump-around equipment. The estimated volume of the overflow was 1,100 gallons, but the SSO did not reach surface waters.

The Town of Jamestown collects wastewater and discharges into the City of High Point wastewater collection system where treatment occurs at the Eastside WWTF.

This letter is available on the Town's website (www.jamestown-nc.gov) and at Town Hall located at 301 East Main Street. Public notices are provided in utility billings. This report is accurate and complete to the best of my knowledge. Please feel free to contact me at 336-454-1138 should you have any questions or concerns.

Respectfully,

Paul R. Blanchard, PE
Director of Public Services
