Introduction

Welcome to Dexbet.

Dexbet is an online betting platform built on a decentralized infrastructure using cryptocurrencies and publicly verifiable through blockchain.

Dissatisfied with the current state of the betting market, [Dexbet.win](https://dexbet.win) was developed using blockchain technology to provide a transparent and verifiable platform. Every transaction on the blockchain can be checked by anyone with internet access, ensuring that Dexbet is safe, fair, and enjoyable for all users.

Dexbet is a straightforward, secure, and anonymous casino game market that allows players to bet using CHIPS tokens, enabling a revolutionary Multichain Crypto Casino experience. This platform leverages the power of blockchain to offer unparalleled security, as well as a level of transparency and fairness that traditional casinos cannot match.

With Dexbet, players can rest assured that their bets are being processed in a trustworthy and reliable environment. The platform is designed to be easy to use, providing a seamless user experience that allows players to focus on the excitement of the games. Overall, Dexbet represents a new era in online betting, one that is built on trust, fairness, and innovation.

Dexbet.win is not only a great platform for players who love casino games but also for those who are passionate about coding and game creation. In the Web 3.0 era, transparency is key, and Dexbet's blockchain technology provides just that.

With a focus on providing a complete Web 3.0 experience, Dexbet ensures transparency in all forms of gaming. The platform's use of blockchain technology allows anyone to verify the fairness of the games, from players to developers. This not only promotes trust between players and the platform but also encourages developers to create even more innovative and exciting games.

Web 3.0 gives us the freedom to create transparent betting games.

The idea behind Dexbet was born from the freedom to create and develop clean and fair games. Therefore, nothing is more fair than choosing a blockchain with the same parameters to base the code and implementation of the gameplay.

Through a code competition hackathon organized by Klever - a technology hub focused on the world of cryptocurrencies and blockchain services - the Dexbet team was challenged to create an innovative product built on KleverChain, the newest layer 1 blockchain launched by Klever Finance.

On KleverChain, anyone can build.

The challenges posed by Klever only made us more sure that this blockchain was the most correct and fair for our endeavor. Finally, we emerged as the winners of the Klever Global Hackathon 2022 with the Dexbet project.

Dexbet was created by people who, like you, are prepared for everyday challenges with the courage and strength necessary to win. After all, we play games too and we love to experience the opportunities that this great market has to offer.

The possibilities are endless as a betting game and that's why the Dexbet team is constantly updating and transforming what is already a consolidated product into something much better, grander and more complete for the market.

Dexbet is safe, fair, and fun.

With this thirst for victory and growth, our community comes together to build products with great gameplay that promote fun and joy.

The community is an essential part of our creative process, and we use the community's suggestions to develop new games and constantly implement UI and UX improvements.

It is in the nature of our team to be committed to the community and the people who play the games offered by Dexbet.

The core premise that led us to create the games is to be verifiable and trustworthy.

Being verifiable is key.

With a simple search in the KleverChain Blockchain Explorer, the player can have the information to analyze the transaction and understand why it happened, how the game performed, and the status of the bet.

Dexbet engine uses block hash and the random seed of the block that your bet entered to validate the play and generate a unique Magic Number. You can get this information on the Explorer kleverscan.org using the transaction hash from your bet.

You can calculate the Magic Number by getting the block hash and the random seed, converting both to decimal, adding them together, and then applying modulus to the result using the maximum number of ranges that the game supports, for example, dice 100, and wheel 54. The result will be the placement or the number rolled on the bet.

We understand that this calculation might appear complex, which is why we've implemented a Verify System on our website. You can find more details about it in the [section just below](#).

Having a platform confirming that the game happened fairly raises the level of confidence in the project and the game itself.

Our betting results are fully verified on the blockchain. We calculate the Magic Number using the block hash and random seed provided by KleverChain blocks.

If your favorite betting game is not on Dexbet, you should simply review your favorite game concept.

Our Team

At Dexbet, the team believes that a successful platform is built on the foundation of a great team. The team consists of four individuals who are close friends, with a new addition bringing a fresh perspective and youthful energy to the group. Each member of the team possesses the courage to take risks, a clear objective, a passion for their work, and an unwavering willpower to succeed.

The core team at Dexbet is highly skilled and experienced in creating programming codes that push the boundaries of what is possible. They have experience in blockchain programming from large companies and a track record of delivering high-quality applications across various fields. Their dedication to staying on the cutting edge of the coding world ensures that the platform is always at the forefront of technological advancements.

The team members are passionate about their work and never tire of studying and seeking knowledge and updates to improve their craft. Their friendship and shared vision provide a strong foundation for Dexbet's success. As the platform continues to evolve, the team remains committed to delivering a transparent, fair, and innovative gaming experience to its users.

An otherworldly friendship that turned into a great undertaking.

The creativity that involves thinking heads led us to Dexbet, where we were able to put into practice both cognitive and practical skills to create a betting platform that enshrines the will of all partners: an enterprise that provides safe and adrenaline-guided fun for success.

