

## Safety data sheet according to Regulation (EC) No. 1907/2006

### SECTION 1. Identification of the substance/mixture and of the company/undertaking.

#### 1.1. Product identifier.

|                            |                             |
|----------------------------|-----------------------------|
| Code.                      | HI95771A-0                  |
| Product name.              | Chlorine Ultra HR Reagent A |
| Chemical name and synonym. | POTASSIUM IODIDE            |
| EC number.                 | 231-659-4                   |
| CAS number.                | 7681-11-0                   |

#### 1.2. Relevant identified uses of the substance or mixture and uses advised against.

|               |                                             |
|---------------|---------------------------------------------|
| Intended use. | Determination of Chlorine in Water Samples. |
|---------------|---------------------------------------------|

#### 1.3. Details of the supplier of the safety data sheet.

|                                                                                   |                                         |
|-----------------------------------------------------------------------------------|-----------------------------------------|
| Name.                                                                             | Hanna Instruments S.R.L.                |
| Full address.                                                                     | str. Hanna Nr 1                         |
| District and Country.                                                             | 457260 loc. Nusfalau (Salaj)<br>Romania |
|                                                                                   | Tel. (+40) 260607700                    |
|                                                                                   | Fax. (+40) 260607700                    |
| e-mail address of the competent person.<br>responsible for the Safety Data Sheet. | msds@hanna.ro                           |

#### 1.4. Emergency telephone number.

|                                |                                                                                                                     |
|--------------------------------|---------------------------------------------------------------------------------------------------------------------|
| For urgent inquiries refer to. | Emergency Number - International: +(1)-703-527-3887 - UK, London:<br>+(44)-870-8200418 - CHEMTREC 24 hours/365 days |
|--------------------------------|---------------------------------------------------------------------------------------------------------------------|

### SECTION 2. Hazards identification.

#### 2.1. Classification of the substance or mixture.

The product is classified as hazardous pursuant to the provisions set forth in EC Regulation 1272/2008 (CLP) (and subsequent amendments and supplements). The product thus requires a safety datasheet that complies with the provisions of EC Regulation 1907/2006 and subsequent amendments.

Any additional information concerning the risks for health and/or the environment are given in sections 11 and 12 of this sheet.

##### Hazard classification and indication:

|                                                                |      |                                                                 |
|----------------------------------------------------------------|------|-----------------------------------------------------------------|
| Acute toxicity, category 4                                     | H302 | Harmful if swallowed.                                           |
| Specific target organ toxicity - repeated exposure, category 1 | H372 | Causes damage to organs through prolonged or repeated exposure. |
| Skin irritation, category 2                                    | H315 | Causes skin irritation.                                         |

#### 2.2. Label elements.

Hazard labelling pursuant to EC Regulation 1272/2008 (CLP) and subsequent amendments and supplements.

Hazard pictograms:

Signal words: Danger

##### Hazard statements:

|      |                                                                 |
|------|-----------------------------------------------------------------|
| H302 | Harmful if swallowed.                                           |
| H372 | Causes damage to organs through prolonged or repeated exposure. |
| H315 | Causes skin irritation.                                         |

## SECTION 2. Hazards identification. ... / >>

### Precautionary statements:

|                  |                                                           |
|------------------|-----------------------------------------------------------|
| <b>P260</b>      | Do not breathe dust, fume, gas, mist, vapours, spray.     |
| <b>P280</b>      | Wear protective gloves.                                   |
| <b>P302+P334</b> | IF ON SKIN: Immerse in cool water / wrap in wet bandages. |
| <b>P312</b>      | Call a POISON CENTER or doctor, if you feel unwell.       |
| <b>P362</b>      | Take off contaminated clothing.                           |

**Contains:** POTASSIUM IODIDE

Nr. EC: 231-659-4

### 2.3. Other hazards.

On the basis of available data, the product does not contain any PBT or vPvB in percentage greater than 0,1%.