Team Members

The Decentralized (CEO) - Holding a degree in Computer Science, has spent over 15 years coding and has amassed a wealth of experience in Blockchain technology. It's highly knowledgeable and skilled in this field and is truly passionate about the pursuit of knowledge and scientific discovery. However, it should be noted that while it possesses a strong sense of conviction in its beliefs, it's also open-minded and willing to listen to others' ideas.

The Lucky (CTO) - Coding since the age of 16 and possesses an exceptional aptitude for learning and a thirst for new experiences. Its genius-level intellect extends well beyond the realm of computing, making it an invaluable member of the team. It possesses a wealth of knowledge and is always eager to explore new frontiers.

The Money (CFO) - Bringing a unique blend of economics and computing expertise to the table, making it an ideal candidate for the role of CFO. Its ability to quickly learn and adapt to new technologies is remarkable, and its spreadsheet skills are second to none. It possesses

a deep understanding of cryptocurrencies and the economic principles that underpin it, making it a key player in the organization's financial decision-making processes.

The Gaming (COO) - As an expert in planning and proactive team building, is well-suited for the role of COO. Its passion for computer science, combined with its exceptional performance at the university level, make it an exceptional asset to the team. It possesses a keen understanding of the importance of teamwork and is dedicated to ensuring that the organization operates as smoothly and efficiently as possible.

Fernando Sobreira - Blockchain Advisor

Partnership

Choosing to build Dexbet within the Klever Blockchain opened many doors for the project to grow naturally and organically. With a consolidated and active community throughout Klever's products and social networks, Dexbet has become relevant among those interested in the game, the idea, and the project's future.

With greater visibility of the platform at the end of the Klever Blockchain 2022 Hackathon awards, transactions made on the blockchain from Dexbet gained a lot of notability, creating the desired partnership.

Sharing the same goals and visions with Klever makes the partnership inevitable.

The leveraging power of a global company like Klever is unquestionable, and being able to count on the Klever ecosystem to make Dexbet grow makes the possibility of starting a revolution in the cryptocurrency betting market even more real.

By utilizing the Klever technology stack, workforce, community and ecosystem, we have the potential to create an entire decentralized betting ecosystem that is fair and verifiable for all users.

Klever Foundation is not only Dexbet's partner but also an incubator of our project, providing structure and viability for it to happen.

Games

Dexbet Casino

According to recent [research](#) data from Grand View Research on the subject, the global online betting market size was valued at USD 57.54 billion in 2021 and is expected to expand at a compound annual growth rate (CAGR) of 11.7% from 2022 to 2030.

Knowing this data for the fiat currency market, we can have a similar projection for the cryptocurrency world with the growth of Web 3.0 penetration in people's lives. This is mainly due to the transparency, reliability, and verifiability promoted by this technology via blockchain.

Dexbet's plan for the Casino is to surf this growing wave of the growing market so that the project becomes, in addition to being profitable, an excellent hub of innovation, enjoyment, and fair bets for players.

With the value of community-oriented growth, we intend to add new games to the Casino, improve the games already implemented, and constantly adapt to the betting and gameplay market.

Under French denomination, the word casino can mean "house of pleasure", which is how we intend to manage Dexbet. In addition to a platform that creates and provides betting games, we want games to promote joy and fun.

Verify System

Dexbet Casino is built on the foundation of provably fair gaming, made possible by blockchain technology. Being built on the Kleverchain platform sets our primary goal of ensuring secure and transparent transactions, all of which can be easily verified through the user-friendly Klever Scan tool. This blockchain explorer, provided by Kleverchain, offers a comprehensive overview of transaction details within the network.

Each game featured on Dexbet is meticulously crafted to operate on blockchain principles, setting them apart from mere copies stored in conventional databases. Our utmost priority is to ensure that every game comes equipped with a Kleverscan-verified Magic Number, a feat achieved through a sophisticated algorithm.

The Magic Number, a direct reflection of a player's wager outcome, is generated through a random amalgamation of the transaction block's hash and the block's random seed. Our algorithm computes this Magic Number by converting both the block hash and random seed into decimal format, summing them up, and then applying a modulus operation to the result.

This modulus operation is conducted using the maximum range supported by the specific game, such as dice (100) or wheel (54). The resulting value indicates the final placement or rolled number for the given bet.

While the Random Seed and Block Hash can be conveniently accessed via kleverscan.org, we understand that performing the calculation might pose a challenge for some users. To address this, we have developed the [Verify System](#), designed to leverage the game-specific algorithm for displaying accurate bet results.

Upon inputting the Hash of the bet into the Verify System, the tool automatically extracts the necessary data to execute the calculation process. It then promptly presents the Magic Number, assigns it to the respective position, and generates a faithful simulation of the original bet.

This simulated representation mirrors the player's initial Hash, which can be found in the "My Bets" section of each game, as visually demonstrated in the image below.

Player	Balls - Rows - Risk
k1v1ha5...qjheetf	1 - 8 - LOW
Bet Amount	Payout
200	200
Asset	Hash
KLV	278a1...7fec3

The [Verify System](#) stands as an incontrovertible testament to the credibility of all gaming actions. It offers unwavering proof, cementing the principles of fairness and transparency that underscore the entire Dexbet experience.

Starter Games

Dice

The game basically consists of a 100-sided die, where to win the bet, it's necessary to try to guess which number this die will draw between the betting options of 0 and 99.

Here's a breakdown of the game mechanics:

Over/Under Betting Options: To enhance your chances, you can bet on a range of numbers either over or under a certain threshold. For instance, betting 'under 50' pays off if the die lands on any number below 50. Similarly, betting 'over 50' wins if the die lands on any number above 50.

Risk vs. Reward: The game ingeniously balances risk with reward. The more specific and narrow your bet, the lower your odds of winning. However, the potential payout increases significantly with the risk. For example, betting that the die will land under 1

gives you a 1% chance of winning, but if luck is on your side, your winnings will be multiplied by a staggering 98.5x.

This 100-sided die game is a perfect blend of chance, strategy, and anticipation. Each roll is a new opportunity for victory or an invitation to try again. Will you play it safe or aim for the high multipliers? The choice is yours in this enthralling game of predictions and fortune.

The magic number, or the number drawn, is randomly generated by combining the transaction block's hash with the block's random seed; this information can be found on kleverscan.org and you can verify the result of your bet using dexbet.win/verify.

Wheel

The Wheel is a game of luck with numbers from 0 to 53 divided into four colors.

Each color has a chance of being hit, and this probability will define the bet's multiplier:

26 numbers painted cyan, with 2x bet multiplier;
17 numbers painted magenta, with 3x bet multiplier;
10 numbers painted yellow, with 5x bet multiplier;
1 number painted green, with 50x bet multiplier;

In order to win, you just need to hit the number on which the roulette will draw. As all bets are based on transaction blocks, it is necessary to wait for the block to be formed for the roulette wheel to spin, which takes around 12 seconds.

As for the dice game, the Magic Number will be the hash combination of the transaction block with the random seed of the block; this information can be found on kleverscan.org and you can verify the result of your bet using dexbet.win/verify.

Mines

Mines is a game reminiscent of the classic Minesweeper but with a sparkling twist. In this game, a field laden with diamonds conceals hidden bombs, and your goal is to unearth the treasures without triggering an explosion.

Here's your guide to navigating the minefield:

Select the Danger Level: Your first move is to choose the number of bombs hidden in the field. This crucial decision determines the risk and sets the stage for potential rewards.

Increase the Stakes: Boost the excitement by increasing the number of diamond click suggestions. The more diamonds you aim to uncover, the higher the stakes.

Understand the Multipliers:

By selecting fewer bombs and suggesting where more diamonds are, you create a challenging yet potentially rewarding scenario. For instance, opting for four bombs and pinpointing ten diamonds can skyrocket your bet multiplier to almost 10x.

The prize multiplier scales with the game's difficulty. The more perilous your choices, the greater the potential multiplier, soaring up to an exhilarating 300x.

Winning the Game: Your victory lies in avoiding the mines. Successfully navigating through the diamonds without a single misstep means triumph and an impressive payout.

Mines is an exhilarating game that entices players with its blend of strategy, suspense, and potential high rewards. Are you ready to test your luck and intuition in the minefield, where every click can lead to dazzling victories or unexpected surprises? Dive into "Mines" and discover if fortune favors the bold!

In the same way as all the other games, you can verify the bomb placement by the Magic Number, which is the transaction block's hash with the block's random seed; this information can be found on kleverscan.org and you can verify the result of your bet using dexbet.win/verify.

Plinko

Plinko, a game where you hold the reins of destiny with every cascading ball. This game melds strategy with serendipity, offering a captivating and interactive experience.

Here's how to step into the intriguing world of Plinko:

Set Your Strategy: Start by selecting the number of Lines and the quantity of Balls you wish to drop. This initial choice lays the foundation for your game.

Choose Your Risk Level: Define your gameplay style by choosing the Risk option. This crucial decision determines the multiplier slot and consequently affects the payout. The higher the risk, the greater the potential reward, but the trickier it is for the ball to land in the coveted target area.

Place Your Bet and Drop: Once your strategy is set and your bet is placed, it's time to drop the balls. Watch with bated breath as they make their journey down the board, bouncing and tumbling towards the target areas.

Multiply Your Payout: Each successful drop multiplies your payout, turning every tumble into a potential windfall. The more lines you play, the more opportunities you have to win, but remember – the payouts vary based on the difficulty of the ball's landing.

Plinko is an enthralling game that appeals to both seasoned gamblers and newcomers alike. Its blend of strategy and chance ensures that every drop is a new adventure. Are you ready to control your fate and see where the balls fall in the mesmerizing game of Plinko?

In the same way as all the other games, you can verify the ball placement by the Magic Number, which is the transaction block's hash with the block's random seed; this information can be found on kleverscan.org. Or you can simply use dexbet.win/verify.

Coin Flip

Coin Flip lets you put your luck to the test by guessing the outcome of a coin toss. The goal is to correctly predict which side of the coin will land face up, whether it's Heads (represented by a Golden coin) or Tails (represented by a Silver coin).

Here's how you can join in on the fun:

Choose the Number of Coins: Decide how many coins you want to flip. More coins mean more chances and more excitement!