## SECTION 3. Composition/information on ingredients.

### 3.1. Substances.

#### Contains:

| Identification.         | x = Conc. %. | Classification 1272/2008 (CLP).                       |
|-------------------------|--------------|-------------------------------------------------------|
| <b>POTASSIUM IODIDE</b> |              |                                                       |
| CAS. 7681-11-0          | 100          | Acute Tox. 4 H302, STOT RE 1 H372, Skin Irrit. 2 H315 |
| EC. 231-659-4           |              |                                                       |
| INDEX.                  |              |                                                       |

The full wording of hazard (H) phrases is given in section 16 of the sheet.

### 3.2. Mixtures.

Information not relevant.

## SECTION 4. First aid measures.

### 4.1. Description of first aid measures.

**EYES:** Remove contact lenses, if present. Wash immediately with plenty of water for at least 15 minutes, opening the eyelids fully. If problem persists, seek medical advice.

**SKIN:** Remove contaminated clothing. Wash immediately with plenty of water. If irritation persists, get medical advice/attention. Wash contaminated clothing before using it again.

**INHALATION:** Remove to open air. In the event of breathing difficulties, get medical advice/attention immediately.

**INGESTION:** Get medical advice/attention. Induce vomiting only if indicated by the doctor. Never give anything by mouth to an unconscious person, unless authorised by a doctor.

### 4.2. Most important symptoms and effects, both acute and delayed.

For symptoms and effects caused by the contained substances, see chap. 11.

### 4.3. Indication of any immediate medical attention and special treatment needed.

Information not available.

## SECTION 5. Firefighting measures.

### 5.1. Extinguishing media.

#### SUITABLE EXTINGUISHING EQUIPMENT

The extinguishing equipment should be of the conventional kind: carbon dioxide, foam, powder and water spray.

#### UNSUITABLE EXTINGUISHING EQUIPMENT

None in particular.

### 5.2. Special hazards arising from the substance or mixture.

#### HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE

Do not breathe combustion products. The product is combustible and, when the powder is released into the air in sufficient concentrations and in the presence of a source of ignition, it can create explosive mixtures with air. Fires may start or get worse by leakage of the solid product from the container, when it reaches high temperatures or through contact with sources of ignition.

### SECTION 5. Firefighting measures. ... / >>

POTASSIUM IODIDE  
Hydrogen iodide, Potassium oxides.

#### 5.3. Advice for firefighters.

##### GENERAL INFORMATION

Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire prevention gear. Collect extinguishing water to prevent it from draining into the sewer system. Dispose of contaminated water used for extinction and the remains of the fire according to applicable regulations.

##### SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS

Normal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).

### SECTION 6. Accidental release measures.

#### 6.1. Personal precautions, protective equipment and emergency procedures.

If there are no contraindications, spray powder with water to prevent the formation of dust.

Wear suitable protective equipment (including personal protective equipment referred to under Section 8 of the safety data sheet) to prevent any contamination of skin, eyes and personal clothing. These indications apply for both processing staff and those involved in emergency procedures.

#### 6.2. Environmental precautions.

The product must not penetrate into the sewer system or come into contact with surface water or ground water.

#### 6.3. Methods and material for containment and cleaning up.

Collect the leaked product and place it in containers for recovery or disposal. If the product is flammable, use explosion-proof equipment.

If there are no contraindications, use jets of water to eliminate product residues.

Make sure the leakage site is well aired. Evaluate the compatibility of the container to be used, by checking section 10. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.

#### 6.4. Reference to other sections.

Any information on personal protection and disposal is given in sections 8 and 13.

### SECTION 7. Handling and storage.

#### 7.1. Precautions for safe handling.

Before handling the product, consult all the other sections of this material safety data sheet. Avoid leakage of the product into the environment. Do not eat, drink or smoke during use. Remove any contaminated clothes and personal protective equipment before entering places in which people eat.

#### 7.2. Conditions for safe storage, including any incompatibilities.

Store only in the original container. Store the containers sealed, in a well ventilated place, away from direct sunlight. Keep containers away from any incompatible materials, see section 10 for details.

Storage class TRGS 510 (Germany): 6.1C

#### 7.3. Specific end use(s).

Information not available.