Select Your Side: The coin features two sides – Heads, symbolized by a Golden Coin, and Tails, represented by a Silver Coin.

Set Your Winning Coin Count: Determine the minimum number of coins that must show your chosen side (Golden for Heads, Silver for Tails) to win. This number is set by you and can vary based on the total number of coins you're flipping.

Place Your Bet: Decide on the amount you'd like to wager on this toss of fate. Whether you're feeling confident or just taking a casual guess, your bet sets the stage for the potential win.

Flip the Coin: Once you've made your selection and placed your bet, it's time to set the coin spinning. Click the "Coin Flip" button to send the coin twirling into the air.

Await the Outcome: Watch with anticipation as the coin tumbles back to earth, revealing its chosen side. If the side you picked matches the outcome, congratulations – you win the pot!

Coin Flip offers a thrilling gaming experience, making it a perfect pick for both seasoned gamblers and first-time players. Its ease of play combined with the excitement of a potential win makes Coin Flip an endlessly enjoyable game. So, are you ready to put your luck to the test and see which side the coin lands on?

You can also verify the toss by the Magic Number, which is the transaction block's hash with the block's random seed; this information can be found on kleverscan.org. Or you can simply use dexbet.win/verify.

Rocket

Prepare for liftoff with Rocket, an exhilarating and fast-paced game where anticipation meets strategy. In this thrilling game, your mission is to bet on the altitude a rocket will reach before it crashes back down. Every launch is a blend of suspense and potential rewards.

Here's how you can navigate the skies with Rocket:

Set Your Stakes: Place your bet along with a chosen multiplier. This multiplier represents the height you predict the rocket will achieve before it crashes. With a range from a minimum of 1.05x to a maximum of 1000x, the sky is literally the limit, offering a wide spectrum of betting possibilities.

Launch and Watch: Once the rocket is launched, it ascends to a height represented by a multiplier number. Keep your eyes on the rocket as it soars; the higher it climbs, the higher the potential win.

Winning and Losing: If the rocket reaches or exceeds the height of the multiplier you've chosen, congratulations! You win your initial bet amount, multiplied by the chosen multiplier. But beware, if the rocket falls short of your predicted height, the bet is lost.

Rocket is a game that masterfully combines elements of strategy and luck. You have the freedom to tailor your bets according to your preferred risk level, making each launch a unique and thrilling experience. Will you play it safe or reach for the stars? The choice is yours in the exhilarating game of Rocket!

Like with other Dexbet games, you can check the outcome of your play by using the Magic Number. You can find it by looking up this information on kleverscan.org and you can verify the result of your bet using dexbet.win/verify.

Boxes

Embark on a thrilling journey with Boxes, a blockchain-based game that blends strategy and luck in an intriguing game of lines. This captivating game offers three levels of difficulty: Easy, Medium, and Hard, catering to players of all skill levels.

In Boxes, the stakes are high, and your strategic choices determine your success. The game operates on a simple yet exhilarating principle:

Choose Your Challenge: Select your preferred difficulty level, which influences the distribution of diamonds and bombs on each line. The difficulty options are:

- Easy
- Medium
- Hard

Place Your Bet: Decide on the number of lines you want to wager. The more lines you bet on, the higher the win multiplier. Remember, each line is a new opportunity but also a new risk.

Play and Uncover: Once your bet is set, click “play” to begin. The game reveals a randomly generated pyramid configuration filled with diamonds and bombs. Your goal is to pinpoint the location of the diamond in each line while skillfully avoiding the bombs.

Winning and Losing: If you successfully reveal the diamond, you win the bet for that line. However, if you encounter a bomb, it's game over for that line.

An essential feature of Boxes is its flexibility. Players aren't required to commit to all lines at once; you can start with just one selected line and progress from there. This adaptable approach allows you to tailor the game to your personal strategy and pace.

In Boxes, each decision counts, and each line holds the potential for triumph or defeat. Will you uncover the diamonds or stumble upon the bombs? The choice and challenge are yours!

Like with other Dexbet games, you can check the outcome of your play by using the Magic Number. You can find it by looking up this information on kleverscan.org and you can verify the result of your bet using dexbet.win/verify.

Lottery

The Dexbet Lottery is an engaging, blockchain-based game where players have the option to select a set of numbers ranging from 15 to 20 per ticket. It's noteworthy that the cost of the ticket increases with the number of numbers chosen.

Players can make their selections of numbers manually, adding their choices to a virtual cart. For those who relish unpredictability or are seeking a quicker selection process, a “Surprise” feature is at their disposal, generating random sets of numbers.

Participants are advised to review their bets prior to submitting the transaction. It's important to note that each transaction can encompass up to 100 games.

At the core of the Lottery is the dynamic lottery pool, a progressively accumulating fund fed by each ticket purchase. This pool constitutes the prize money for the fortunate winners. The drawing mechanism of the lottery involves the random selection of 15 numbers in each round. Those who successfully match more than 11 of these drawn numbers are crowned winners, earning a rightful claim to a share of the prize pool.

Prize distribution is as follows:

62% of the pool: Awarded to players matching all 15 numbers.

13% of the pool: Allocated to players with 14 matches.

3% of the pool: Given to players matching 13 numbers.

2% of the pool: For players with 12 matches.

1% of the pool: Distributed to players who match 11 numbers.

To keep things exciting, the remaining 19% is rolled over to the pool for the next draw.

If there are multiple winners in a category, the prize is split equally. If no one wins in a category, the funds roll over to the next draw, increasing potential winnings.

Like with other Dexbet games, you can check the outcome of your play by using the Magic Number. You can find it by looking up this information on kleverscan.org and you can verify the result of your bet using dexbet.win/verify.

Blackjack

If you're passionate about Blackjack, get ready to dive into one of the most beloved card games. In Blackjack, the primary goal is to create a hand with a value as close to 21 as possible, without going over. Additionally, you win if the dealer busts (goes over 21). Rounds are played with 8 decks of cards, and the dealer stops drawing cards once they reach a value of 17.

When the cards are dealt, you have several options, each with its own costs and rules:

Hit: Request an additional card to try and get closer to 21.

Cost: Free.

Restriction: Not available if you have a split Ace.

Stand: Keep your cards as they are.

Cost: Free.

Note: If you hit 21, you automatically stand.

Split: Split your first two cards of the same value into two separate hands.

Cost: An additional bet equal to the initial one.

Restrictions: Can only be done once. You play each hand separately, receiving one additional card for each.

Double Down: Double your bet after receiving your first two cards.

Cost: An additional bet equal to the initial one.

Restrictions: Can only be used once. You will receive only one more card to complete your hand.

Insurance: Place a side bet when the dealer's first card is an Ace.

Cost: Half of your initial bet.

Outcome: If the dealer has a blackjack, you win 2 to 1 on your insurance bet, and the round ends. Otherwise, you lose your insurance bet. Insurance outcomes are revealed at the end of the round due to the game's blockchain nature.

Regarding payouts, if you hit 21 in the card distribution, you receive a payout of 1.5 times your bet (3 to 2). In other cases, the payout is 1 time the bet.

In summary, Blackjack offers a mix of strategy, luck, and decision-making. Each move, be it Hit, Stand, Split, Double Down, or Insurance, brings its own nuances and opportunities. Remember that Hit and Stand options are free, while Double Down and Split require additional bets. Insurance is a side bet that can protect you against a potential blackjack from the dealer.

Like with other Dexbet games, you can check the outcome of your play by using the Magic Number. You can find it by looking up this information on kleverscan.org and you can verify the result of your bet using dexbet.win/verify.

Scratch Card Games

Prepare to immerse yourself in the exhilarating world of Scratch Cards, where each card brings a chance for instant excitement and wins!

The game is straightforward yet thrilling: if you reveal three matching numbers on your card, you're a winner! Additionally, a top prize awaits those lucky enough to uncover three specially selected items printed on the card.

To embark on this engaging journey and uncover the joys that Scratch Cards have to offer, follow these simple steps:

Select Cards: Begin by deciding how many cards you wish to play with.

Turbo Mode: For those who choose more than one card, the Turbo option becomes available. Activate it to reveal results at a much faster pace, perfect for those seeking instant gratification.

Purchase and Play: Click on the "Buy Card" button to initiate the game. Once your card is purchased, you can start scratching to reveal the hidden symbols and numbers.

Remember, each Scratch Card holds the potential for surprise and delight. Whether you're seeking a quick game or a series of scratches, the simplicity and instant rewards of Scratch Cards make it a favorite for many.

Like with other Dexbet games, you can check the outcome of your play by using the Magic Number. You can find it by looking up this information on kleverscan.org and you can verify the result of your bet using dexbet.win/verify.

Penalty

Immerse yourself in the adrenaline-fueled world of the Penalty game, where your sharpshooting skills and tactical prowess are the keys to victory and handsome rewards. Step up to the penalty spot, set your sights, and brace yourself for a showdown against the goalkeeper.

Here's how you can score big in the Penalty game:

Choose Your Target: You're presented with 5 different spots in the goal to aim your shot. Select your preferred location carefully; it's a mind game against the goalkeeper.

Place Your Bet: Once you've picked your spot, it's time to place your bet. Lock in your choice and get ready for the moment of truth.

Take the Shot: As you take the shot, tension mounts. If the ball sails past the goalkeeper and into the net, you score and your bet multiplier increases. Success takes you to the next level, heightening the excitement.

Progress Through Levels: The game comprises 5 exhilarating levels. Each successful goal not only increases your multiplier but also propels you to the next stage, amplifying the stakes and rewards.

Cash Out or Risk More: At any point, you can choose to cash out your winnings. But with every goal, the temptation grows to keep playing for even bigger multipliers.

But remember, in the world of Penalty, fortunes can shift in an instant. If the goalkeeper dives the right way and saves your shot, the game ends, and you lose your accumulated winnings.

Like with other Dexbet games, you can check the outcome of your play by using the Magic Number. You can find it by looking up this information on kleverscan.org and you can verify the result of your bet using dexbet.win/verify.