### SECTION 8. Exposure controls/personal protection.

#### 8.1. Control parameters.

Regulatory References:

TLV-ACGIH ACGIH 2016

### SECTION 8. Exposure controls/personal protection. ... / >>

#### POTASSIUM IODIDE

##### Threshold Limit Value.

| Type      | Country | TWA/8h    | STEL/15min |
|-----------|---------|-----------|------------|
|           |         | mg/m3 ppm | mg/m3 ppm  |
| TLV-ACGIH |         |           | 0,01       |

##### Predicted no-effect concentration - PNEC.

|                                              |       |       |
|----------------------------------------------|-------|-------|
| Normal value in fresh water                  | 0,007 | mg/l  |
| Normal value for fresh water sediment        | 0,007 | mg/kg |
| Normal value for water, intermittent release | 0,075 | mg/l  |

##### Health - Derived no-effect level - DNEL / DMEL

| Route of exposure | Effects on consumers. |                |               |                    | Effects on workers |                |               |                    |
|-------------------|-----------------------|----------------|---------------|--------------------|--------------------|----------------|---------------|--------------------|
|                   | Acute local           | Acute systemic | Chronic local | Chronic systemic   | Acute local        | Acute systemic | Chronic local | Chronic systemic   |
| Oral.             |                       |                | VND           | 0,01<br>mg/kg bw/d |                    |                |               |                    |
| Inhalation.       |                       |                | VND           | 0,035<br>mg/m3     |                    |                | VND           | 0,07<br>mg/m3      |
| Skin.             |                       |                | VND           | 1<br>mg/kg bw/d    |                    |                | VND           | 1<br>mg/kg<br>bw/d |

##### Legend:

(C) = CEILING ; INHAL = Inhalable Fraction ; RESP = Respirable Fraction ; THORA = Thoracic Fraction.  
VND = hazard identified but no DNEL/PNEC available ; NEA = no exposure expected ; NPI = no hazard identified.

### 8.2. Exposure controls.

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration. Personal protective equipment must be CE marked, showing that it complies with applicable standards.

Provide an emergency shower with face and eye wash station.

Exposure levels must be kept as low as possible to avoid significant build-up in the organism. Manage personal protective equipment so as to guarantee maximum protection (e.g. reduction in replacement times).

#### HAND PROTECTION

In the case of prolonged contact with the product, protect the hands with penetration-resistant work gloves (see standard EN 374).

Work glove material must be chosen according to the use process and the products that may form. Latex gloves may cause sensitivity reactions.

#### SKIN PROTECTION

Wear category III professional long-sleeved overalls and safety footwear (see Directive 89/686/EEC and standard EN ISO 20344). Wash body with soap and water after removing protective clothing.

#### EYE PROTECTION

Wear airtight protective goggles (see standard EN 166).

In the presence of risks of exposure to splashes or squirts during work, adequate mouth, nose and eye protection should be used to prevent accidental absorption.

#### RESPIRATORY PROTECTION

Use a type P filtering facemask (see standard EN 149) or equivalent device, whose class (1, 2 or 3) and effective need, must be defined according to the outcome of risk assessment.

#### ENVIRONMENTAL EXPOSURE CONTROLS.

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

### SECTION 9. Physical and chemical properties.

#### 9.1. Information on basic physical and chemical properties.

|                                 |                      |
|---------------------------------|----------------------|
| Appearance                      | solid powder         |
| Colour                          | ivory                |
| Odour                           | odourless            |
| Odour threshold.                | Not available.       |
| pH.                             | 6.8 - 7.2 pH, 13 g/L |
| Melting point / freezing point. | 723 °C.              |
| Initial boiling point.          | Not applicable.      |
| Boiling range.                  | Not available.       |
| Flash point.                    | Not applicable.      |
| Evaporation rate                | Not available.       |
| Flammability (solid, gas)       | Not available.       |
| Lower inflammability limit.     | Not available.       |
| Upper inflammability limit.     | Not available.       |

| VOC (volatile carbon) :      | 0        |

### SECTION 10. Stability and reactivity.

#### 10.1. Reactivity.

There are no particular risks of reaction with other substances in normal conditions of use.