Cowboy Cash

Dive into the Wild West with Cowboy Cash, a slots game where luck and strategy collide for grand winnings. Match symbols and leverage unique multipliers for exciting payouts featuring a max win of up to 300x.

Engage in thrilling bonus rounds: 'Gold Digger,' 'Saloon Shootout,' and 'Gold Rush' for extra spins and multiplying riches. Saddle up for a cowboy adventure where every spin could lead to a fortune!

Classic Game: Start your adventure by placing your bet and hitting spin. Victory is yours when you align 3 or more identical symbols on any of the given sequences starting from the left to right slots:

Each symbol in Cowboy Cash Slot's Classic Game represents a unique multiplier applied to your bet amount. For example, aligning 3 Sheriff's Badge symbols multiplies

your bet by 2x. So, if you wager 100 CHIPS, you'll receive a payout of 200 CHIPS for that sequence. Additionally, it's entirely possible to land multiple winning sequences in the same game.

The Coin and the VS symbol act as a versatile trump card. It can complete the sequence for any other symbol. The possible multiplier options are: 0.1x, 0.5x, 1x, 2x, 2.5x, 5x, 10x and 20x.

Bounty Boost: Elevate your winning potential with the Bonus feature. This option enhances your gameplay by offering a direct path to the bonus rounds.

Suppose fortune smiles upon you and you land three or more identical Bonus symbols in a single spin. In that case, you'll automatically gain access to the corresponding Bonus round at no extra cost.

For those who prefer a shortcut, simply click the 'Buy Bonus' button to purchase immediate entry into these thrilling Bonus games:

Gold Digger Bonus:

Unlock the excitement of the Gold Digger Bonus, a booster to your Classic Game experience with a mining-themed adventure. Purchase this bonus for 10 special spins where each Coin symbol you hit remains fixed, dramatically improving your chances of unearthing bigger wins.

Saloon Shootout Bonus:

Step into the action with the Saloon Shootout Bonus. This thrilling bonus grants you 10 spins, each offering a chance to significantly boost your winnings.

Keep an eye out for the Weapons symbol – it completes a sequence with any other symbol, triggering an extra multiplier on the sequence's amount. The potential multipliers are impressive, ranging from 2x to a staggering 100x.

Gold Rush Bonus:

Immerse yourself in a daring bank robbery adventure with the Gold Rush Bonus. This bonus is split into two stages: the Heist Phase and the Showdown Phase.

In the Heist Phase, your goal is to gather as many Coins and Multipliers symbols as you can across 15 spins. Then, in the Showdown Phase, all your collected Coins and Multipliers are randomly placed in the Game, giving you 3 spins – 3 opportunities to use your accumulated items to complete winning sequences.

Like with other Dexbet games, you can check the outcome of your play by using the Magic Number. You can find it by looking up this information on kleverscan.org and you can verify the result of your bet using dexbet.win/verify.

New Games

Coming soon.

Dexbet Tokens

CHIPS Token (CHIPS-1GZP)

CHIPS is a revolutionary token designed to enhance accessibility and stability within our gaming ecosystem. Previously, Dexbet solely relied on KLV as its primary token and to overcome market volatility and provide a seamless gaming experience for players, CHIPS was created.

Dexbet CHIPS is a token designed to enable easy access for players from various blockchains. Users can effortlessly swap major tokens, starting with KLV, USDT TRC20 and ERC20, offering immediate access to Dexbet CHIPS. As we progress, we are expanding the token support, incorporating popular options like BTC, TRX, ETH and BNB, among others making it a universal gaming asset.

To ensure stability and ease of use, CHIPS is a KDA token securely pegged to USDT at a fixed ratio of 100:1 (1 CHIPS = 0.01 USDT). This pegging mechanism guarantees that players can focus on their gaming experience without worrying about token price fluctuations. And with the built-in Swap feature on dexbet.win/buy-chips and K5 Swap integration, trading Dexbet CHIPS will be seamless and hassle-free.

Dexbet CHIPS operates on a transparent supply system, allowing users to easily verify equivalence. Additionally, all reserve wallets are publicly visible, promoting a sense of trust and accountability within the Dexbet community.

[Blockchain explorer.](#)

The transition to Multichain marks an exciting phase for Dexbet Casino, expanding our player base and fostering a more inclusive gaming environment. Dexbet CHIPS, being universally accessible, empowers players from diverse blockchain backgrounds to immerse themselves in the thrilling gaming experiences Dexbet offers.

While Dexbet CHIPS brings enhanced accessibility, all game transactions will continue to take place on Kleverchain, retaining the advantages of the Klever ecosystem. This includes significantly lower transaction fees compared to other blockchains, ensuring a cost-effective and efficient gaming platform for all users.

At Dexbet Casino, users are rewarded with CHIPS when they bet, play games or participate in pools. They can conveniently withdraw their earnings in their preferred tokens and blockchains through a simple swap, ensuring a straightforward and rewarding gaming experience.

DXB Token (DXB-3SBO)

With the exponential growth of Dexbet, we envision a near future where the entire community that supports the project can earn rewards for being part of the project.

It may seem repetitive, but the community that surrounds the game and our partner plays a key role in the decisions made at the Casino, which is why creating a Token becomes necessary.

DXB (Dexbet Token) is the Casino's utility token that entitles you to various perks, promotions, bets, and future marketing actions as well as new features within the platform.

In addition to having the possibility to vote on changes, new games, and features, those who hold DXB in staking will also be entitled to the Dexbet Pool, with the aim of distributing the prizes evenly among the Pool addresses.

DXB Rewards

Having community support for the Dexbet project was something that boosted our desire to create and develop this project from the very beginning.

We knew that having this positive reinforcement from the start would be something special and necessary for Dexbet's success, and having this recognition established motivates us daily.

Therefore, it is natural to want to repay all this support to the people who assist us so incrementally. We want users to have fun with fair and safe games, and in addition, to win prizes for supporting the project.

Dexbet's financial strategy, focused on the resilience and self-sufficiency of our game wallets, has always been a key aspect of our operations. This approach ensures stability during the fluctuations of gaming activities and allows us to handle significant player wins smoothly.

Our consistent financial plan involves distributing 25% of the casino's profits to DXB holders, reinvesting 50% into the pool for enduring robustness, and using the remaining 25% for casino operations.

This balance has been instrumental in maintaining the casino's long-term sustainability and improving our marketing efforts, which in turn enhances the gaming experience through higher stakes and new giveaways. These rewards will be paid out in CHIPS from our Dexbet Pool, which you can view in the Mining Status section of our casino's website (<https://dexbet.win/miningStatus>).

To become eligible for these rewards, you'll need to stake your DXB tokens either in the Klever Wallet or in the Profile section of the dexbet.win website, enabled by the FPR system. This ensures that all participants have a fair and equitable chance to earn returns based on their investment. The more DXB you stake, the greater your proportional returns will be.

It's important to note that DXB tokens have an unstaking period of 28 epochs, which means that after you choose to remove your tokens from staking, you'll have to wait 7 days before you can actually withdraw them. This mechanism is crucial for ensuring the security of our Casino and preventing malicious actors from exploiting our platform.

By requiring a delay before tokens can be withdrawn, we incentivize users to act in the best interest of Dexbet and discourage any attempts to manipulate or attack it.

Additionally, we're pleased to offer a referral program as part of community rewards. When you refer someone to Dexbet using your referral link, you'll earn 0.01% of all bets that the player you referred to makes.

This means that the more players you refer to, the more rewards you'll receive. We believe that our Referral Program is a win-win for both our players and our community, as it incentivizes users to invite their friends to join our platform and enjoy exciting games and rewards.

Tokenomics

Token Name: Dexbet Token
Ticker: DXB
Max Supply: 150,000,000
Blockchain: KleverChain

Token Distribution

Mining: 112,000,000
Pre-sale: 18,000,000
Foundation: 15,000,000

Marketing: 5,000,000

The DXB token distribution model was designed to ensure a balanced and sustainable ecosystem that benefits all users. The total supply of DXB tokens is set at 150 million, which will be distributed as follows:

- **Mining:** 74.7% of the total supply will be allocated to Mining, which refers to the tokens that users can mine while playing at Dexbet's casino website (dexbet.win). The Mining mechanism is designed to incentivize user participation and to distribute the tokens gradually over time. The amount of DXB tokens that will be mined through time is not predictable, as it depends on user activity and demand, being unable to inform the Circulation Supply over time until the Mining Event is completed.
- **Buy for Stake:** 12% of the total supply will be allocated to a Pre-Sale event, where users can acquire DXB tokens by staking it. The circulation supply taking into account the Pre-Sale event will depend on the adhesion of the users, and the tokens acquired will be locked for a period of time according to the desire of each buyer (6, 12, 24 or 36 months). The token cannot be withdrawn during the time chosen to remain in Stake, and can only be traded as NFT in the secondary market. Any unallocated funds from the Buy for Stake event after the designated period for each range will be considered surplus and added to the project's Treasury.
- **Foundation:** 10% of the total supply will be allocated to the Dexbet Foundation, which will oversee the development, maintenance, and governance of the Dexbet ecosystem. The Foundation tokens will be distributed in two equal parts, with the first share going to the Foundation at the time the token is created and the second share being distributed 6 months later. Dexbet recognizes the concerns that some users may have about the allocation of tokens to the Foundation, and commits to not participating in the first Pool Distribution of rewards, as part of our commitment to the community.
- **Marketing:** 3.3% of the total supply will be allocated to Marketing activities and Team Members, which includes promotional campaigns, partnerships, and community engagement. The purpose of the marketing allocation is to raise awareness and adoption of the DXB token and the Dexbet platform. As with the Foundation distribution, the Marketing distribution of tokens will also happen in two equal parts, with the first share going at the time the token is created and the second share being distributed 6 months later.

Note that it is important to understand that in order to list the DXB token, Dexbet needs to provide liquidity in the trade platforms. This is a common practice in the crypto industry, as platforms like exchanges require a certain level of liquidity to ensure that buyers and sellers can execute trades effectively. Additionally, the allocation of tokens

to the Foundation is necessary for the ongoing development and governance of the Dexbet ecosystem.