#### 10.2. Chemical stability.

The product is stable in normal conditions of use and storage.

POTASSIUM IODIDE

May decompose on exposure to air and moisture. Stable under recommended storage conditions.

#### 10.3. Possibility of hazardous reactions.

The powders are potentially explosive when mixed with air.

#### 10.4. Conditions to avoid.

Avoid environmental dust build-up.

POTASSIUM IODIDE

Tin/tin oxides.

#### 10.5. Incompatible materials.

POTASSIUM IODIDE

Strong reducing agents, Nickel, Strong acids, and its alloys, Steel (all types and surface treatments), Aluminum, Alkali metals, Brass, Magnesium, Zinc, cadmium, Copper.

#### 10.6. Hazardous decomposition products.

Information not available.

### SECTION 11. Toxicological information.

In the absence of experimental data for the product itself, health hazards are evaluated according to the properties of the substances it contains, using the criteria specified in the applicable regulation for classification.

It is therefore necessary to take into account the concentration of the individual hazardous substances indicated in section 3, to evaluate the toxicological effects of exposure to the product.

#### 11.1. Information on toxicological effects.

POTASSIUM IODIDE

Skin corrosion/irritation, Skin, rabbit, Result: Irritating to skin - Serious eye damage/eye irritation, Eyes, rabbit, Result: Irritating to eyes, 24 h, (Draize Test) - Respiratory or skin sensitisation, Prolonged or repeated exposure may cause allergic reactions in certain sensitive individuals - Reproductive toxicity, Exposure to excessive amounts of iodine during pregnancy is capable of producing fetal hypothyroidism, Iodine-containing drugs have been associated with fetal goiter - Additional Information, Prolonged exposure to iodides may produce iodism in sensitive individuals. Symptoms of exposure include: skin rash, running nose, headache and irritation of the mucous membrane. For severe cases the skin may show pimples, boils, hives, blisters and black and blue spots. Iodides are readily

### SECTION 11. Toxicological information. ... / >>

diffused across the placenta. Neonatal deaths from respiratory distress secondary to goiter have been reported. Iodides have been known to cause drug-induced fevers, which are usually of short duration, Liver, Irregularities, Based on Human Evidence.

#### ACUTE TOXICITY.

|                                                     |                                            |
|-----------------------------------------------------|--------------------------------------------|
| LC50 (Inhalation - vapours) of the mixture:         | Not classified (no significant component). |
| LC50 (Inhalation - mists / powders) of the mixture: | Not classified (no significant component). |
| LD50 (Oral) of the mixture:                         | 1000,000 mg/kg                             |
| LD50 (Dermal) of the mixture:                       | Not classified (no significant component). |

#### POTASSIUM IODIDE

|              |                  |
|--------------|------------------|
| LD50 (Oral). | 1000 mg/kg Mouse |
|--------------|------------------|

#### SKIN CORROSION / IRRITATION.

Causes skin irritation.

#### SERIOUS EYE DAMAGE / IRRITATION.

Does not meet the classification criteria for this hazard class.

#### RESPIRATORY OR SKIN SENSITISATION.

Does not meet the classification criteria for this hazard class.

#### GERM CELL MUTAGENICITY.

Does not meet the classification criteria for this hazard class.

#### CARCINOGENICITY.

Does not meet the classification criteria for this hazard class.

#### REPRODUCTIVE TOXICITY.

Does not meet the classification criteria for this hazard class.

#### STOT - SINGLE EXPOSURE.

Does not meet the classification criteria for this hazard class.

#### STOT - REPEATED EXPOSURE.

Causes damage to organs.

#### ASPIRATION HAZARD.

Does not meet the classification criteria for this hazard class.

### SECTION 12. Ecological information.

Use this product according to good working practices. Avoid littering. Inform the competent authorities, should the product reach waterways or contaminate soil or vegetation.

#### **12.1. Toxicity.**

##### POTASSIUM IODIDE

Toxicity to daphnia and other aquatic invertebrates, EC50, Daphnia: 2,7 mg/l - 24 h.