The Foundation will oversee important functions such as maintaining the platform, implementing new features, and ensuring the security and stability of the system. By allocating tokens to the Foundation, Dexbet is taking a long-term view on the success and sustainability of the platform, which ultimately benefits all stakeholders, including players, users, and community members.

DXB Mining

The DXB token will be mined through bets placed in CHIPS. When placing a bet on dexbet.win the player will receive their DXBs according to the amount applied converted to USD.

Using the example of Mining Level 1, if the user bet 10,000 CHIPS and as CHIPS is pegged to USDT at a 100:1 ratio (1 CHIPS = 0.01 USDT), the user will receive 1 DXB.

Mining Level	Bet per DXB (USD)	Mining Per Level (DXB)	Mining Bets (USD)	Circulating (DXB)
1	10	1,000,000	10,000,000	39,000,000
2	11	1,000,000	11,000,000	40,000,000
3	12	1,000,000	12,000,000	41,000,000
4	13	1,000,000	13,000,000	42,000,000
5	14	1,000,000	14,000,000	43,000,000
6	15	1,000,000	15,000,000	44,000,000
7	16	1,000,000	16,000,000	45,000,000
8	17	1,000,000	17,000,000	46,000,000
9	18	1,000,000	18,000,000	47,000,000
10	19	1,000,000	19,000,000	48,000,000
...
112	121	1,000,000	121,000,000	150,000,000

Mining roadmap:

- In Mining Level 1, players receive 1 DXB for every 10 USD worth of CHIPS betted on Casino games;
- This fixed reward rate remains until 1,000,000 DXB is mined on the platform, at which point the mining progresses to the next level;
- Upon mining 1,000,000 DXB, the mining cost for each DXB increases by 1 USD betted. Consequently, in Mining Level 2, the cost to mine 1 DXB becomes 11 USD.

*Pre-sale: Buy for Stake system | **Event finished***

The Pre-Sale of the DXB token will take place through the platform called Buy for Stake within Bitcoin.me, a secure and reliable cryptocurrency exchange supported by Klever.

The Buy for Stake is a platform that enables users to purchase NFTs and lock them for a set period to earn bonuses. These bonuses increase proportionally with the length of the lock-up period, ranging from 6 to 36 months, in the case of DXB NFT.

Tokens are purchased through a Dexbet unique Non-Fungible Token (DXB NFT) that holds metadata with information about the number of tokens, lock-up time, rewards, and percentages.

The DXB NFT can be traded on any secondary market platform of your choice, providing users with the flexibility to buy and sell their NFT as they wish. If you choose to purchase the DXB NFT on a secondary market, you will need to deposit it into the Bitcoin.me platform in order to receive the rewards after the lock-up period ends.

Once the lock-up period is complete, users can choose to claim their DXB NFT rewards, which will then be automatically credited to their Bitcoin.me account. However, if you choose not to claim the rewards, you can keep them in the form of the NFT and trade them on secondary market platforms. The decision to claim rewards or hold the NFT is entirely up to the user.

Details of terms, periods and rewards are outlined in the table below.

Term	Price (USDT)	Limit (DXB)	Limit (USDT)	Bonus
6 months	0,15	3,333,334	500,000	8%
12 months	0,15	3,333,334	500,000	18%
24 months	0,15	3,333,334	500,000	40%
36 months	0,15	3,333,334	500,000	75%

Token Roadmap

- Mining: December 16, 2022
- Pre-sale March 20, 2023
- Mining token release: March 27, 2023
- Bitcoin.me & Swap listing: April 3, 2023
- Dexbet First Pool distribution: April 10, 2023

Disclaimer 1: All dates announced in this document are subject to change without notice.

Disclaimer 2: The purchase of DXB NFT involves risks and uncertainties, including but not limited to market volatility, and the potential for loss of value. This NFT is not investment advice and should not be considered as such. By purchasing DXB NFT, you acknowledge that: 1. No refunds are available; 2. NFT rewards cannot be claimed before the deadline; 3. Minimum purchase amount is 100 DXB; 4. Purchase price per token is 0.15 USDT; 5. The issuer of DXB NFT is not liable for any losses incurred by investors; 6. The NFT reward is only claimable inside the Bitcoin.me Exchange. Please review the terms and conditions of the DXB NFT sale before making a purchase. If you do not agree, do not proceed with the purchase.

Casino Roadmap

- 2022 Q3 - Initial Betting Games (Dice, Wheel)
- 2022 Q3 - New Betting Game (Mines)
- 2022 Q4 - DXB Token Mining
- 2022 Q4 - Total of 5 Betting Games
- 2023 Q1 - DXB Token Pre-sale
- 2023 Q1 - DXB Listing on Bitcoin.me & Swap
- 2023 Q1 - Start Dexbet Pool Distribution to DXB holders
- 2023 Q2 - DXB Liquidity Pool on Bitcoin.me
- 2023 Q2 – New Game releases
- 2023 Q3 - New Game releases
- 2023 Q4 - New Game releases

We expect to release an updated roadmap by the end of Q1/2024.