##### POTASSIUM IODIDE

|                  |                                   |

| LC50 - for Fish. | 2190 mg/l/96h Oncorhynchus mykiss |
|------------------|-----------------------------------|

#### **12.2. Persistence and degradability.**

##### POTASSIUM IODIDE

|                        |              |
|------------------------|--------------|
| Solubility in water.   | > 10000 mg/l |
| Rapidly biodegradable. |              |

#### **12.3. Bioaccumulative potential.**

##### POTASSIUM IODIDE

|                                         |        |
|-----------------------------------------|--------|
| Partition coefficient: n-octanol/water. | -0,958 |
| BCF.                                    | 2,268  |

### SECTION 15. Regulatory information. ... / >>

Substances in Candidate List (Art. 59 REACH).

On the basis of available data, the product does not contain any SVHC in percentage greater than 0,1%.

Substances subject to authorisation (Annex XIV REACH).

None.

Substances subject to exportation reporting pursuant to (EC) Reg. 649/2012:

None.

Substances subject to the Rotterdam Convention:

None.

Substances subject to the Stockholm Convention:

None.

Healthcare controls.

Workers exposed to this chemical agent must not undergo health checks, provided that available risk-assessment data prove that the risks related to the workers' health and safety are modest and that the 98/24/EC directive is respected.

German regulation on the classification of substances hazardous to water (VwVwS 2005).

WGK 1: Low hazard to waters

Substance listed in Annex 2.

### 15.2. Chemical safety assessment.

No chemical safety assessment has been processed for the mixture and the substances it contains.

### SECTION 16. Other information.

Text of hazard (H) indications mentioned in section 2-3 of the sheet:

|                      |                                                                    |
|----------------------|--------------------------------------------------------------------|
| <b>Acute Tox. 4</b>  | Acute toxicity, category 4                                         |
| <b>STOT RE 1</b>     | Specific target organ toxicity - repeated exposure, category 1     |
| <b>STOT RE 2</b>     | Specific target organ toxicity - repeated exposure, category 2     |
| <b>Skin Irrit. 2</b> | Skin irritation, category 2                                        |
| <b>H302</b>          | Harmful if swallowed.                                              |
| <b>H372</b>          | Causes damage to organs through prolonged or repeated exposure.    |
| <b>H373</b>          | May cause damage to organs through prolonged or repeated exposure. |
| <b>H315</b>          | Causes skin irritation.                                            |

#### LEGEND:

- ADR: European Agreement concerning the carriage of Dangerous goods by Road
- CAS NUMBER: Chemical Abstract Service Number
- CE50: Effective concentration (required to induce a 50% effect)
- CE NUMBER: Identifier in ESIS (European archive of existing substances)
- CLP: EC Regulation 1272/2008
- DNEL: Derived No Effect Level
- EmS: Emergency Schedule
- GHS: Globally Harmonized System of classification and labeling of chemicals
- IATA DGR: International Air Transport Association Dangerous Goods Regulation
- IC50: Immobilization Concentration 50%
- IMDG: International Maritime Code for dangerous goods
- IMO: International Maritime Organization
- INDEX NUMBER: Identifier in Annex VI of CLP
- LC50: Lethal Concentration 50%
- LD50: Lethal dose 50%
- OEL: Occupational Exposure Level
- PBT: Persistent bioaccumulative and toxic as REACH Regulation
- PEC: Predicted environmental Concentration
- PEL: Predicted exposure level
- PNEC: Predicted no effect concentration
- REACH: EC Regulation 1907/2006
- RID: Regulation concerning the international transport of dangerous goods by train
- TLV: Threshold Limit Value
- TLV CEILING: Concentration that should not be exceeded during any time of occupational exposure.

### SECTION 16. Other information. ... / >>

- TWA STEL: Short-term exposure limit
- TWA: Time-weighted average exposure limit
- VOC: Volatile organic Compounds
- vPvB: Very Persistent and very Bioaccumulative as for REACH Regulation
- WGK: Water hazard classes (German).
